The ornamental design for a car seat visor, as shown and described.

CLAIM

Primary Examiner—Janice E. Seeger

[57]

DESCRIPTION

FIG. 1 is a top plan view of the car seat visor in the fully open position, showing my new design;

FIG. 2 is a side elevational view of the car seat visor in the fully open position;

FIG. 3 is a right hand side view with the front cover being pivoted forward. The side has been broken away to view the pivot arm in the inside connecting the front cover to the main body of the car seat visor;

FIG. 4 is a front view of that shown in FIG. 3;

FIG. 5 is a isometric view of the car seat visor in the fully closed position;

FIG. 6 is a isometric view of the car seat visor with its front cover in the open position;

FIG. 7 is a isometric view of the car seat visor as shown in FIG. 6 with also the left and right first movable sun side guards in the open position;

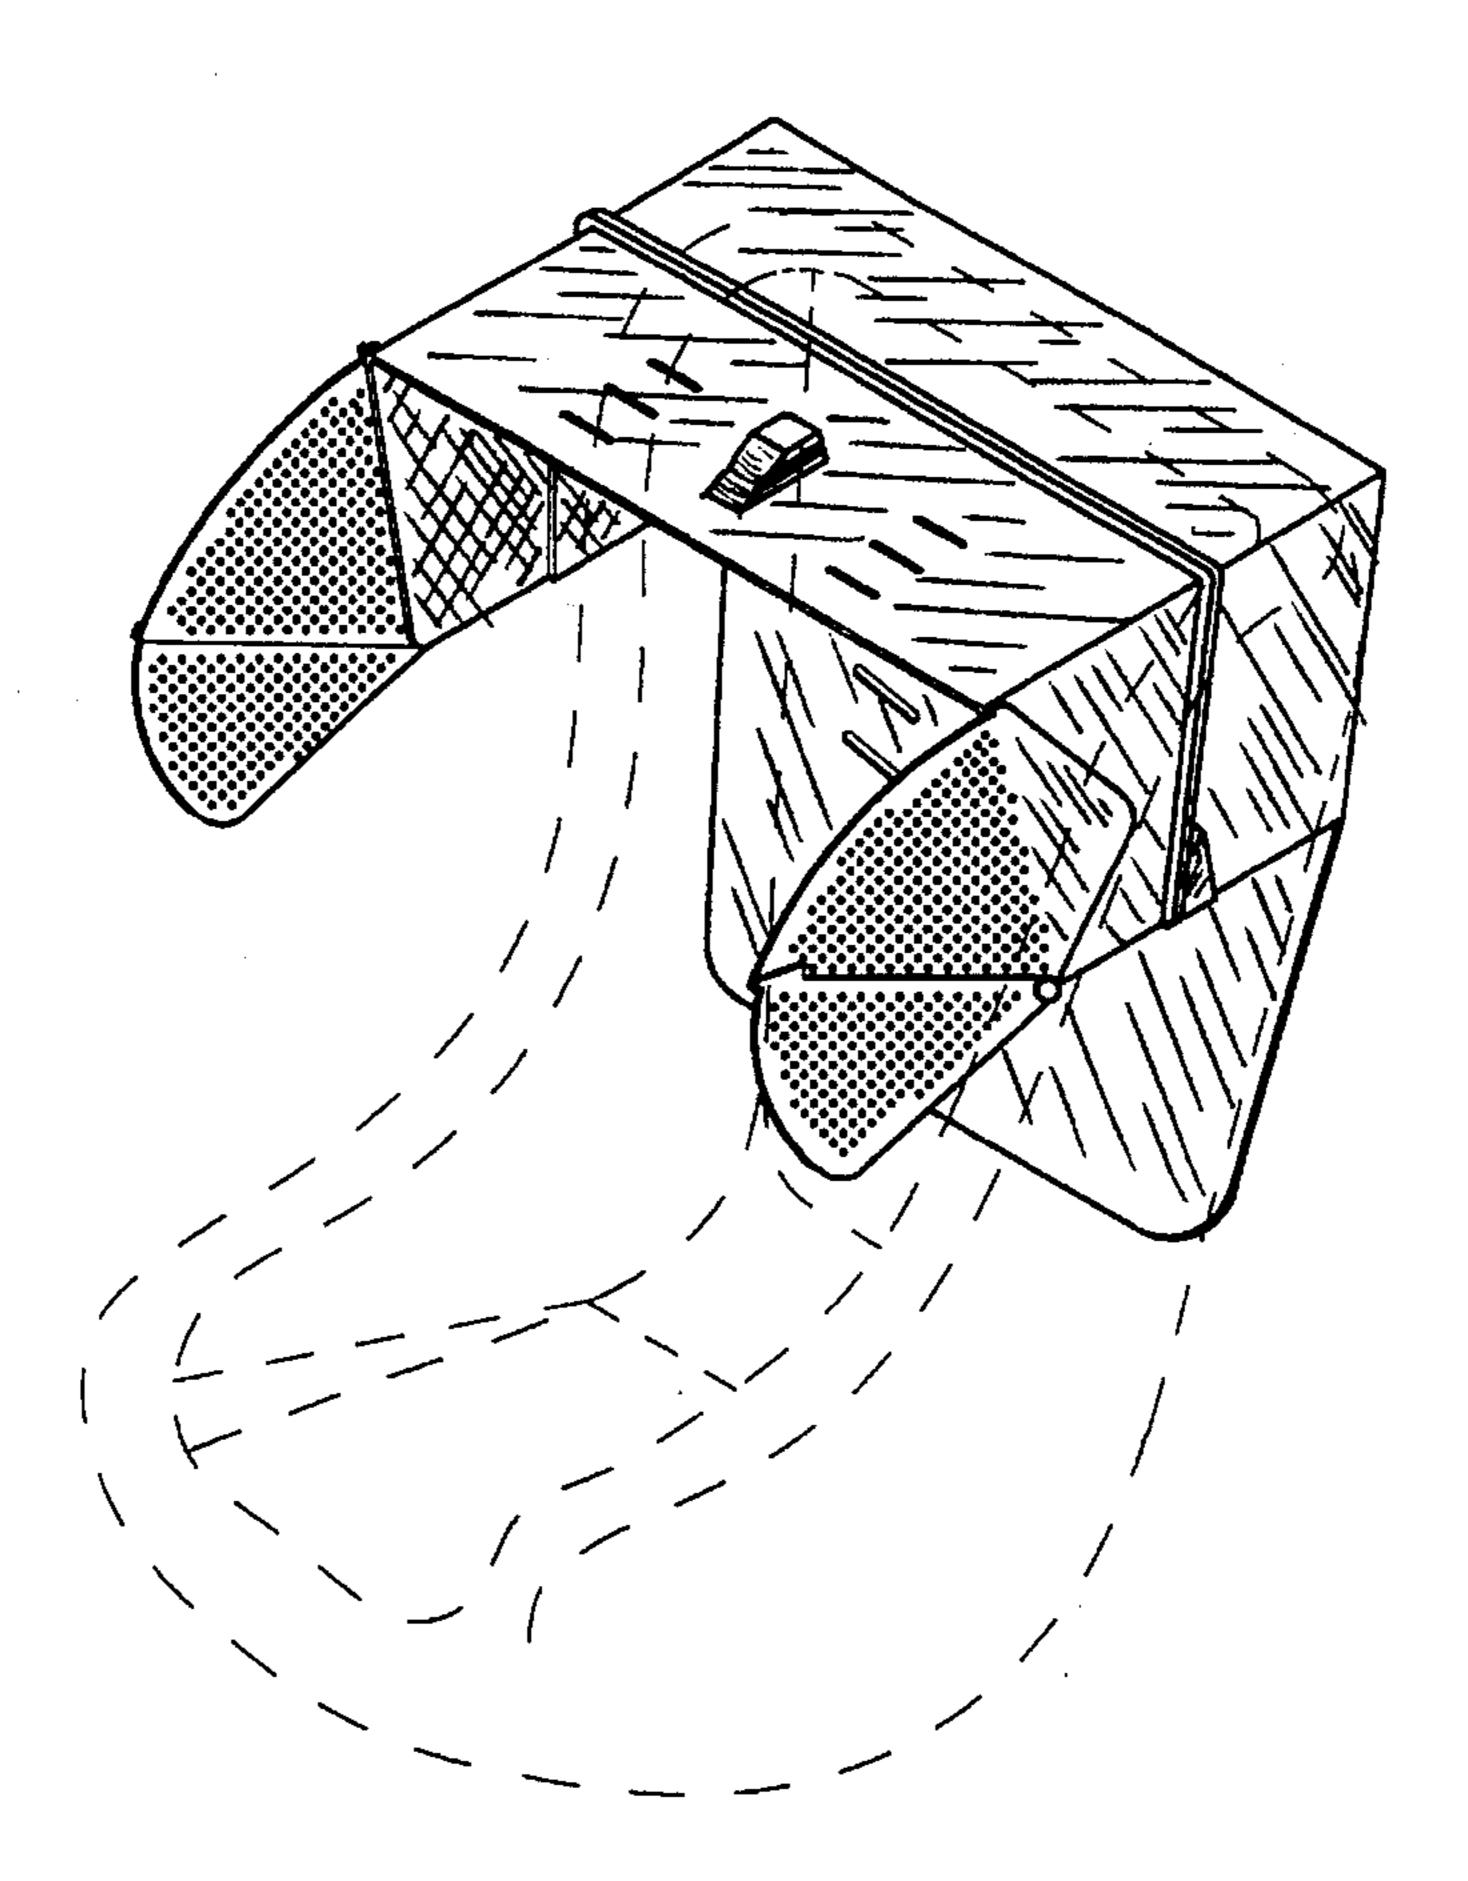

FIG. 8 is a isometric view of the car seat visor as shown in FIG. 6 with also the right first and second movable sun side guards in the fully open position;

