[57] CLAIM

The ornamental design for an electronic information display device, as shown and described.

DESCRIPTION

FIG. 1 is a perspective view of a first embodiment of the electronic information display device showing the front side of the display device with the front cover in place;

FIG. 2 is a perspective view of the first embodiment of the display device showing the front side of the display device with the front cover partially opened;

FIG. 3 is a perspective view of the first embodiment of the display device showing the back side of the display device with the front and rear covers in place;

FIG. 4 is a perspective view of the first embodiment of the display device showing the back side of the display device with the front cover in place and the rear cover partially opened;

FIG. 5 is a perspective view of a second embodiment of the display device showing the front side of the display device with the front cover in place;

FIG. 6 is a perspective view of the second embodiment of the display device showing the front side of the display device with the front cover partially opened;

FIG. 7 is a perspective view of the second embodiment of the display device showing the back side of the display device with the front and rear covers in place;

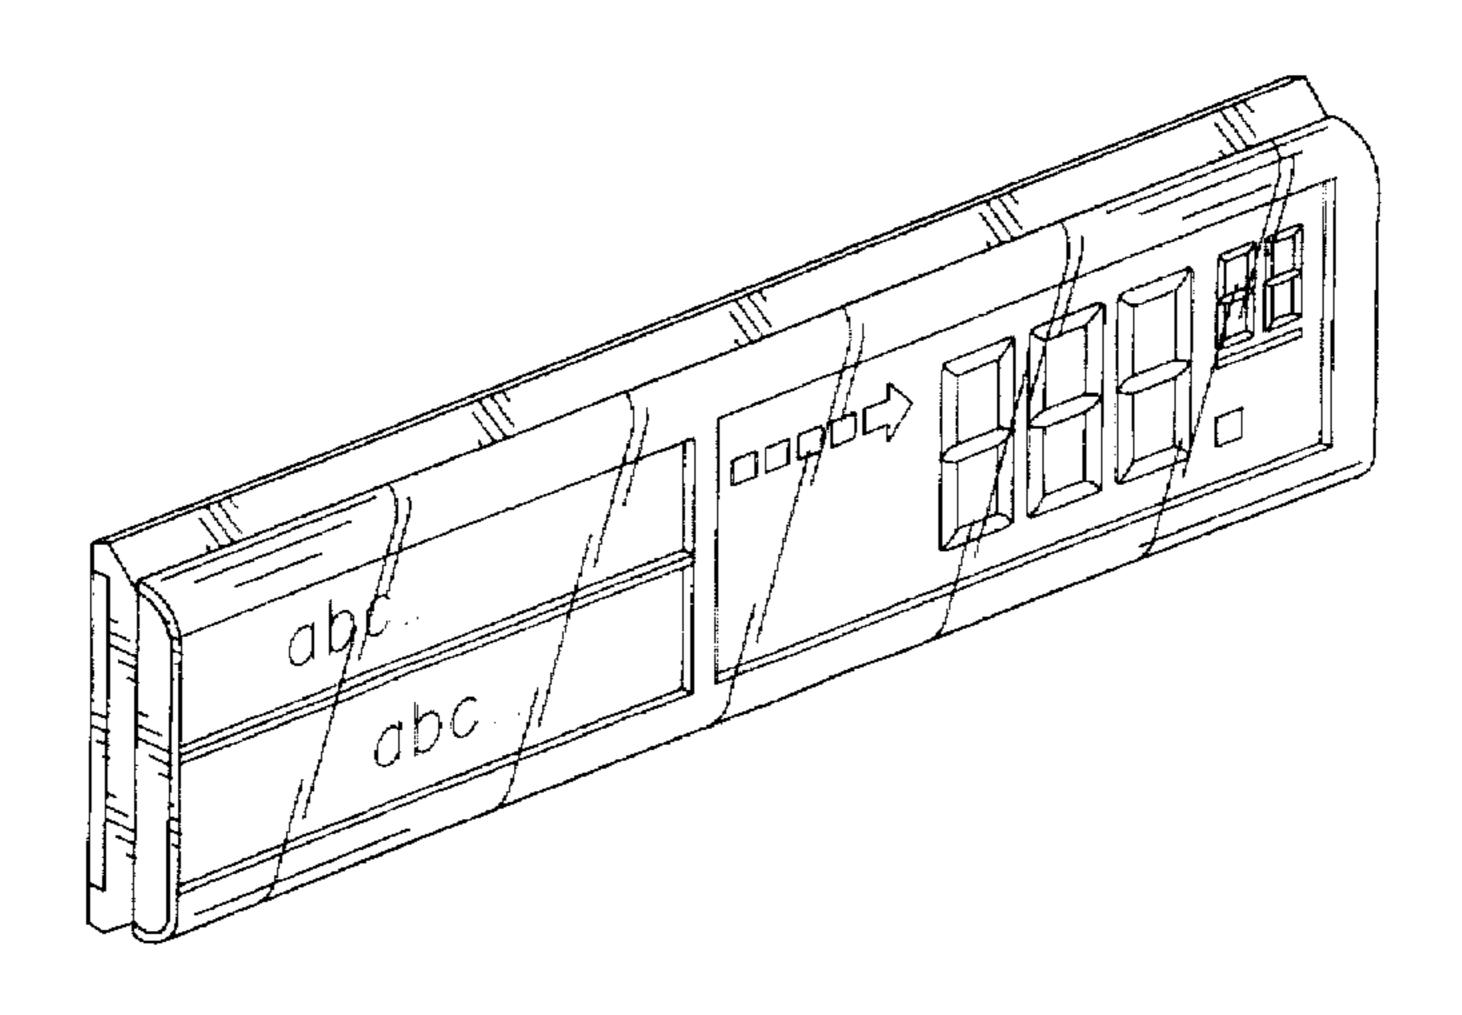

FIG. 8 is a perspective view of the second embodiment of the display device showing the back side of the display device with the front cover in place and the rear cover partially opened;

FIG. 9 is a perspective view of a third embodiment of the display device showing the front side of the display device with the front cover in place;

