[57] CLAIM

The ornamental design for a hybrid photographic camera, as shown and described.

DESCRIPTION

FIG. 1 shows a front perspective view of the front, top and right end of our design before the hybrid photographic camera has been configured for operation;

FIG. 2 shows a bottom perspective view of the back, bottom and left end of our design;

FIG. 3 shows a front elevation view of our design;

FIG. 4 shows a rear elevation view of our design;

FIG. 5 shows a top plan view of our design;

FIG. 6 shows a bottom plan view of our design;

FIG. 7 shows an elevation view of the right end of our design;

FIG. 8 shows an elevation view of the left end of our design;

FIG. 9 shows a front perspective view of the front, top and right end of our design after the hybrid photographic camera has been configured for operation;

FIG. 10 shows a front elevation view of our design configured for operation;

FIG. 11 shows a rear elevation view of our design configured for operation;

FIG. 12 shows a top plan view of our design configured for operation;

FIG. 13 shows a bottom plan view of our design configured for operation;

FIG. 14 shows an elevation view of the right end of our design configured for operation; and,

FIG. 15 shows an elevation view of the left end of our design configured for operation.

A description of the ornamental appearance of the article is as follows: Our design reconfigures from the ornamental appearance of FIGS. 1 to FIGS. 8 to the ornamental appearance of FIGS. 9 to 15 when a lens cover on the front of the camera and a display panel on the top of the camera are raised.
