[57] CLAIM

The ornamental design for a electrical smoking appliance, as shown and described.

DESCRIPTION

FIG. 1 is an isometric view of a first embodiment of a electrical smoking appliance showing the front, top and right sides of my design in an operative position with an extended cigarette mouthpiece, wherein environmental structure comprising a switch and a slot are shown in broken lines;

FIG. 2 is a left side elevational view thereof, wherein the switch is shown in broken line;

FIG. 3 is a back side elevational view thereof, wherein the switch is shown in broken line;

FIG. 4 is a bottom elevational view thereof;

FIG. 5 is an isometric view of the first embodiment of the electrical smoking appliance showing the front, top and right sides of my design in an inoperative position with a retracted or removed cigarette mouthpiece, the back side elevational view being the same as in FIG. 3, wherein environmental structure comprising a switch and a slot are shown in broken lines;

FIG. 6 is a left side elevational view thereof, wherein the switch is shown in broken line;

FIG. 7 is a bottom elevational view thereof;

FIG. 8 is an isometric view of a second embodiment of this electrical smoking appliance showing the front, top and right sides of my design in an operative position with an extended cigarette mouthpiece and a retracted sheath, wherein environmental structure comprising a switch and slot are shown in broken lines;

FIG. 9 is a left side elevational view thereof;

FIG. 10 is a back side elevational view thereof;

