FIG. 1 is a perspective view of the merchandise display rack of the invention in exploded relation to a base upon which the rack may be optionally positioned to be free-standing on a horizontal surface, the base being shown in broken lines for illustrative purposes only and forming no part of the claimed design;

FIG. 2 is a perspective view of the rack of FIG. 1 in exploded relation to a perforated, hollow beam to which the rack may optionally be secured by various fastening means, the beam and fasteners being shown in broken lines for illustrative purposes only and forming no part of the claimed design;

FIG. 3 is a front elevational view of the rack, the appearance being the same from the rear;

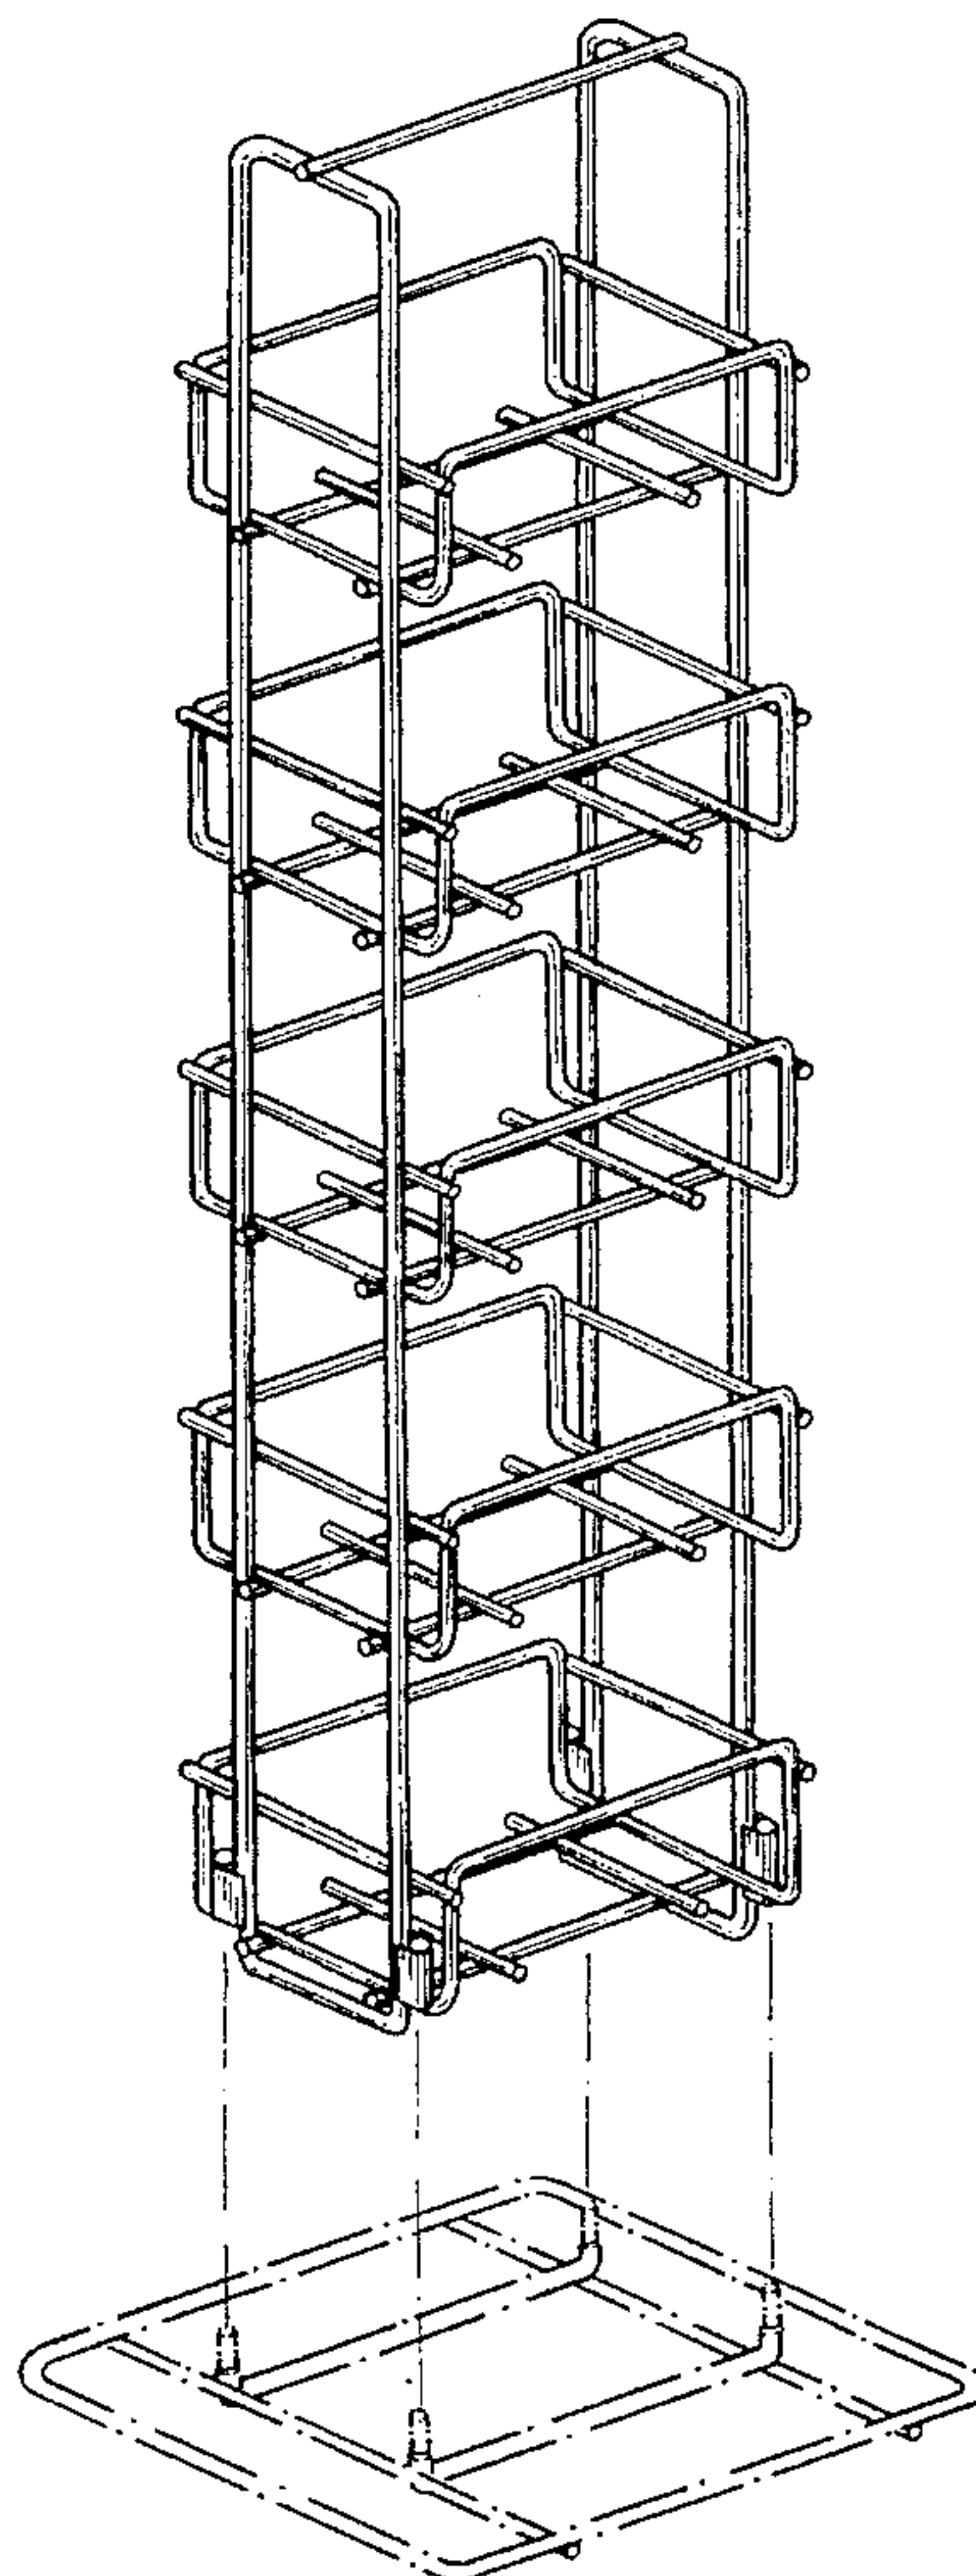

FIG. 4 is a side elevational view of the display rack, the appearance being the same from both sides;

FIG. 5 is a bottom plan view; and,

FIG. 6 is a top plan view thereof.
