Primary Examiner—Doris Clark

[57] **CLAIM**

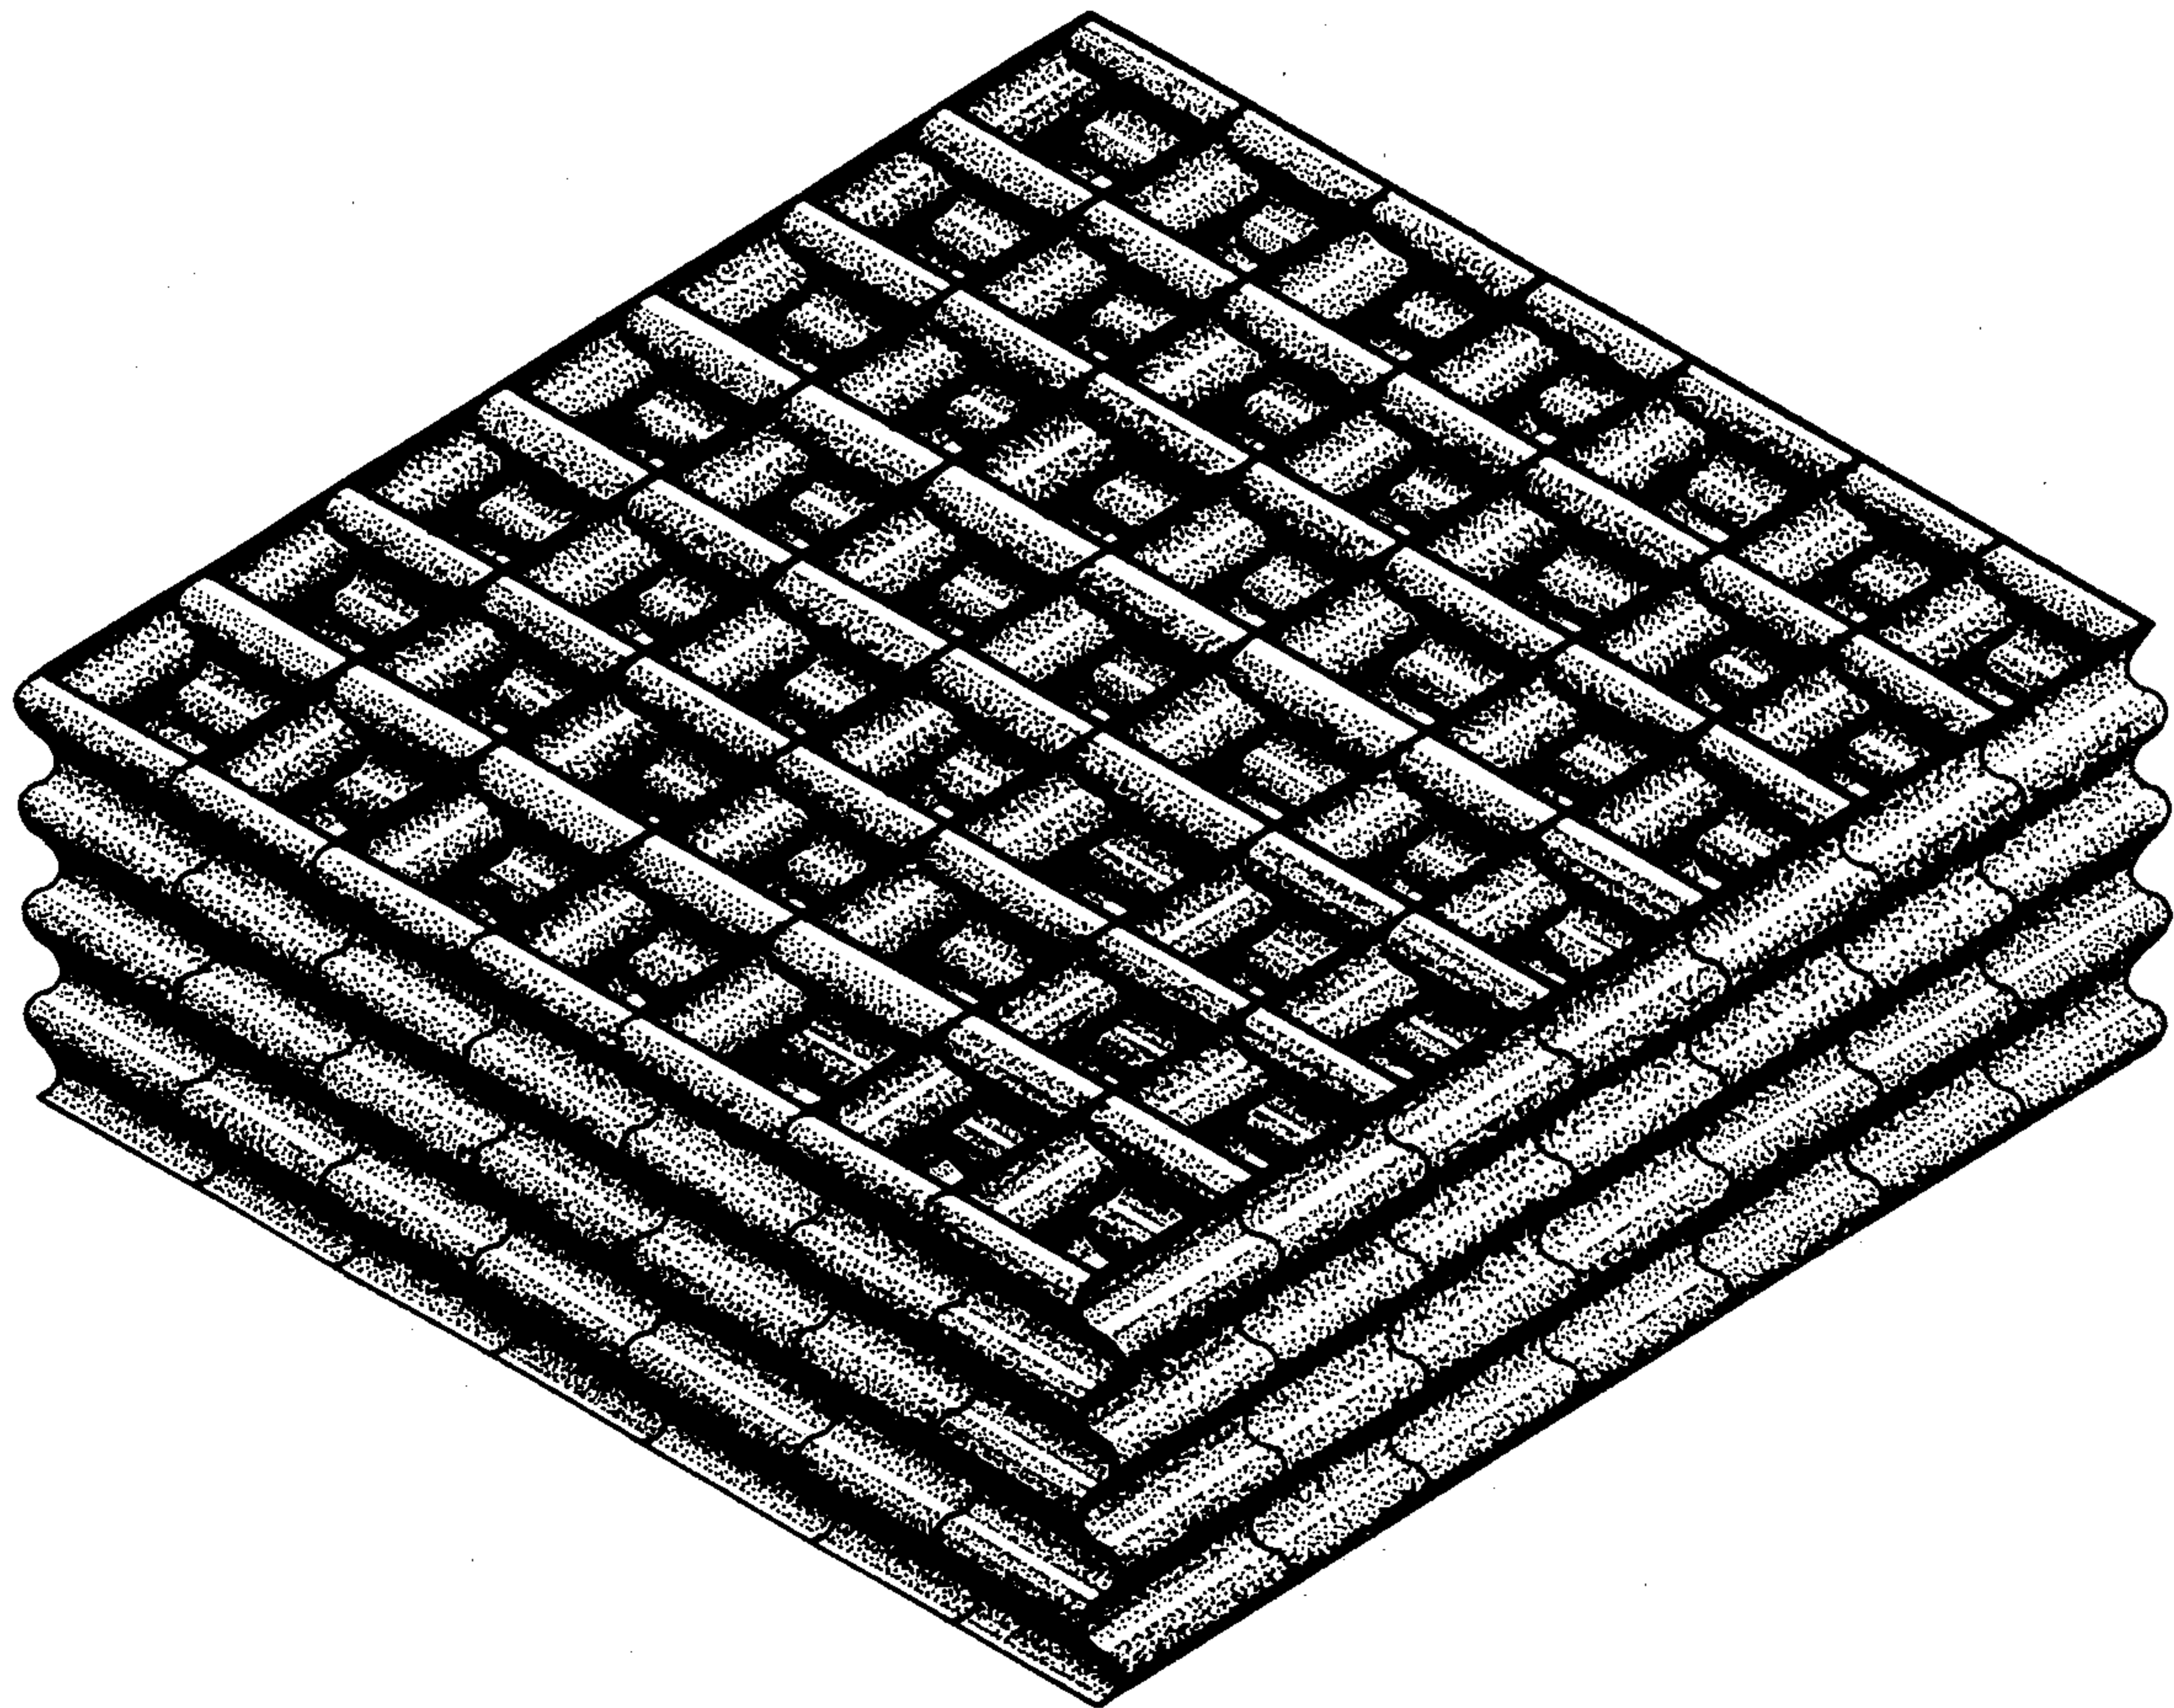

The ornamental design for a grid structure, as shown and described.

DESCRIPTION

FIG. 1 is a top right side perspective view of a grid structure according to the present invention, the opposite side being a mirror image of the right side; and, FIG. 2 is a bottom left side perspective view of the grid structure, the opposite side being a mirror image of the left side.

The characteristic feature of the design of a grid structure according to the present invention resides in the fact that the interpenetrating grid sections, which form the interstices defining the grid structure, have sinuous surfaces.
