[57] **CLAIM**

The ornamental design for a tire tread, as shown and  
described.

**DESCRIPTION**

FIG. 1 is a perspective view of a tire tread, it being  
understood that the pattern is repeated uniformly throughout  
the circumference of the tread;

FIG. 2 is a front elevational view thereof;

FIG. 3 is a side elevational view thereof, the opposite side  
elevational view being a mirror image thereof; and,

FIG. 4 is an enlarged fragmentary front view thereof.

In the drawings, the dark stippled surface shading represents  
the recessed portion of the tread grooves, having a depth as  
best shown in FIG. 2; the broken lines defining the tire inner  
bead and the peripheral boundary between the tire tread and  
the sidewall are for illustrative purposes only and form no  
part of the claimed design.
