FIG. 1 is a front perspective view of tandem seating according to the present invention, the tandem seating comprising three seating units;
FIG. 2 is a top plan view of the tandem seating of FIG. 1;
FIG. 3 is a side elevation view from the right side (as viewed in FIG. 1) of the tandem seating of FIG. 1, wherein the left side elevation view is a mirror reflection of the view of FIG. 3;
FIG. 4 is a rear perspective view of the tandem seating of FIG. 1;
FIG. 5 is a bottom plan view of the seating of FIG. 1;
FIG. 6 is a perspective view of a second version of tandem seating according to the present invention, the tandem seating comprising two seating units; and,
FIG. 7 is a perspective view of a third version of tandem seating according to the present invention, the tandem seating comprising four seating units.