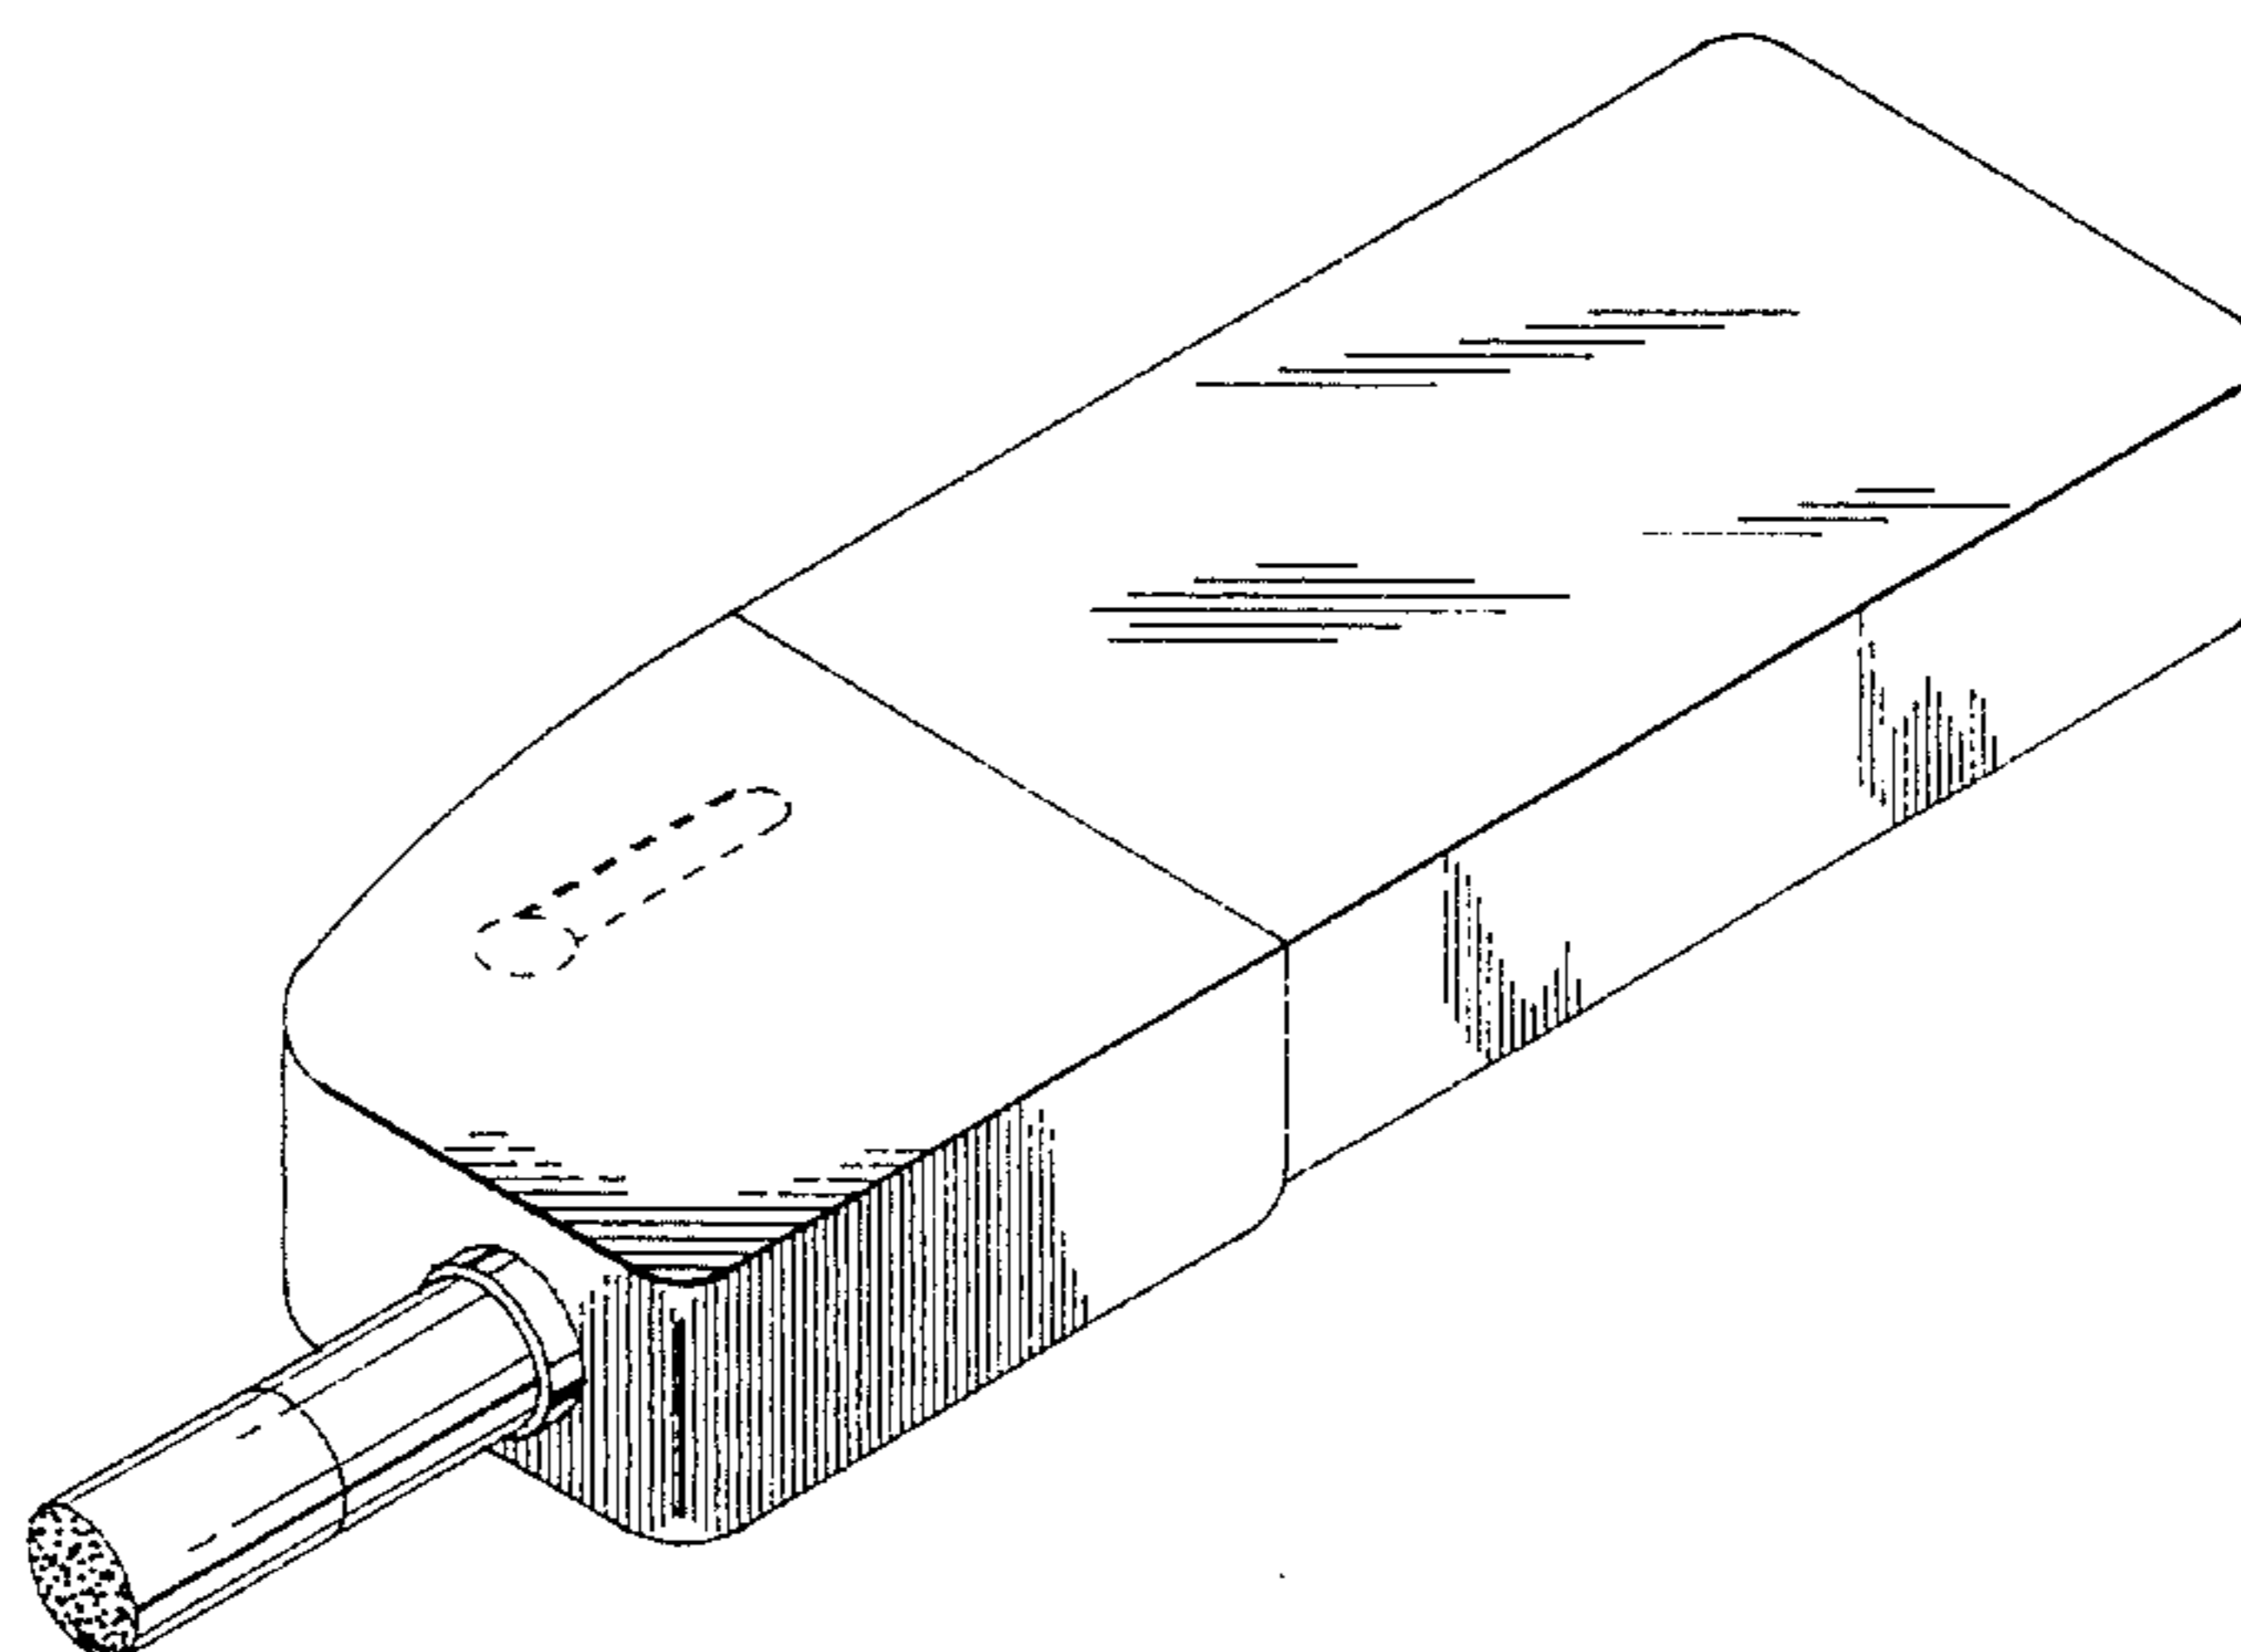

FIG. 11 is a bottom elevational view thereof;

FIG. 12 is an isometric view of the second embodiment of the electrical smoking appliance in an inoperative position with an extended sheath, wherein environmental structure comprising a switch and slot are shown in broken lines, the back side elevational view by the same as in FIG. 10;

FIG. 13 is a left side elevational view thereof; and,

FIG. 14 is a back side elevational view thereof.
