[57] **CLAIM**

The ornamental design for a curved segment of lens panel for lighting fixture, as shown and described.

DESCRIPTION

FIG. 1 is a front view of a curved segment of a lens panel for a lighting fixture showing my new design;
FIG. 2 is a right side view thereof; showing a slight canting of the interior surface;
FIG. 3 is a rear view thereof;
FIG. 4 is an end view thereof;
FIG. 5 is a perspective view thereof; and,
FIG. 6 is a perspective view of the same design shown in FIG. 5 except under different photographic conditions.
The outer curving line visible in FIG. 2 is a refraction of the lower rear edge of the curved lens panel segment.
The ends of the segments shown in FIGS. 1-6 are covered by a cloth (which forms no part of the claimed design). Thus, the segments of FIGS. 1-6 are intended to connote indefinite segment lengths and ends.