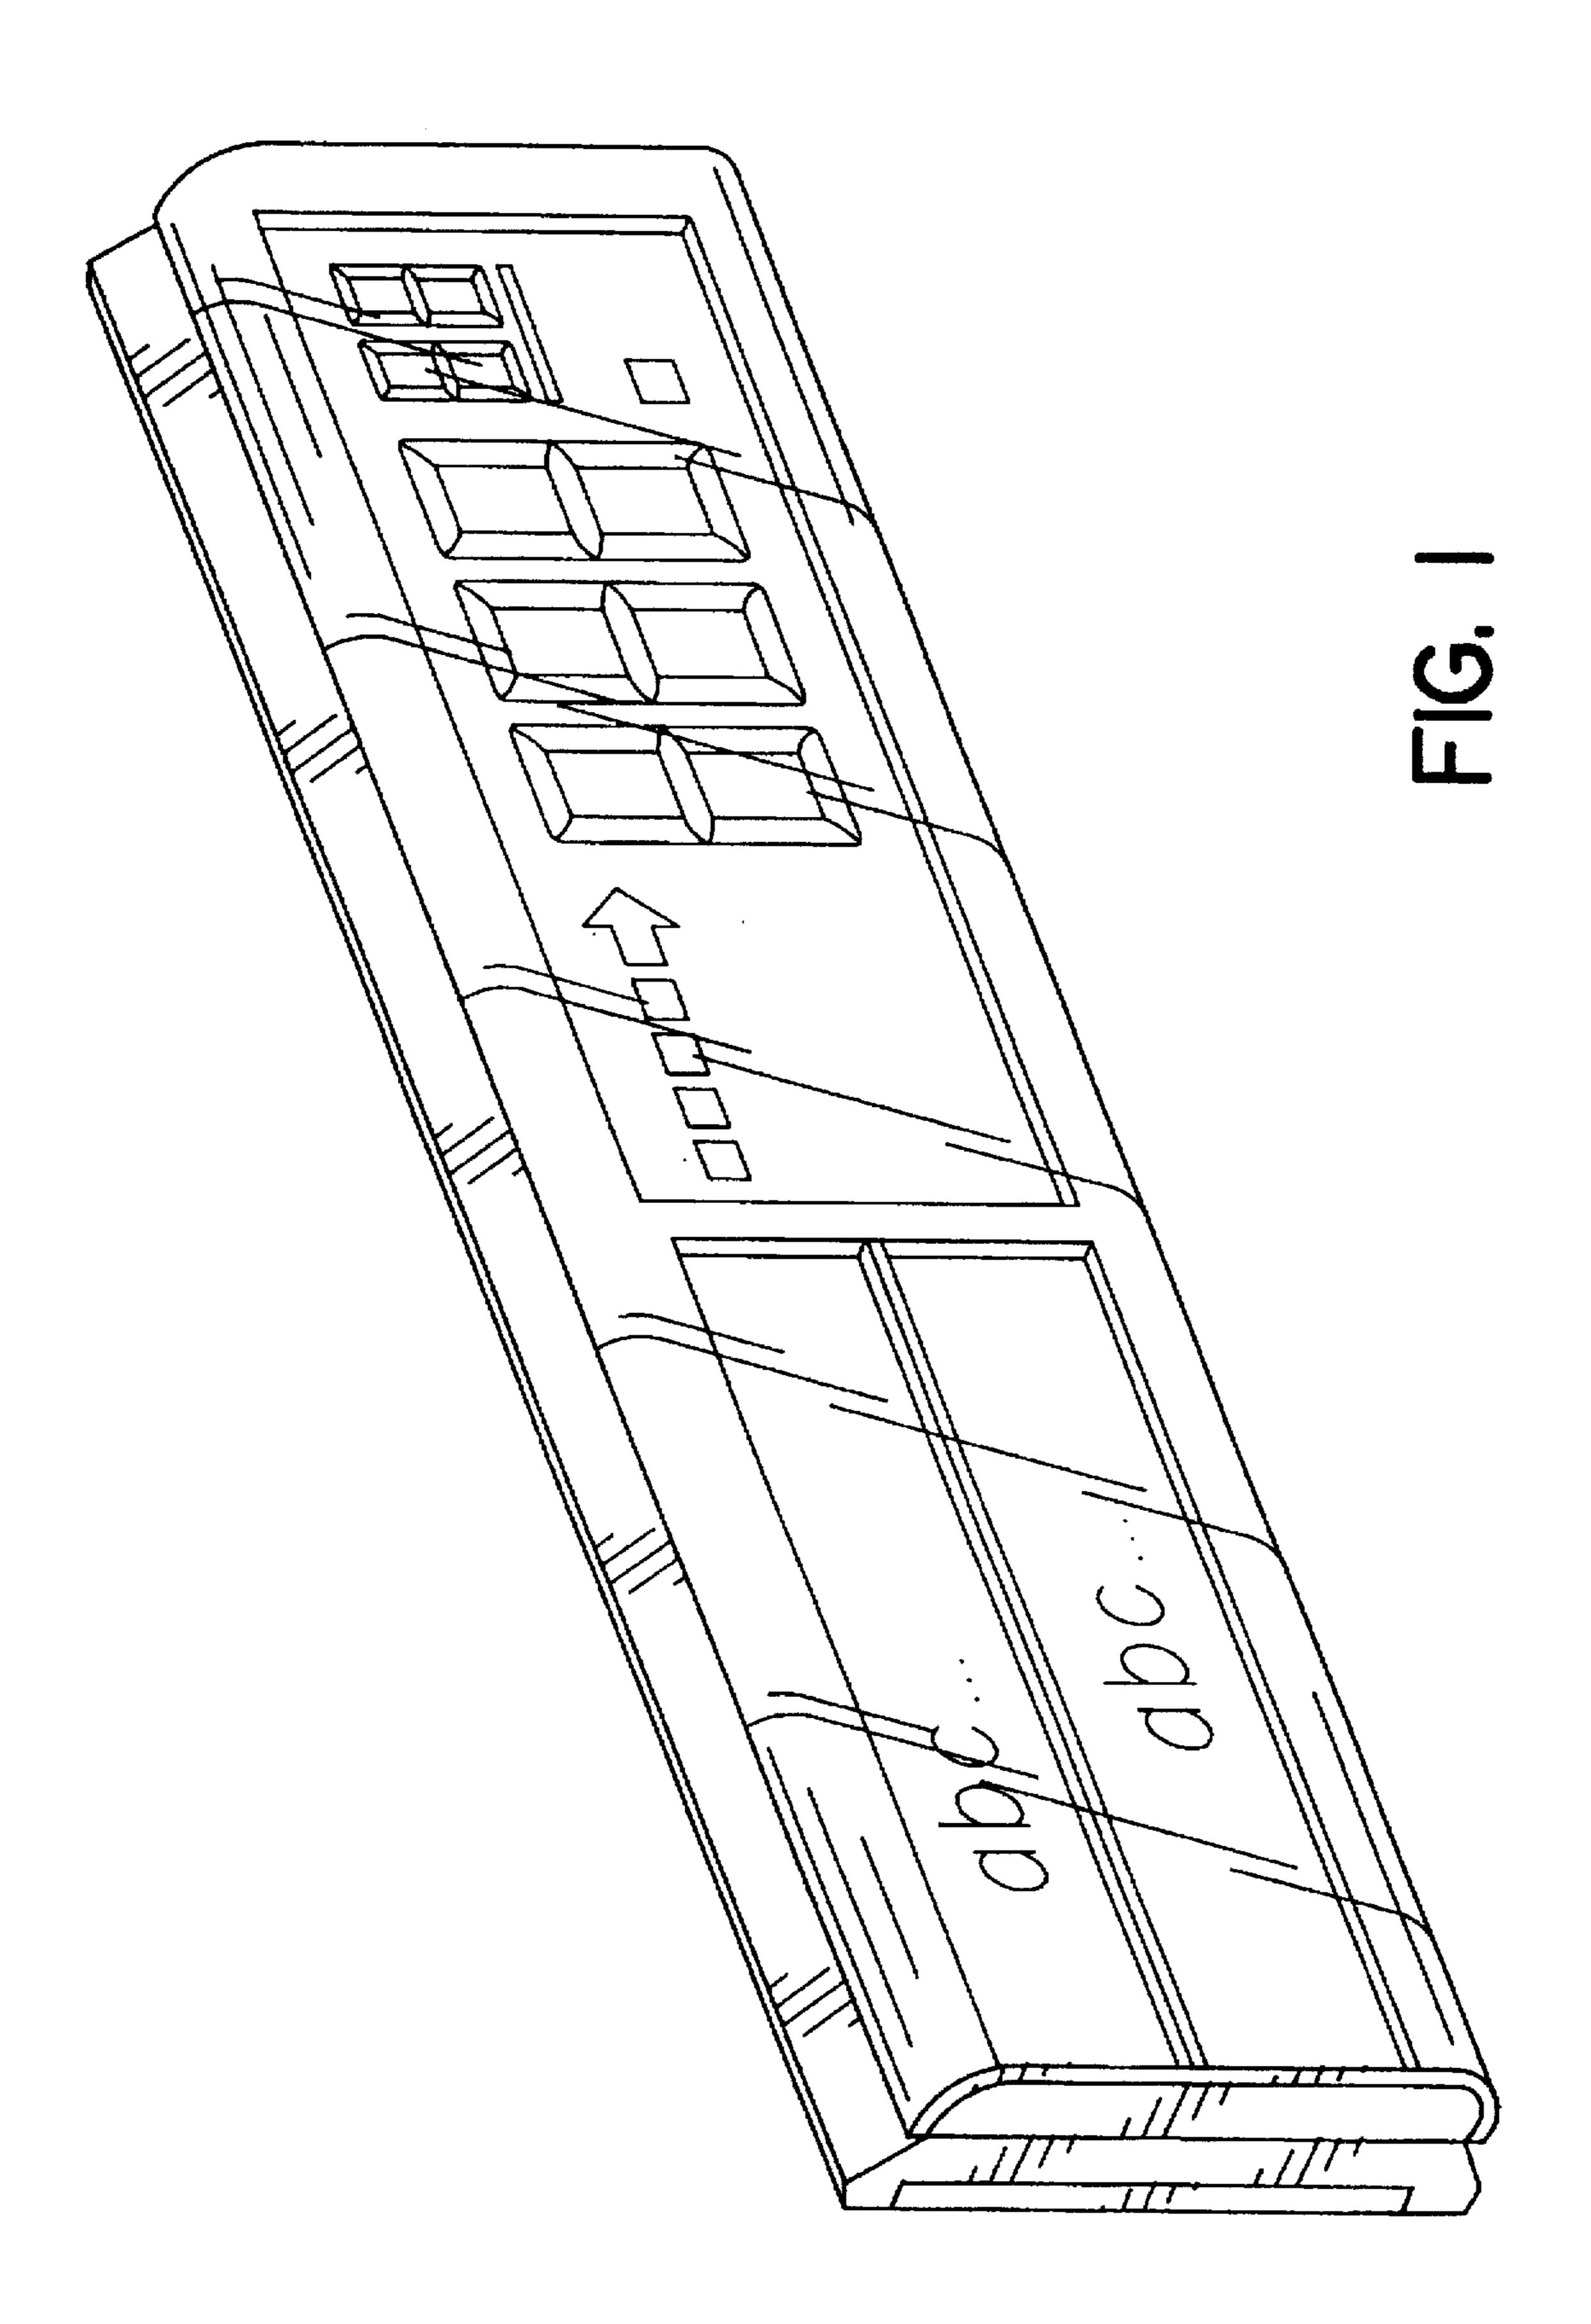

FIG. 10 is a perspective view of the third embodiment of the display device showing the front side of the display device with the front cover partially opened;

