[57] CLAIM

The ornamental design for a motorized light owl repeller, as shown and described.

DESCRIPTION

FIG. 1 is a perspective view of a motorized light owl repeller, showing my new design;

FIG. 2 is a top plan view thereof;

FIG. 3 is a front elevational view thereof;

FIG. 4 is a right side elevational view, the left side being a mirror image thereof;

FIG. 5 is a rear elevational view thereof; and,

FIG. 6 is a bottom plan view thereof.

The motorized light owl repeller is placed on the swim platform of a boat. It's purpose is to discourage ducks from leaving waste on the boat's swim platform. Owls are used because ducks are innately afraid of owls.
