[57] CLAIM

The ornamental design for a beverage can-carrying device, as shown and described.

DESCRIPTION

FIG. 1 is a perspective view of a can-carrying device according to this invention which is especially adapted to carry a 2×3 array of beverage cans;

FIG. 2 is a top plan view of the beverage can-carrying device shown in FIG. 9;

FIG. 3 is a bottom plan view of the beverage can-carrying device shown in FIG. 9;

FIG. 4 is a right side elevational view of the beverage can-carrying device shown in FIG. 9, the left side elevational view being a mirror image thereof;

FIG. 5 is a front elevational view of the beverage can-carrying device shown in FIG. 9, the rear elevational view being a mirror image thereof;

FIG. 6 is a top plan view of another exemplary embodiment of a can-carrying device according to this invention which is especially adapted to carry a 3×4 array of beverage cans;

FIG. 7 is a right side elevational view of the beverage can-carrying device shown in FIG. 14, the left side elevational view being a mirror image thereof, and the front and rear end elevational views being the same as FIG. 13 above; and,

FIG. 8 is a bottom plan view of the beverage can-carrying device shown in FIG. 14.

FIG. 2

FIG. 3

FIG. 4

FIG. 5

FIG. 6

FIG. 7

FIG. 8
