[57] **CLAIM**

The ornamental design for a workman's magnetic wrist band for holding small metal objects, as shown.

DESCRIPTION

FIG. 1 is a perspective view of the workman's magnetic

wrist band for holding small metal objects in the closed position;

FIG. 2 is a side elevation of the workman's magnetic wrist band for holding small metal objects in the closed position;

FIG. 3 is a top plan view of the workman's magnetic wrist band for holding small metal objects in the closed position;

FIG. 4 is a bottom plan view of the workman's magnetic wrist band for holding small metal objects in the closed position;

FIG. 5 is a view of one end of the workman's magnetic wrist band for holding small metal objects in the closed position;

FIG. 6 is a view of the opposite end of the workman's magnetic wrist band for holding small metal objects in the closed position;

FIG. 7 is a top plan view of the workman's magnetic wrist band for holding small metal objects in the open position;

FIG. 8 is bottom plan view of the workman's wrist band for holding small metal objects in the open position;

FIG. 9 is a side elevation of the workman's magnetic wrist band for holding small metal objects in the open position;

FIG. 10 is a view of one end of the workman's magnetic wrist band for holding small metal objects in the open position; and,

FIG. 11 is a view of the opposite end of the workman's magnetic wrist band for holding small metal objects in the open position.
