[57] CLAIM

The ornamental design for a pharmaceutical tablet, as shown and described.

DESCRIPTION

FIG. 1 is a perspective view of a first embodiment of the tablet of the present invention;

FIG. 2 is a top view of the first embodiment of the tablet of the present invention;

FIG. 3 is a side view of the first embodiment of the tablet, taken from the point II of FIG. 2 (the opposite side is identical);

FIG. 4 is a bottom view of the first embodiment of the tablet of the present invention;

FIG. 5 is a side view of the first embodiment of the tablet, taken from the point III of FIG. 2 (the opposite side is identical);

FIG. 6 is a perspective view of a second embodiment of the tablet of the present invention;

FIG. 7 is a top view of the second embodiment of the tablet of the present invention;

FIG. 8 is a side view of the second embodiment of the tablet, taken from the point II of FIG. 7 (the opposite side is identical);

FIG. 9 is a bottom view of the second embodiment of the tablet of the present invention;

FIG. 10 is a side view of the second embodiment of the tablet, taken from the point III of FIG. 7 (the opposite side is identical);

FIG. 11 is a perspective view of a third embodiment of the tablet of the present invention;

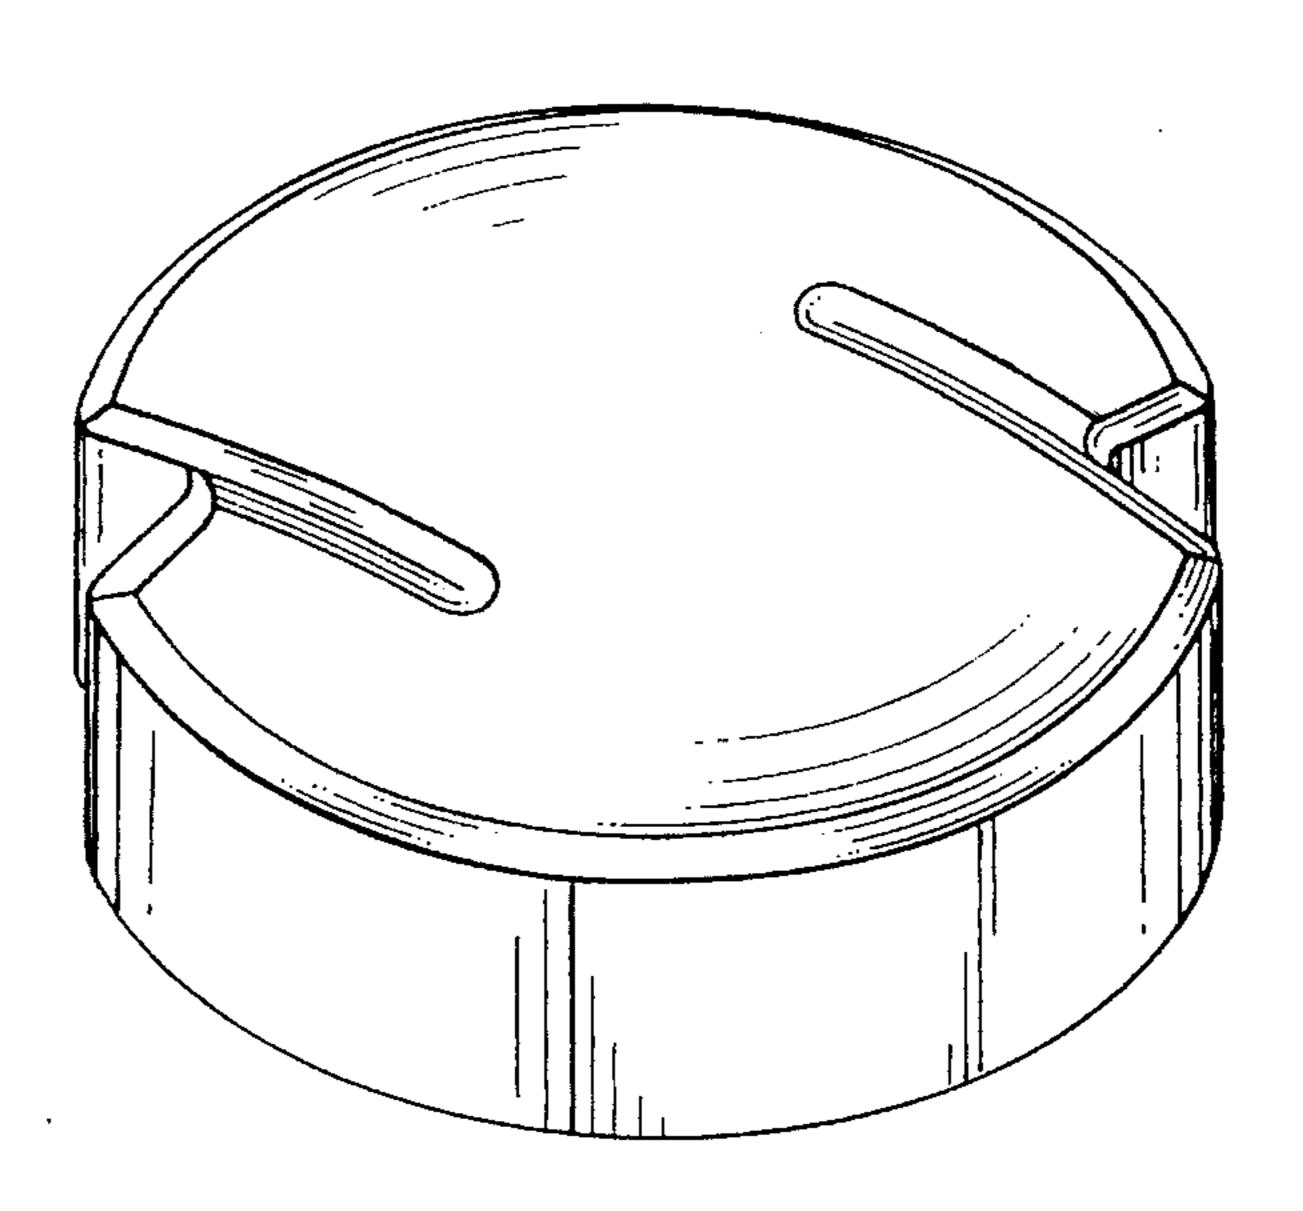

FIG. 12 is a top view of the third embodiment of the tablet of the present invention;

FIG. 13 is a side view of the third embodiment of the tablet, taken from the point II of FIG. 12 (the opposite side is identical);

FIG. 14 is a bottom view of the third embodiment of the tablet of the present invention; and,

FIG. 15 is a side view of the third embodiment of the tablet, taken from the point III of FIG. 12 (the opposite side is identical).
