[57] **CLAIM**

The ornamental design for a tent structure, as shown and described.

DESCRIPTION

FIG. 1 is an environmental perspective view of a first embodiment of a tent structure showing my new design; FIG. 2 is a front elevational view thereof; FIG. 3 is a right side elevational view with the left side being a mirror image thereof; FIG. 4 is a top view thereof; FIG. 5 is a rear elevational view thereof; and, FIG. 6 is a perspective view of a second embodiment of a tent structure having only one component. The broken line showing of the additional frame structures in FIGS. 1, 3, and 4 is for illustrative purposes only, merely disclosing that additional structures can be attached, and forms no part of the claimed design. The front view is identical for the two embodiments, the only difference being the attachment pieces at the end of the modular structure. The rear view of the tent of the second embodiment is a mirror image of the front view.
