[57] CLAIM

The ornamental design for an exterior surface configuration
of a motor vehicle rear light assembly, as shown and
described.

DESCRIPTION

FIG. 1 is a rear view of an exterior surface configuration of
a motor vehicle rear light assembly according to my/our
novel design;

FIG. 2 is a perspective view from the rear right side of the
exterior surface configuration of a motor vehicle rear light
assembly; and,

FIG. 3 is a side view of the exterior surface configuration of
a motor vehicle rear light assembly.

The broken lines which appear in FIGS. 1, 2 and 3 are
showing for illustrative purposes only and form no part of
the claimed design.

Features shown in dash lines depict the environment and do
not form part of the claimed design.

The drawings illustrate the exterior surface configuration of
a right side of a motor vehicle rear light assembly asym-
metrically arranged, a left side motor vehicle rear light
assembly being a further embodiment of the novel design
which is not illustrated since it is symmetrical to the one
illustrated.