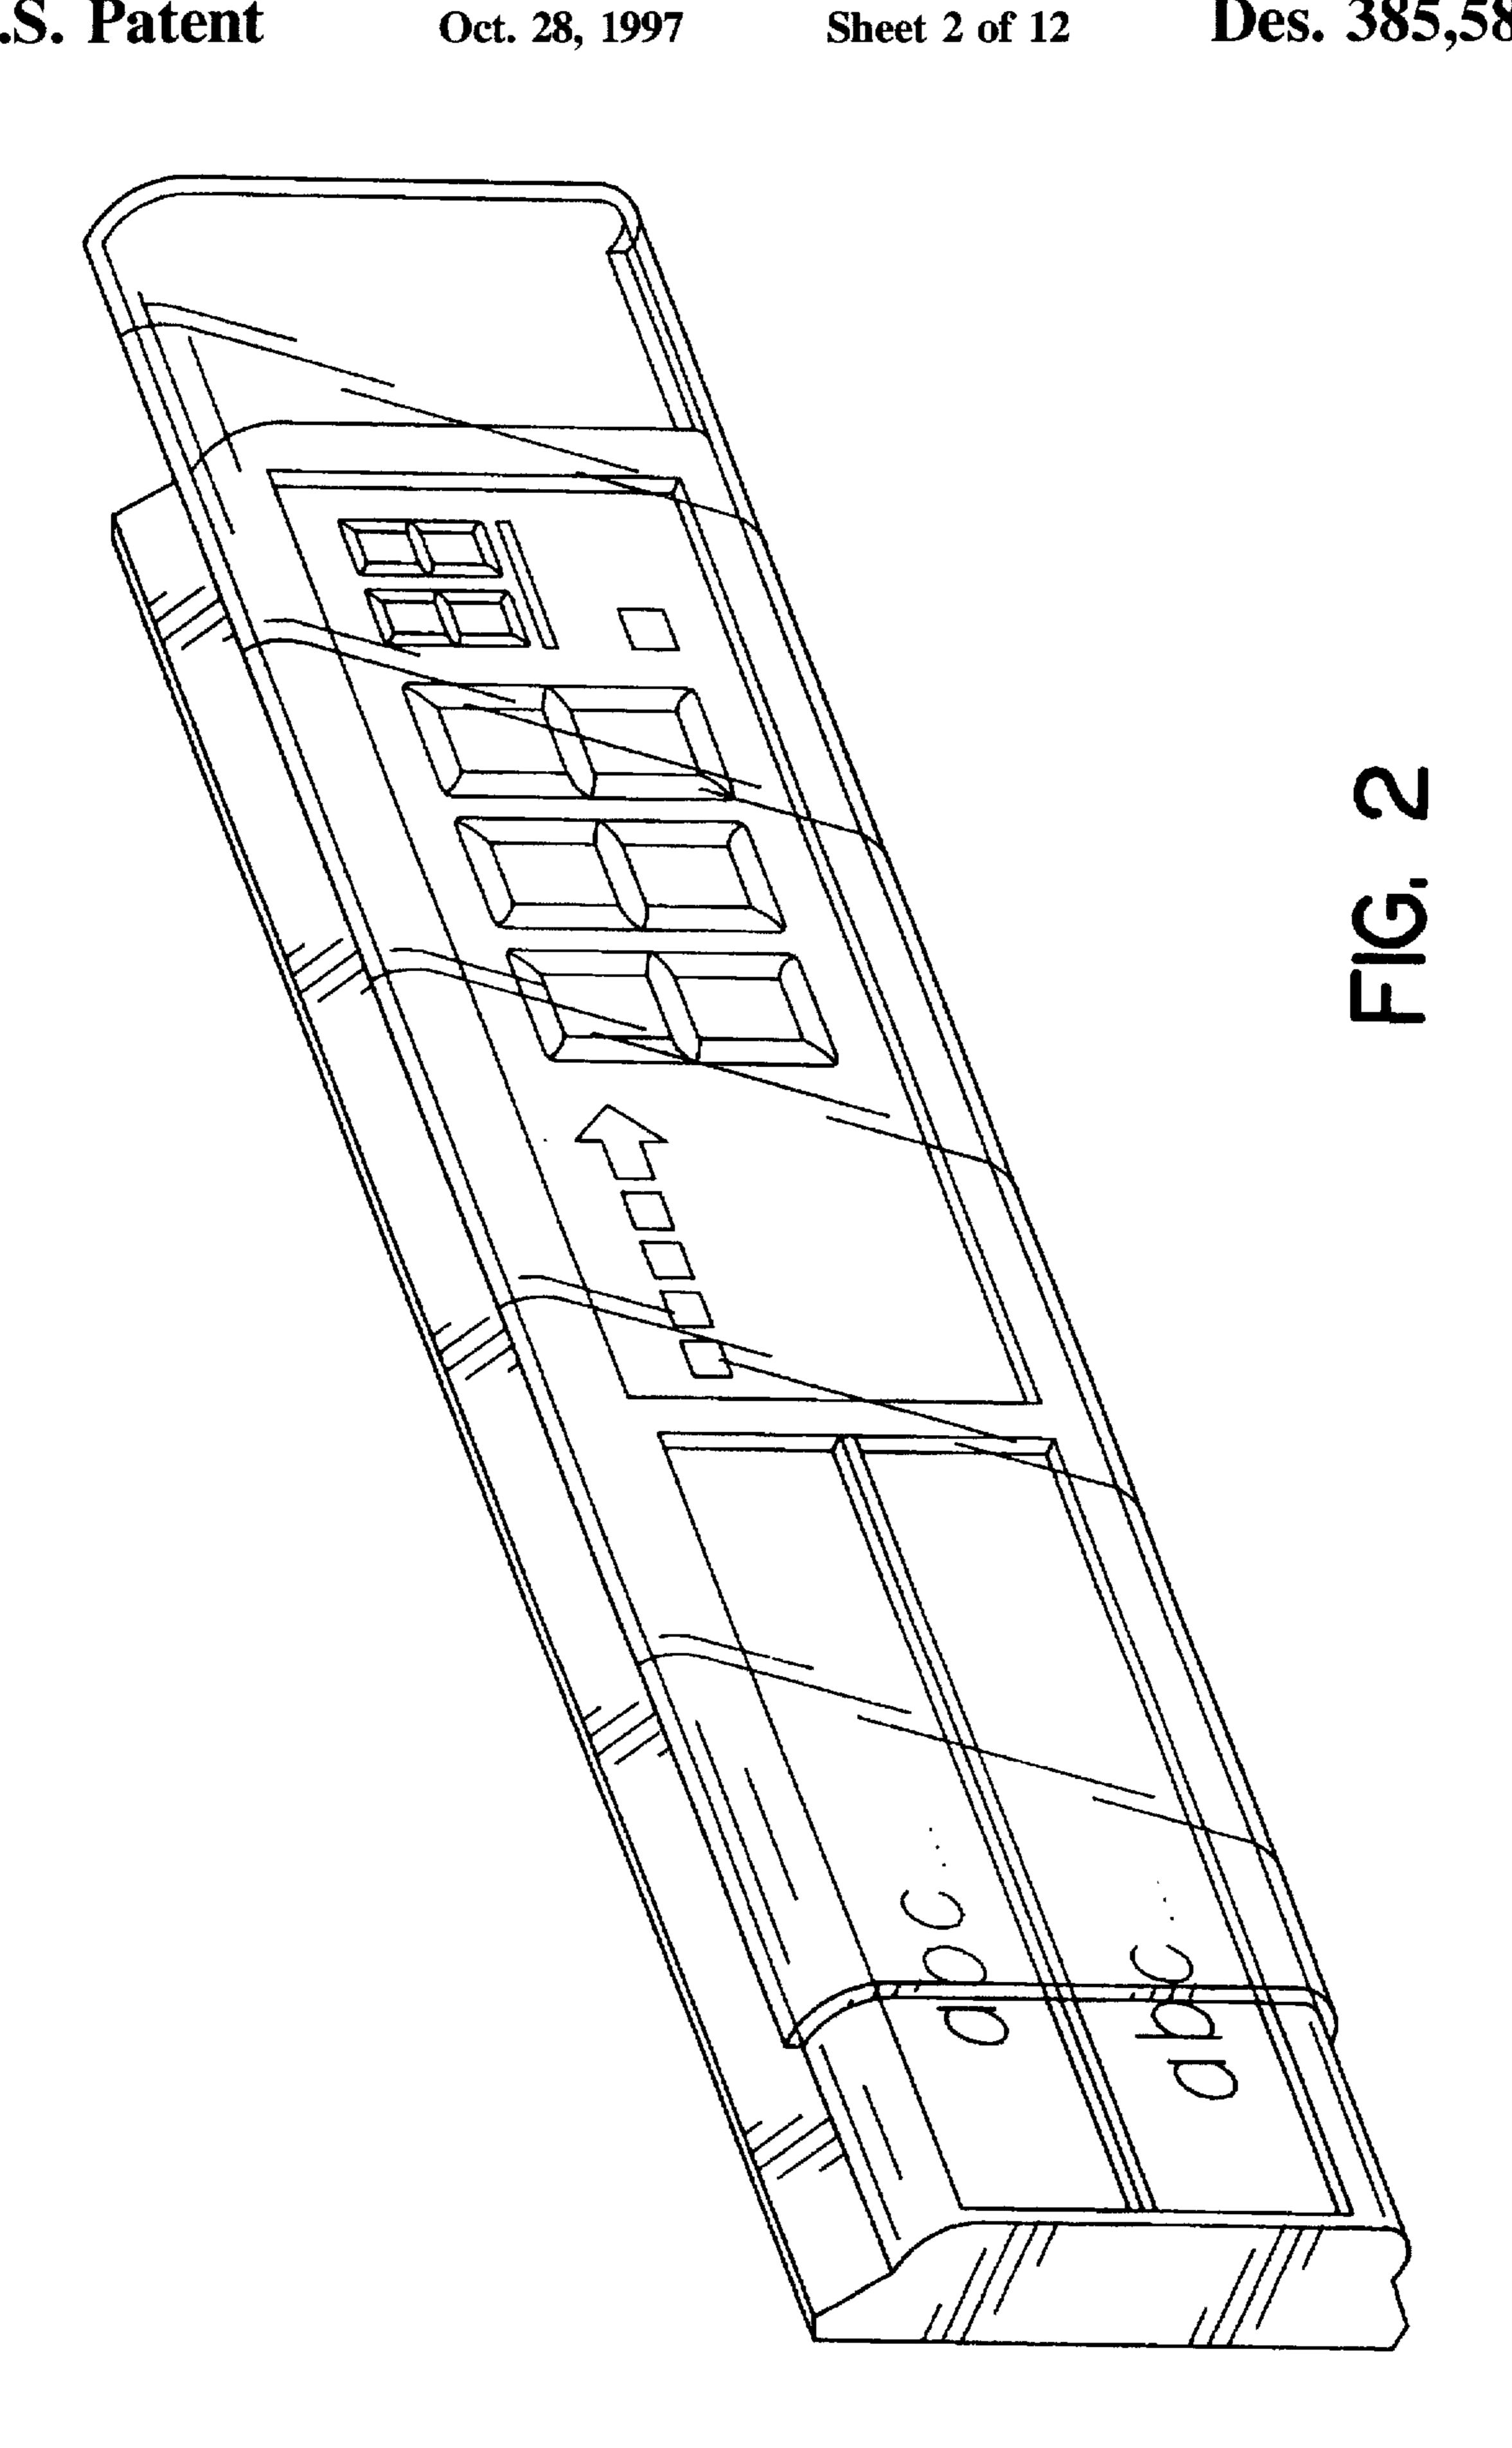

FIG. 11 is a perspective view of the third embodiment of the display device showing the back side of the display device with the front and rear covers in place; and,

