[57] CLAIM

The ornamental design for a modular shelf stand, as shown and described.

DESCRIPTION

FIG. 1 is a perspective view of a modular shelf stand showing my new design;

FIG. 2 is a top plan view thereof;

FIG. 3 is a front elevational view thereof, the rear being identical thereto;

FIG. 4 is a side elevational view thereof, the opposite side being identical thereto;

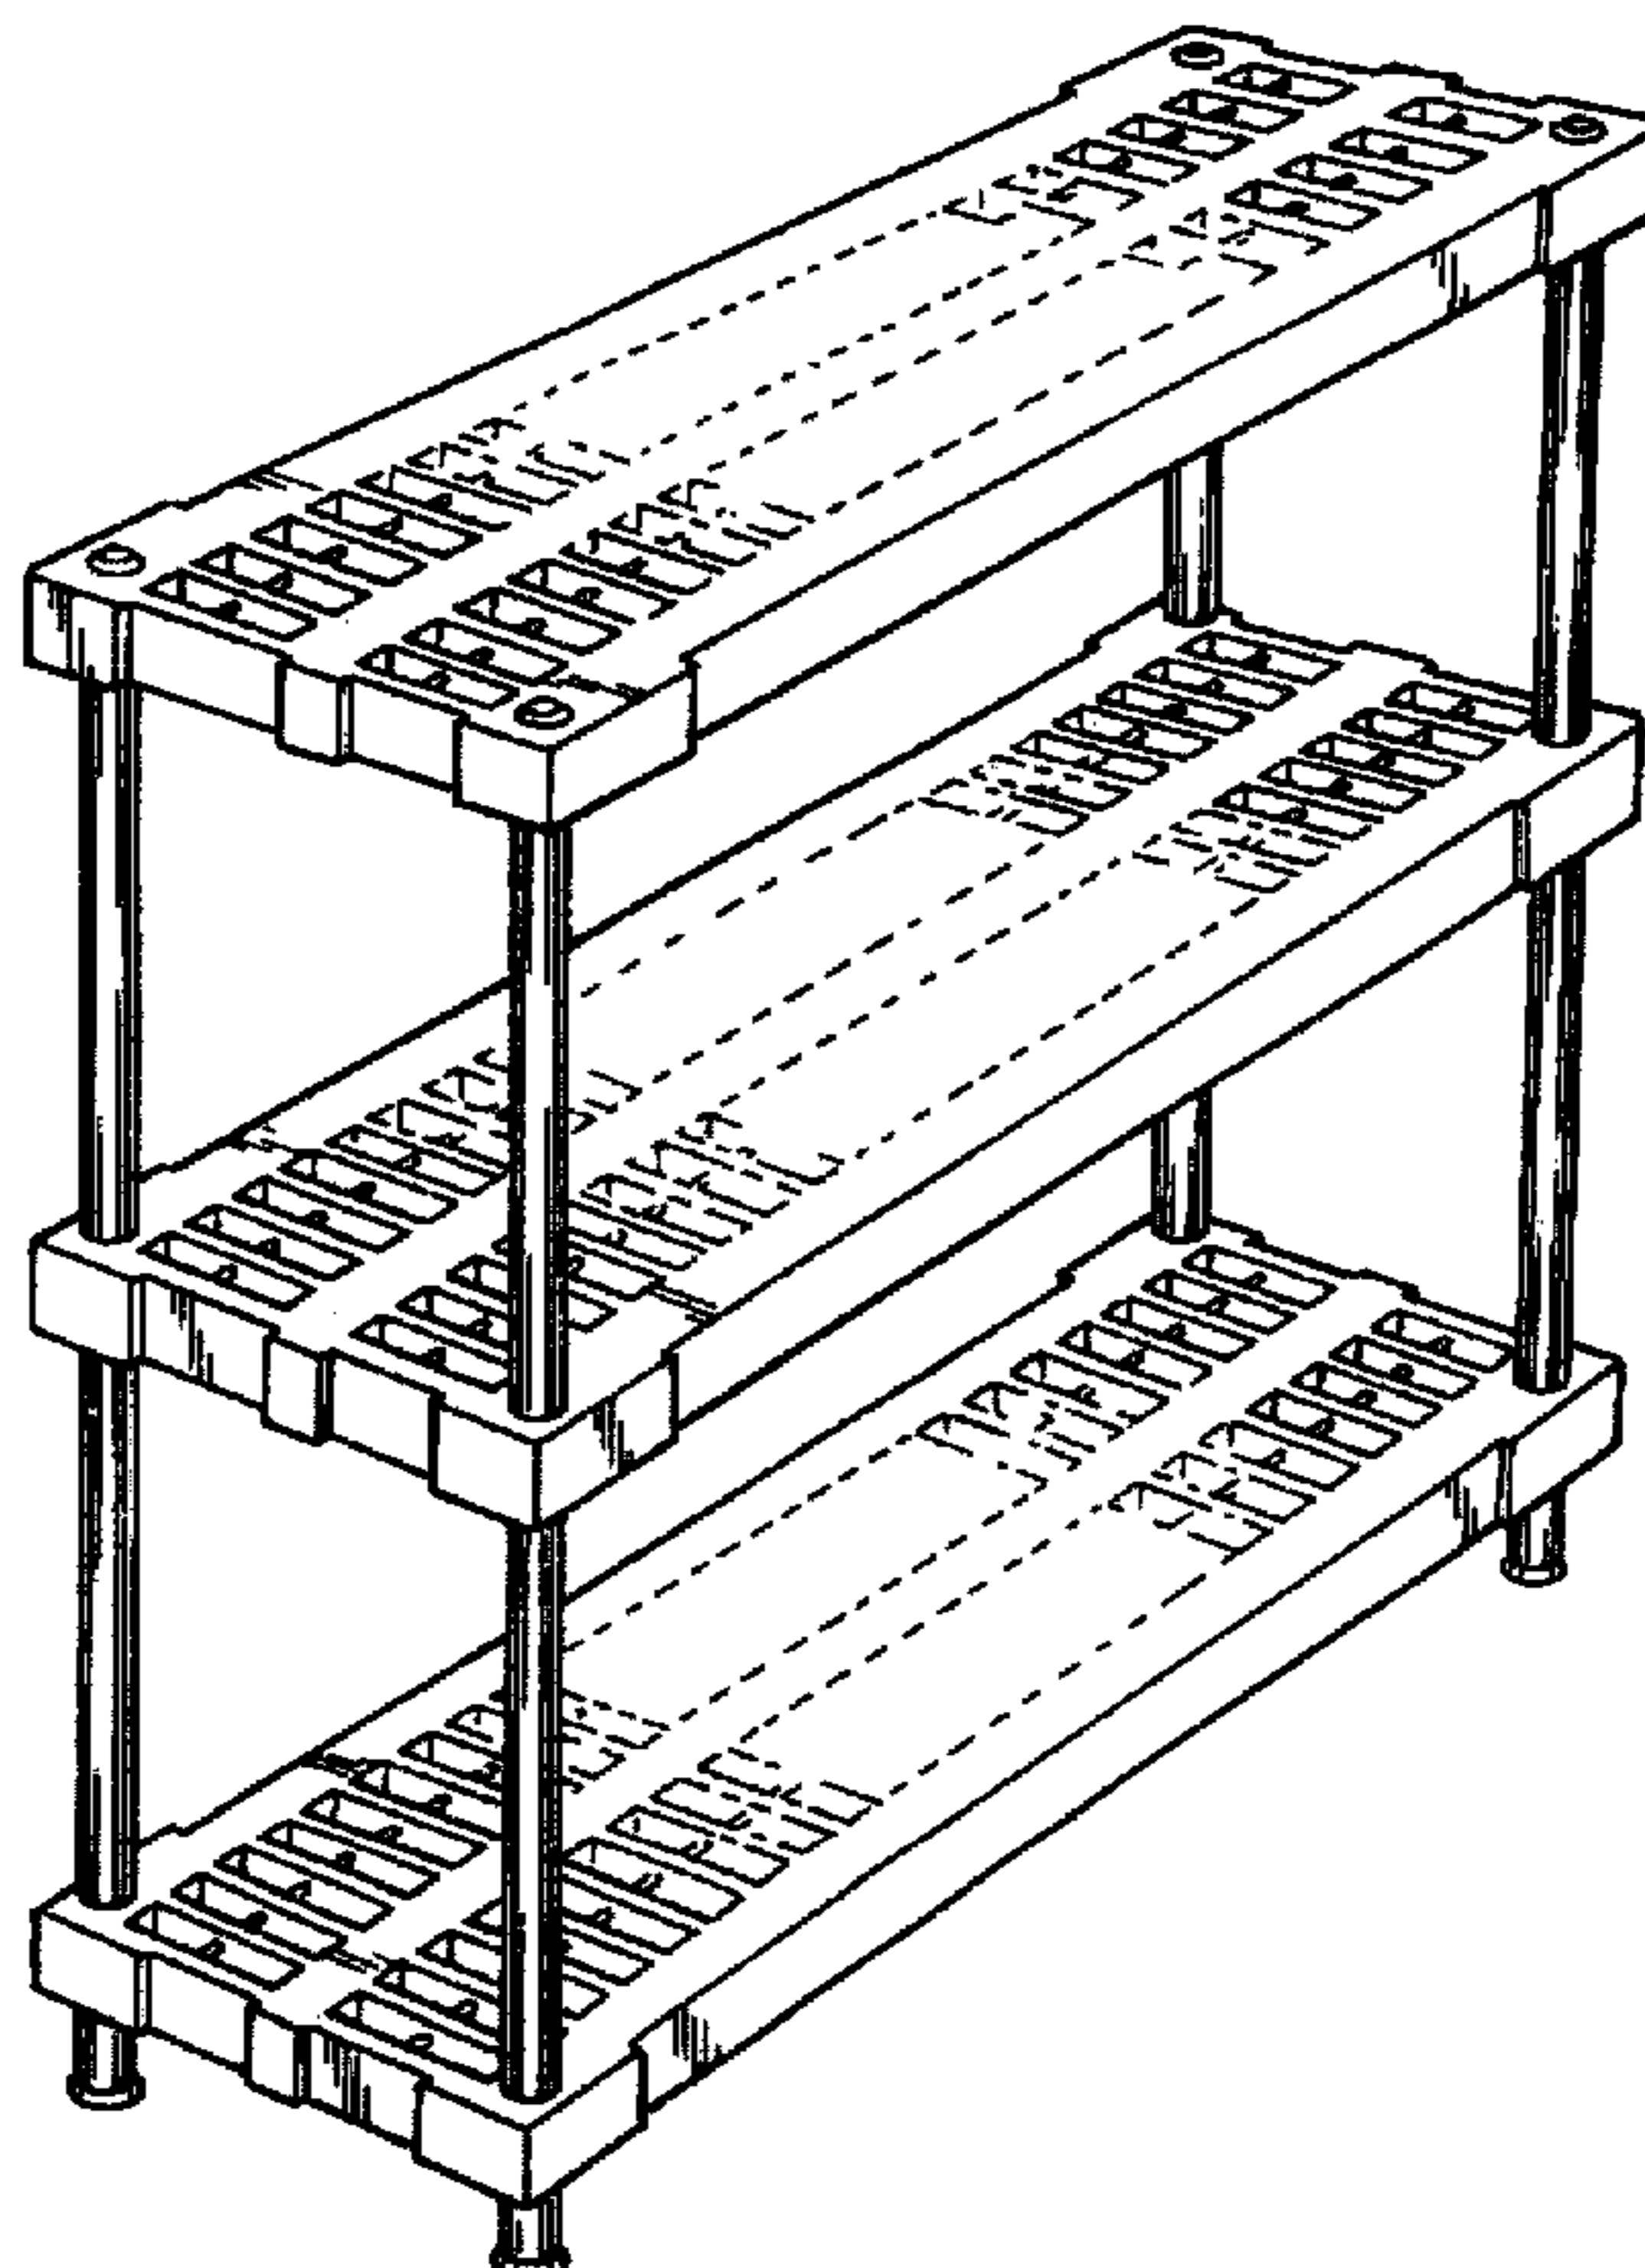

FIG. 5 is an enlarged fragmentary bottom plan view of one end thereof;

FIG. 6 is a cross-sectional view taken along 6—6 shown in FIG. 2 and FIG. 3; and,

FIG. 7 is a side elevational view of a second embodiment of my new design on a greatly reduced scale; it being understood that the sole difference is the addition of a fourth shelf and that the broken line showing of a fifth shelf is for illustrative purposes only and forms no part of the claimed design.

The dashed lines shown in FIGS. 1 and 2 indicate that the pattern of openings is repeated uniformly throughout the length of the stand shelves.
