[57] **CLAIM**

The ornamental design for a crank handle for a fishing reel, as shown and described.

DESCRIPTION

FIG. 1 is a front, top and right side perspective view of a crank handle for a fishing reel showing our new design;
FIG. 2 is a plan view thereof;
FIG. 3 is a right side elevation view thereof;
FIG. 4 is a bottom view thereof;
FIG. 5 is a left side elevation view thereof;
FIG. 6 is a rear elevation view thereof; and,
FIG. 7 is a front elevation view thereof.

The designations with respect to top, bottom, left side, right side, etc. are arbitrary in that the crank handle is rotatable and can be placed on either side of a fishing reel. The portions of the crank handle and the structure on which the crank handle is mounted that are shown in dotted lines do not constitute part of the claimed invention.
