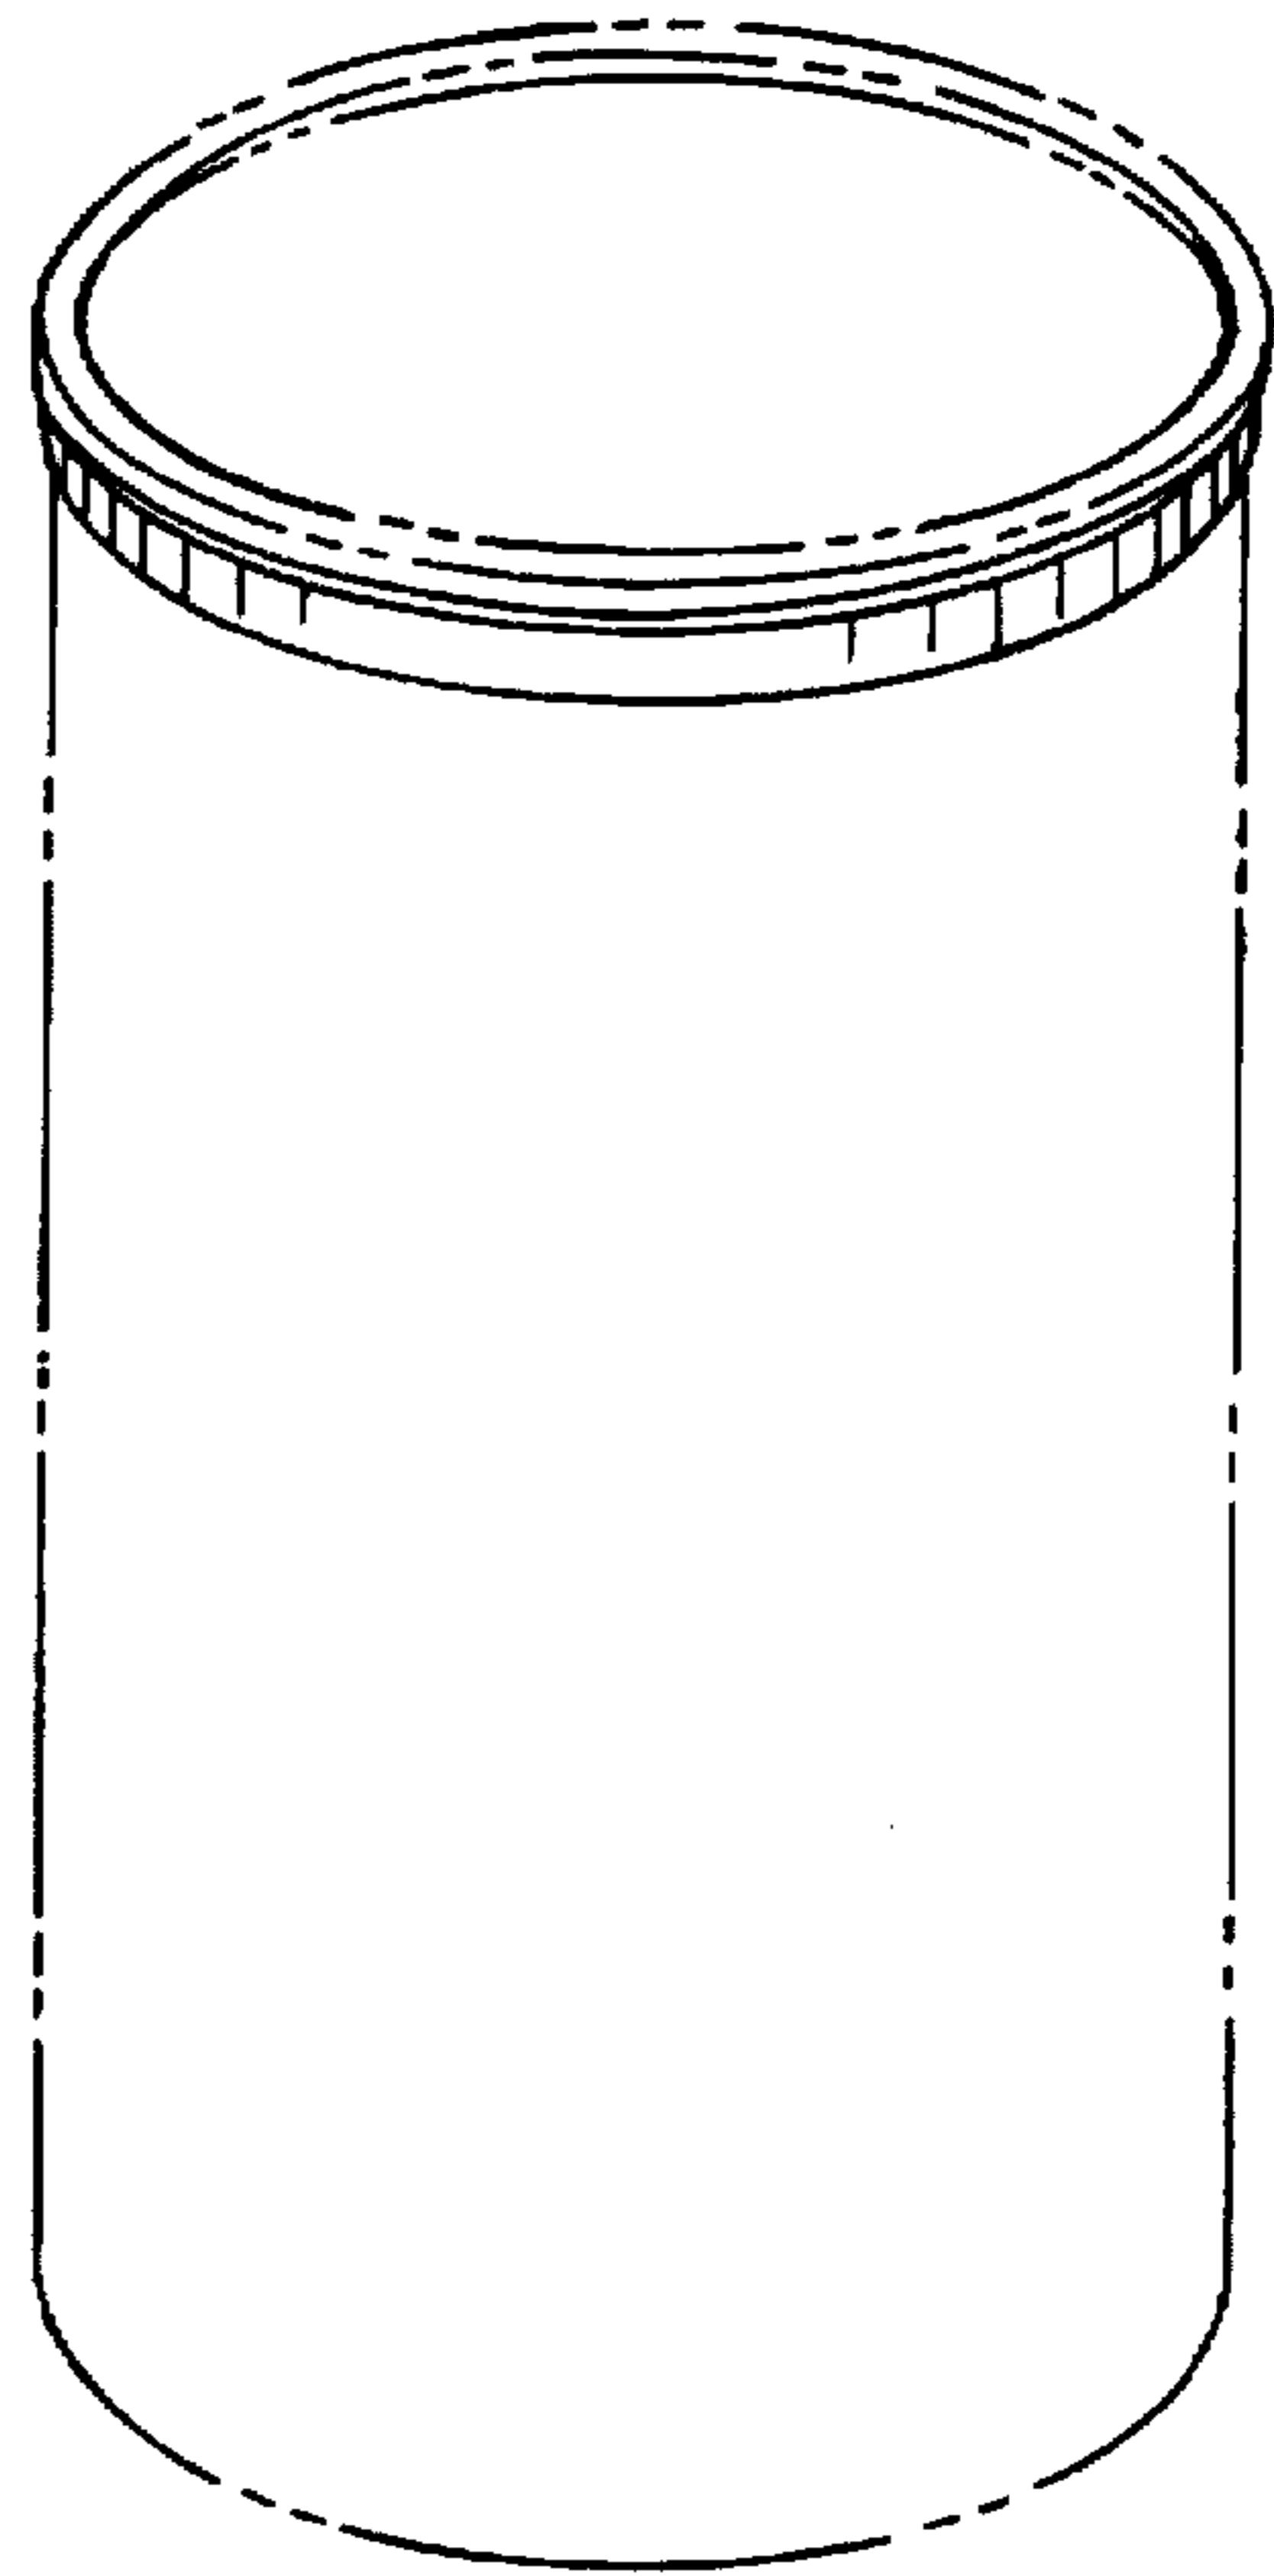

FIG. 1 is a front perspective view of a container closure strip showing the new design in its operative configuration mounted on a container;
 FIG. 2 is a rear perspective view of the container closure strip in its operative configuration as seen in FIG. 1;
 FIG. 3 is a front elevation view of the container closure strip of FIGS. 1 and 2 in a flat configuration, and shown at an enlarged scale, the rear elevation being a mirror image thereof; and,
 FIG. 4 is a side elevation view of the container closure strip of FIGS. 1 and 2 in a flat configuration, and shown at an enlarged scale, the opposite side elevation being substantially a mirror image thereof.
 The broken line showing of a container upon which the container closure strip of the present invention is mounted, in each of FIGS. 1 and 2, is for illustrative purposes only and forms no part of the claimed design.
