[57] **CLAIM**

The ornamental design for a tire tread, as shown and
described.

DESCRIPTION

FIG. 1 is a perspective view of a tire tread, it being
understood that the pattern is repeated uniformly throughout
the circumference of the tread;

FIG. 2 is a front elevational view thereof;

FIG. 3 is a side elevational view thereof, the opposite side
elevational view being a mirror image thereof; and,

FIG. 4 is an enlarged fragmentary front view thereof.

In the drawings, the dark stippled surface shading represents
the recessed portion of the tread grooves, having a depth as
best shown in FIG. 2; the broken lines defining the tire inner
bead and the peripheral boundary between the tire tread and
the sidewall are for illustrative purposes only and form no
part of the claimed design.