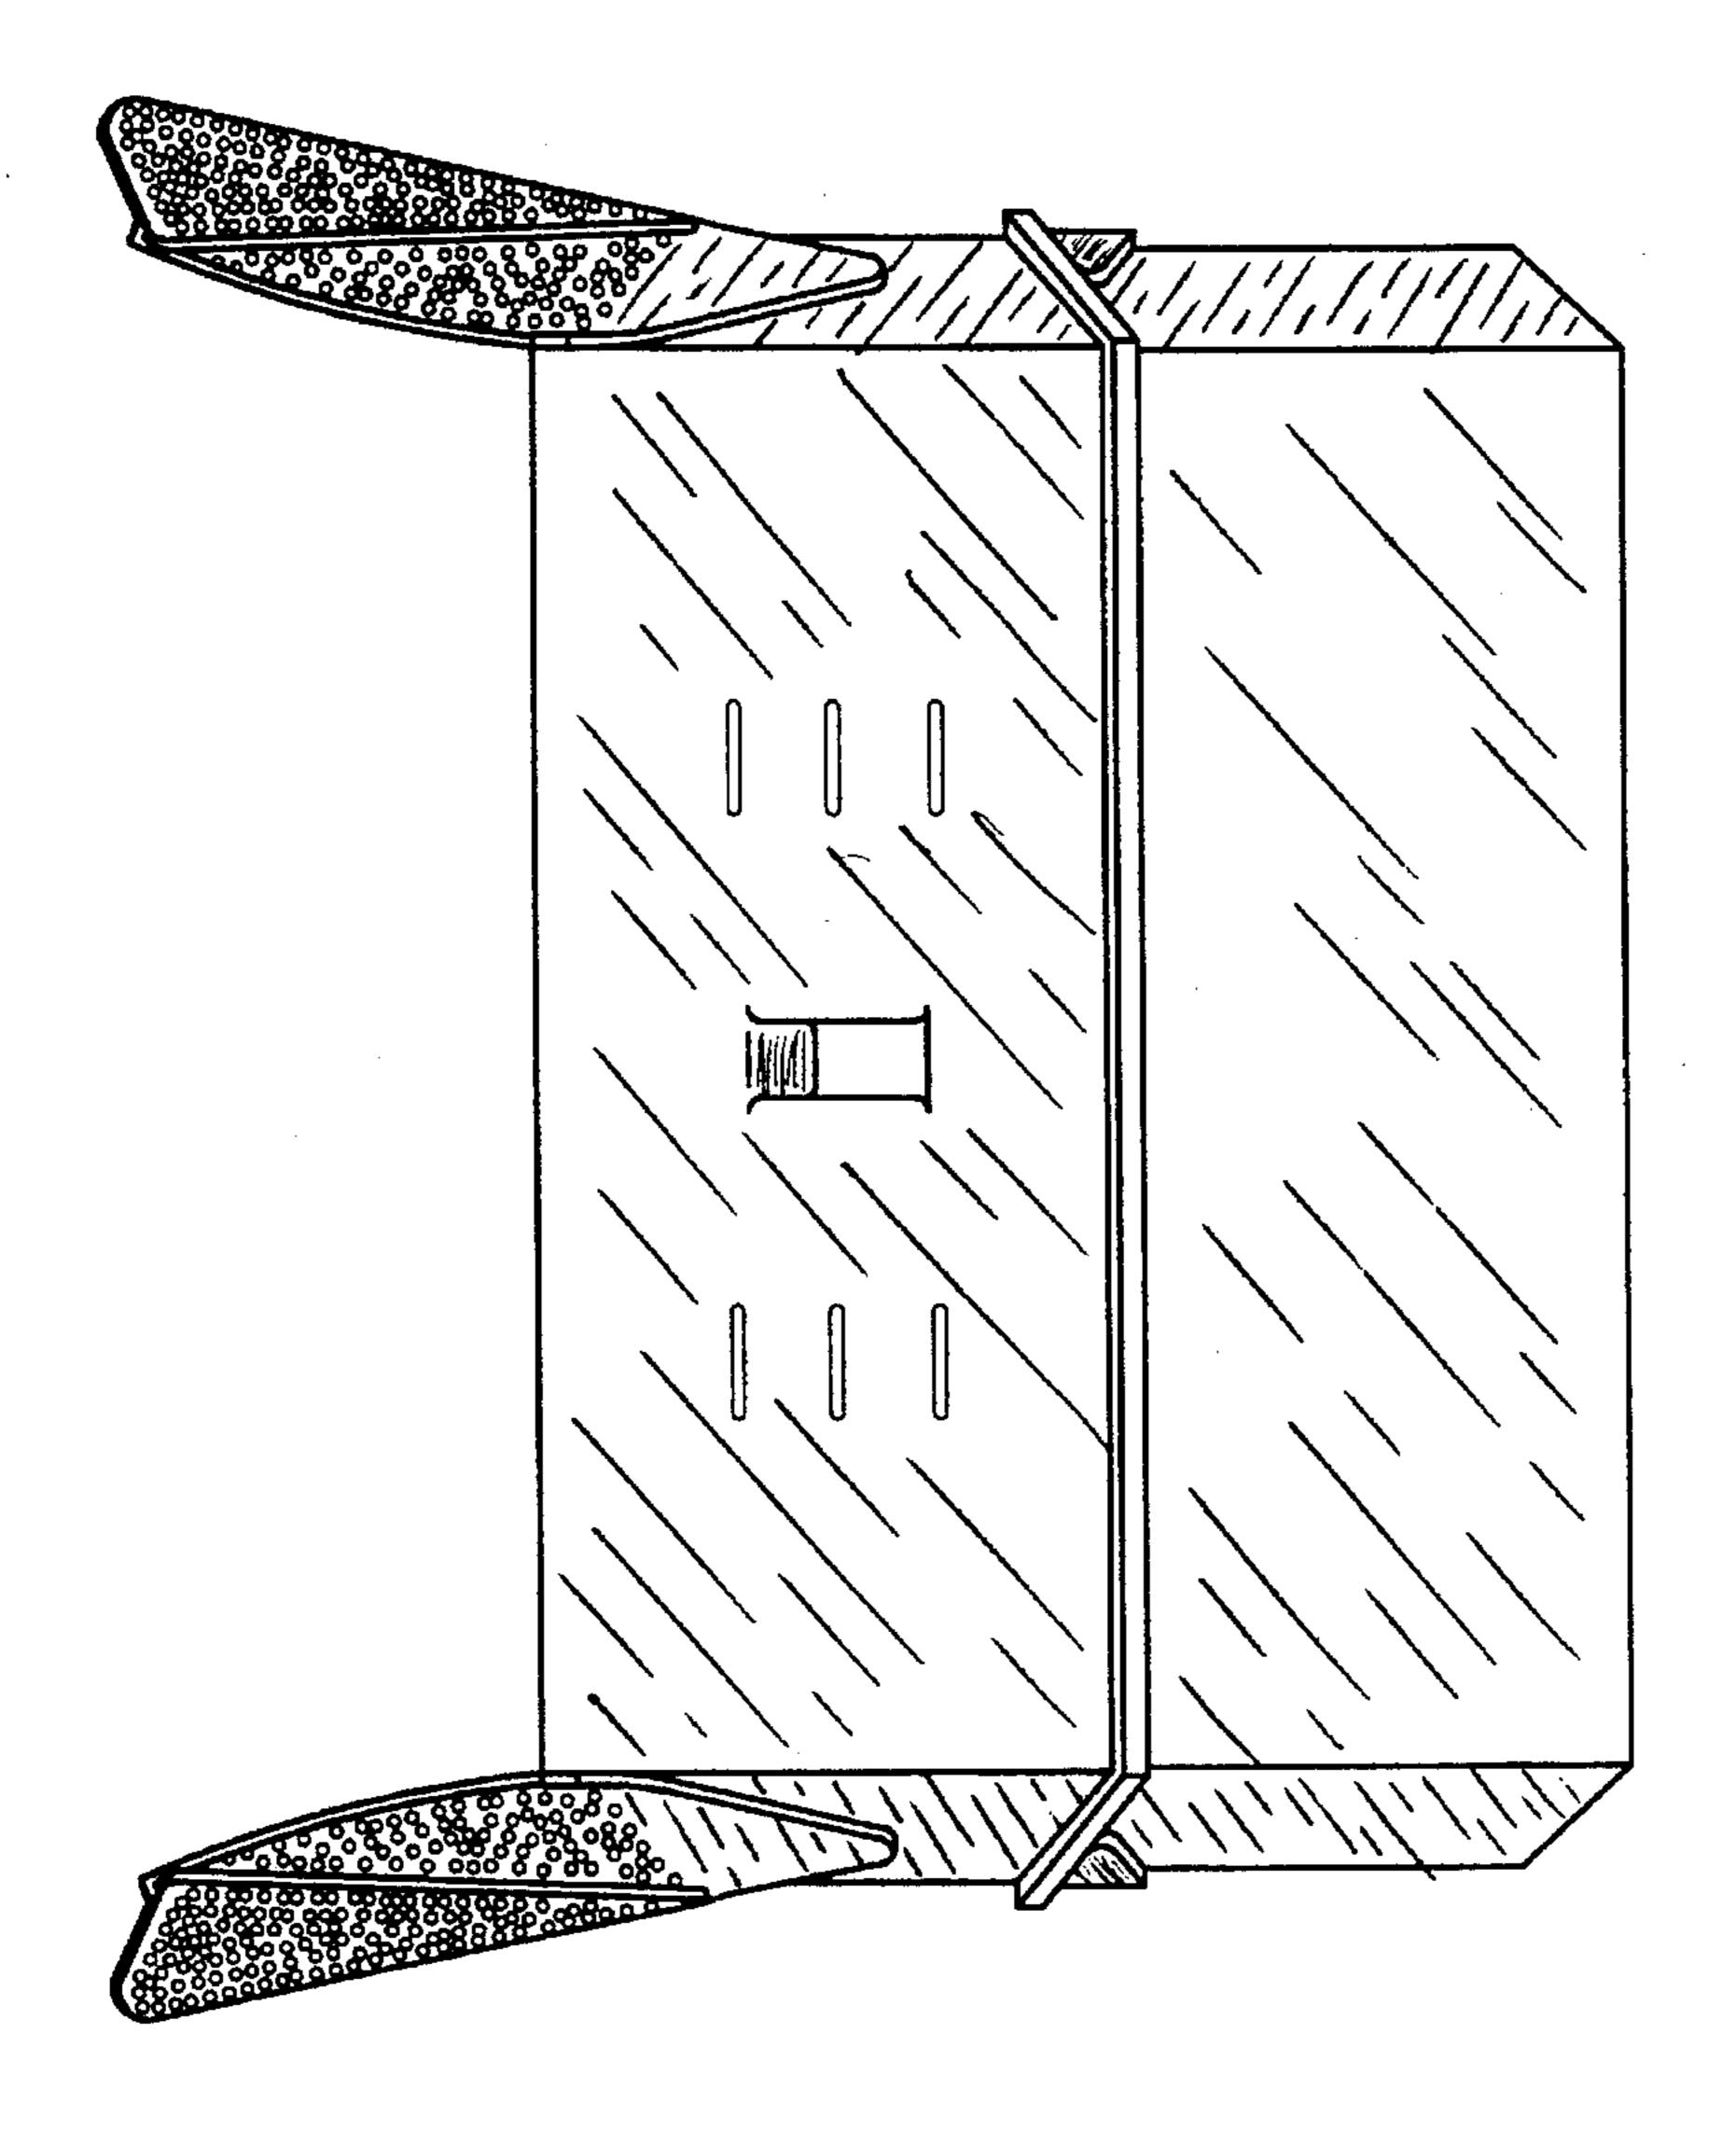

FIG. 9 is a isometric view of the car seat visor as shown in FIG. 6 with also both left and right first and second movable sun side guards in the fully open position; and,

FIG. 10 is a front view of the car seat visor in the fully closed position.

The broken lines are for environmental purposes only and form no part of the claimed design.
