FIG. 1 is a front view of a straight segment of a lens panel for a lighting fixture showing my new design, the segment having a triangular cross-section whose longest side appears in this figure;

FIG. 2 is a right side view thereof, the left side being a mirror image thereof;

FIG. 3 is a rear view thereof showing the two smaller sides from the apex of the triangular cross-section;

FIG. 4 is a perspective view thereof; and,

FIG. 5 is a perspective view of the same design shown in FIG. 4 except under different photographic conditions.

The ends of the segments shown in FIGS. 1-5 are covered by a cloth (which forms no part of the claimed design). Thus, the segments shown in FIGS. 1-5 are intended to connote indefinite segment lengths and ends.

The horizontal line visible in FIG. 2 is a refraction of the lower rear edge of the lens panel segment.