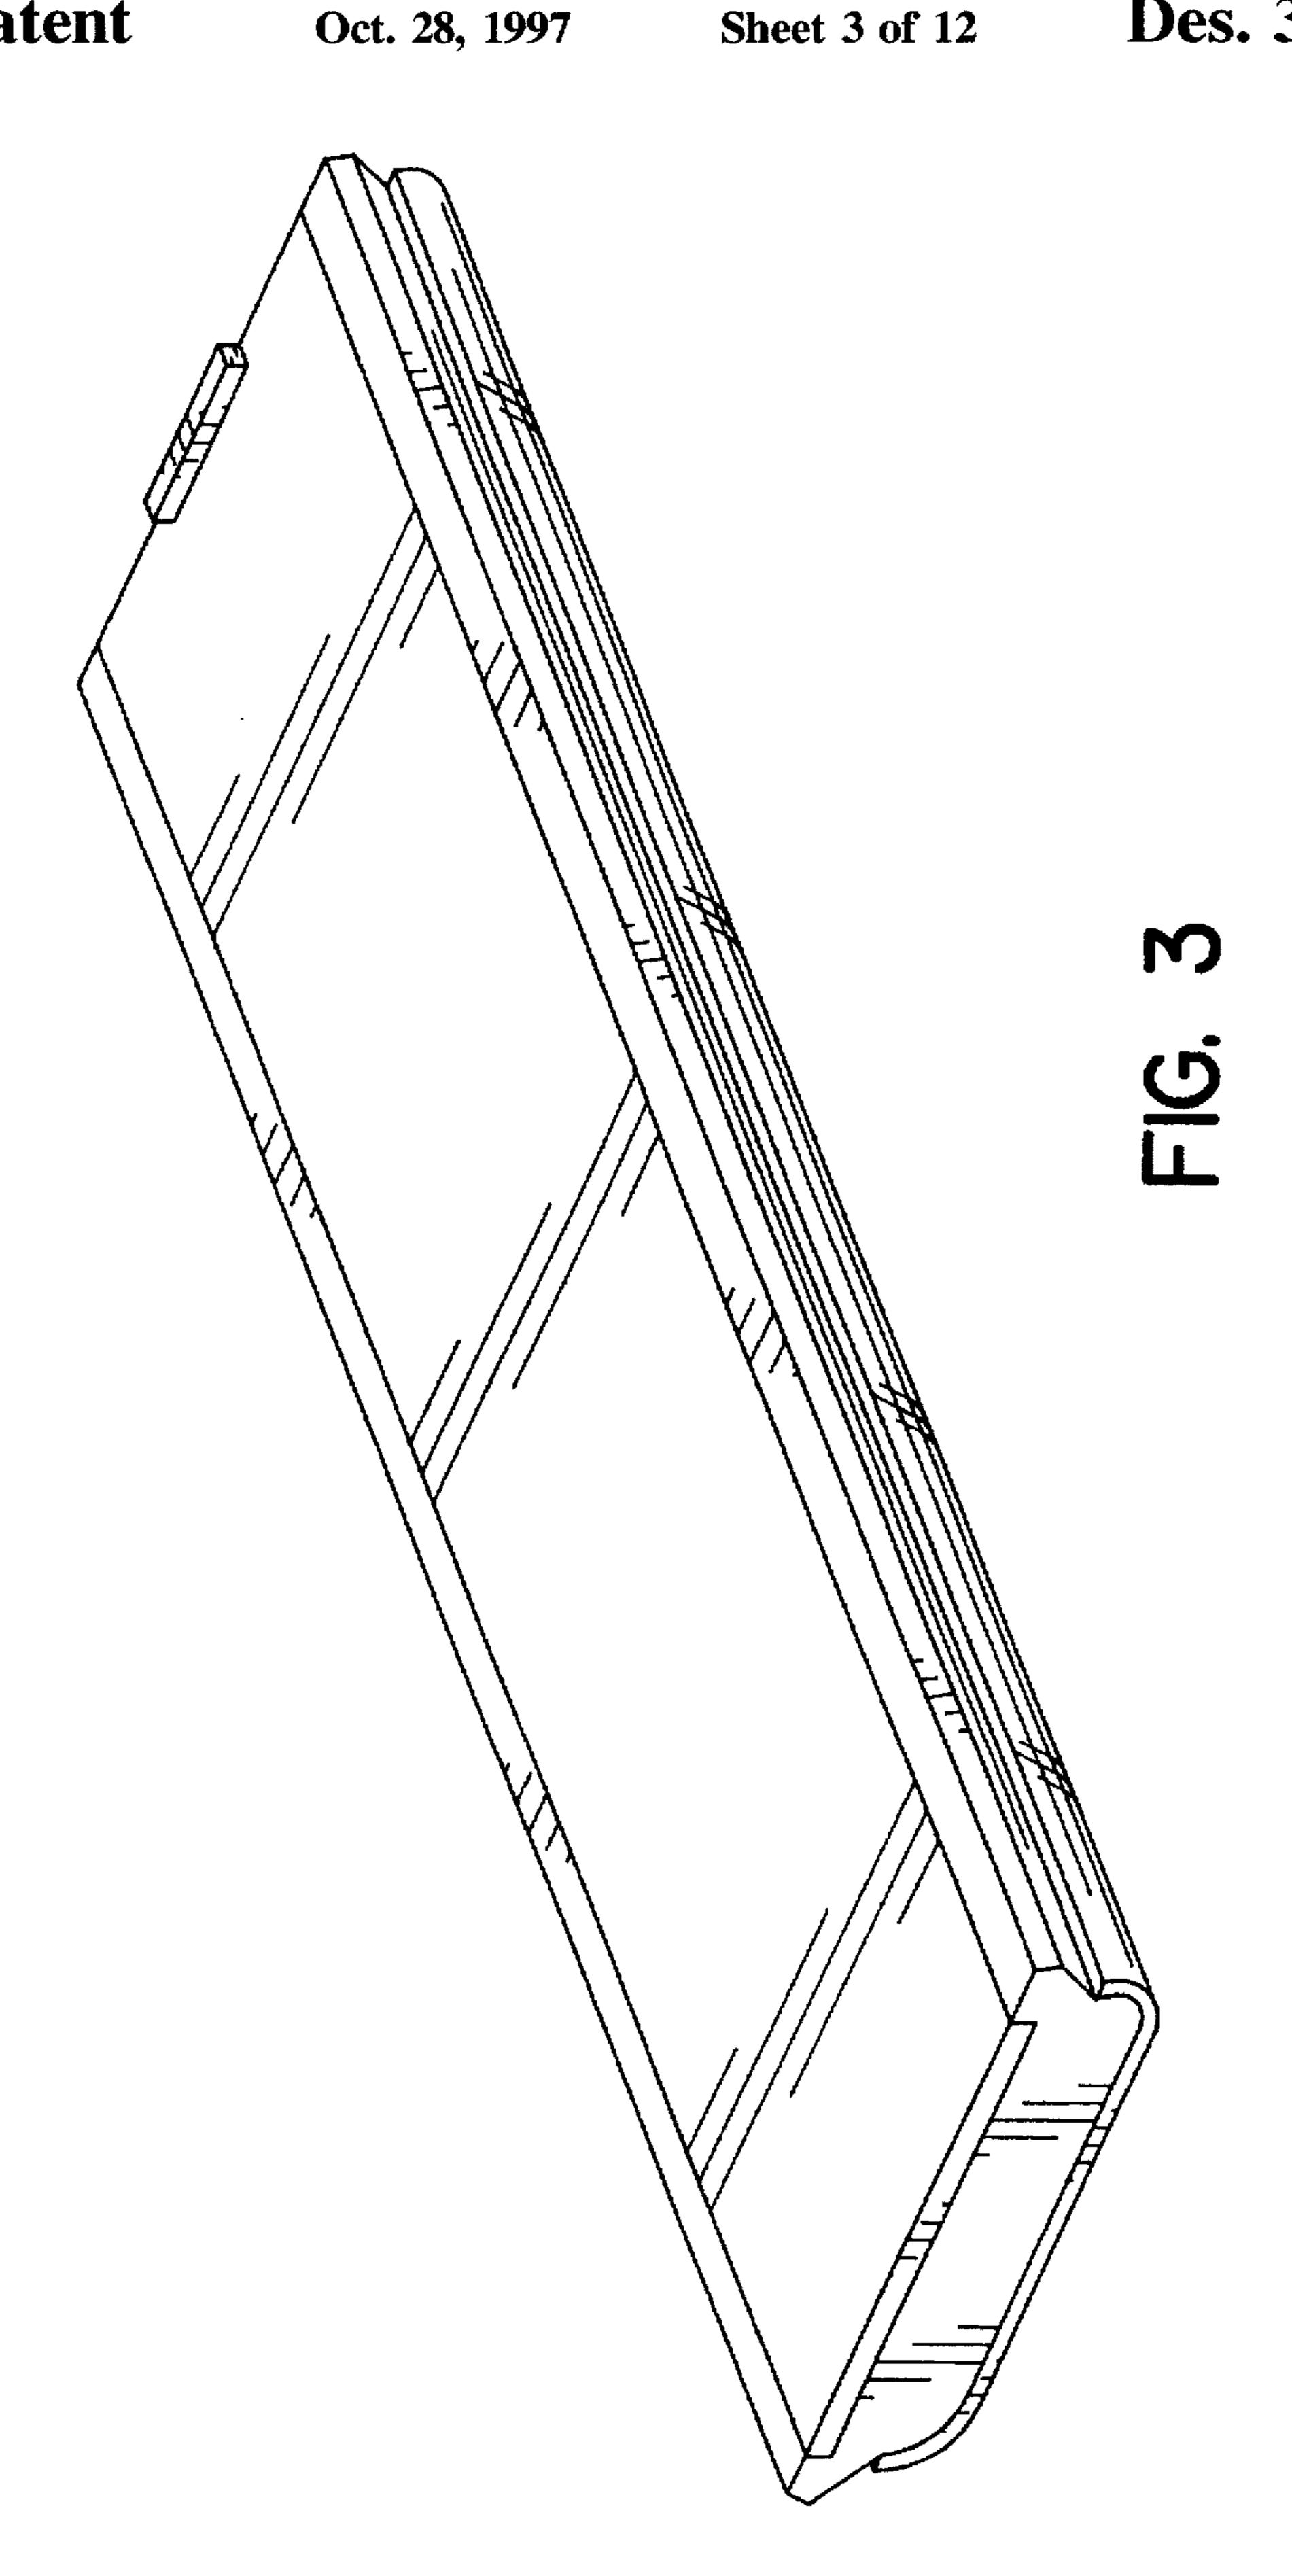

FIG. 12 is a perspective view of the third embodiment of the display device showing the back side of the display device with the front cover in place and the rear cover partially opened.
