[57] **CLAIM**

The ornamental design for a tire tread, as shown and
described.

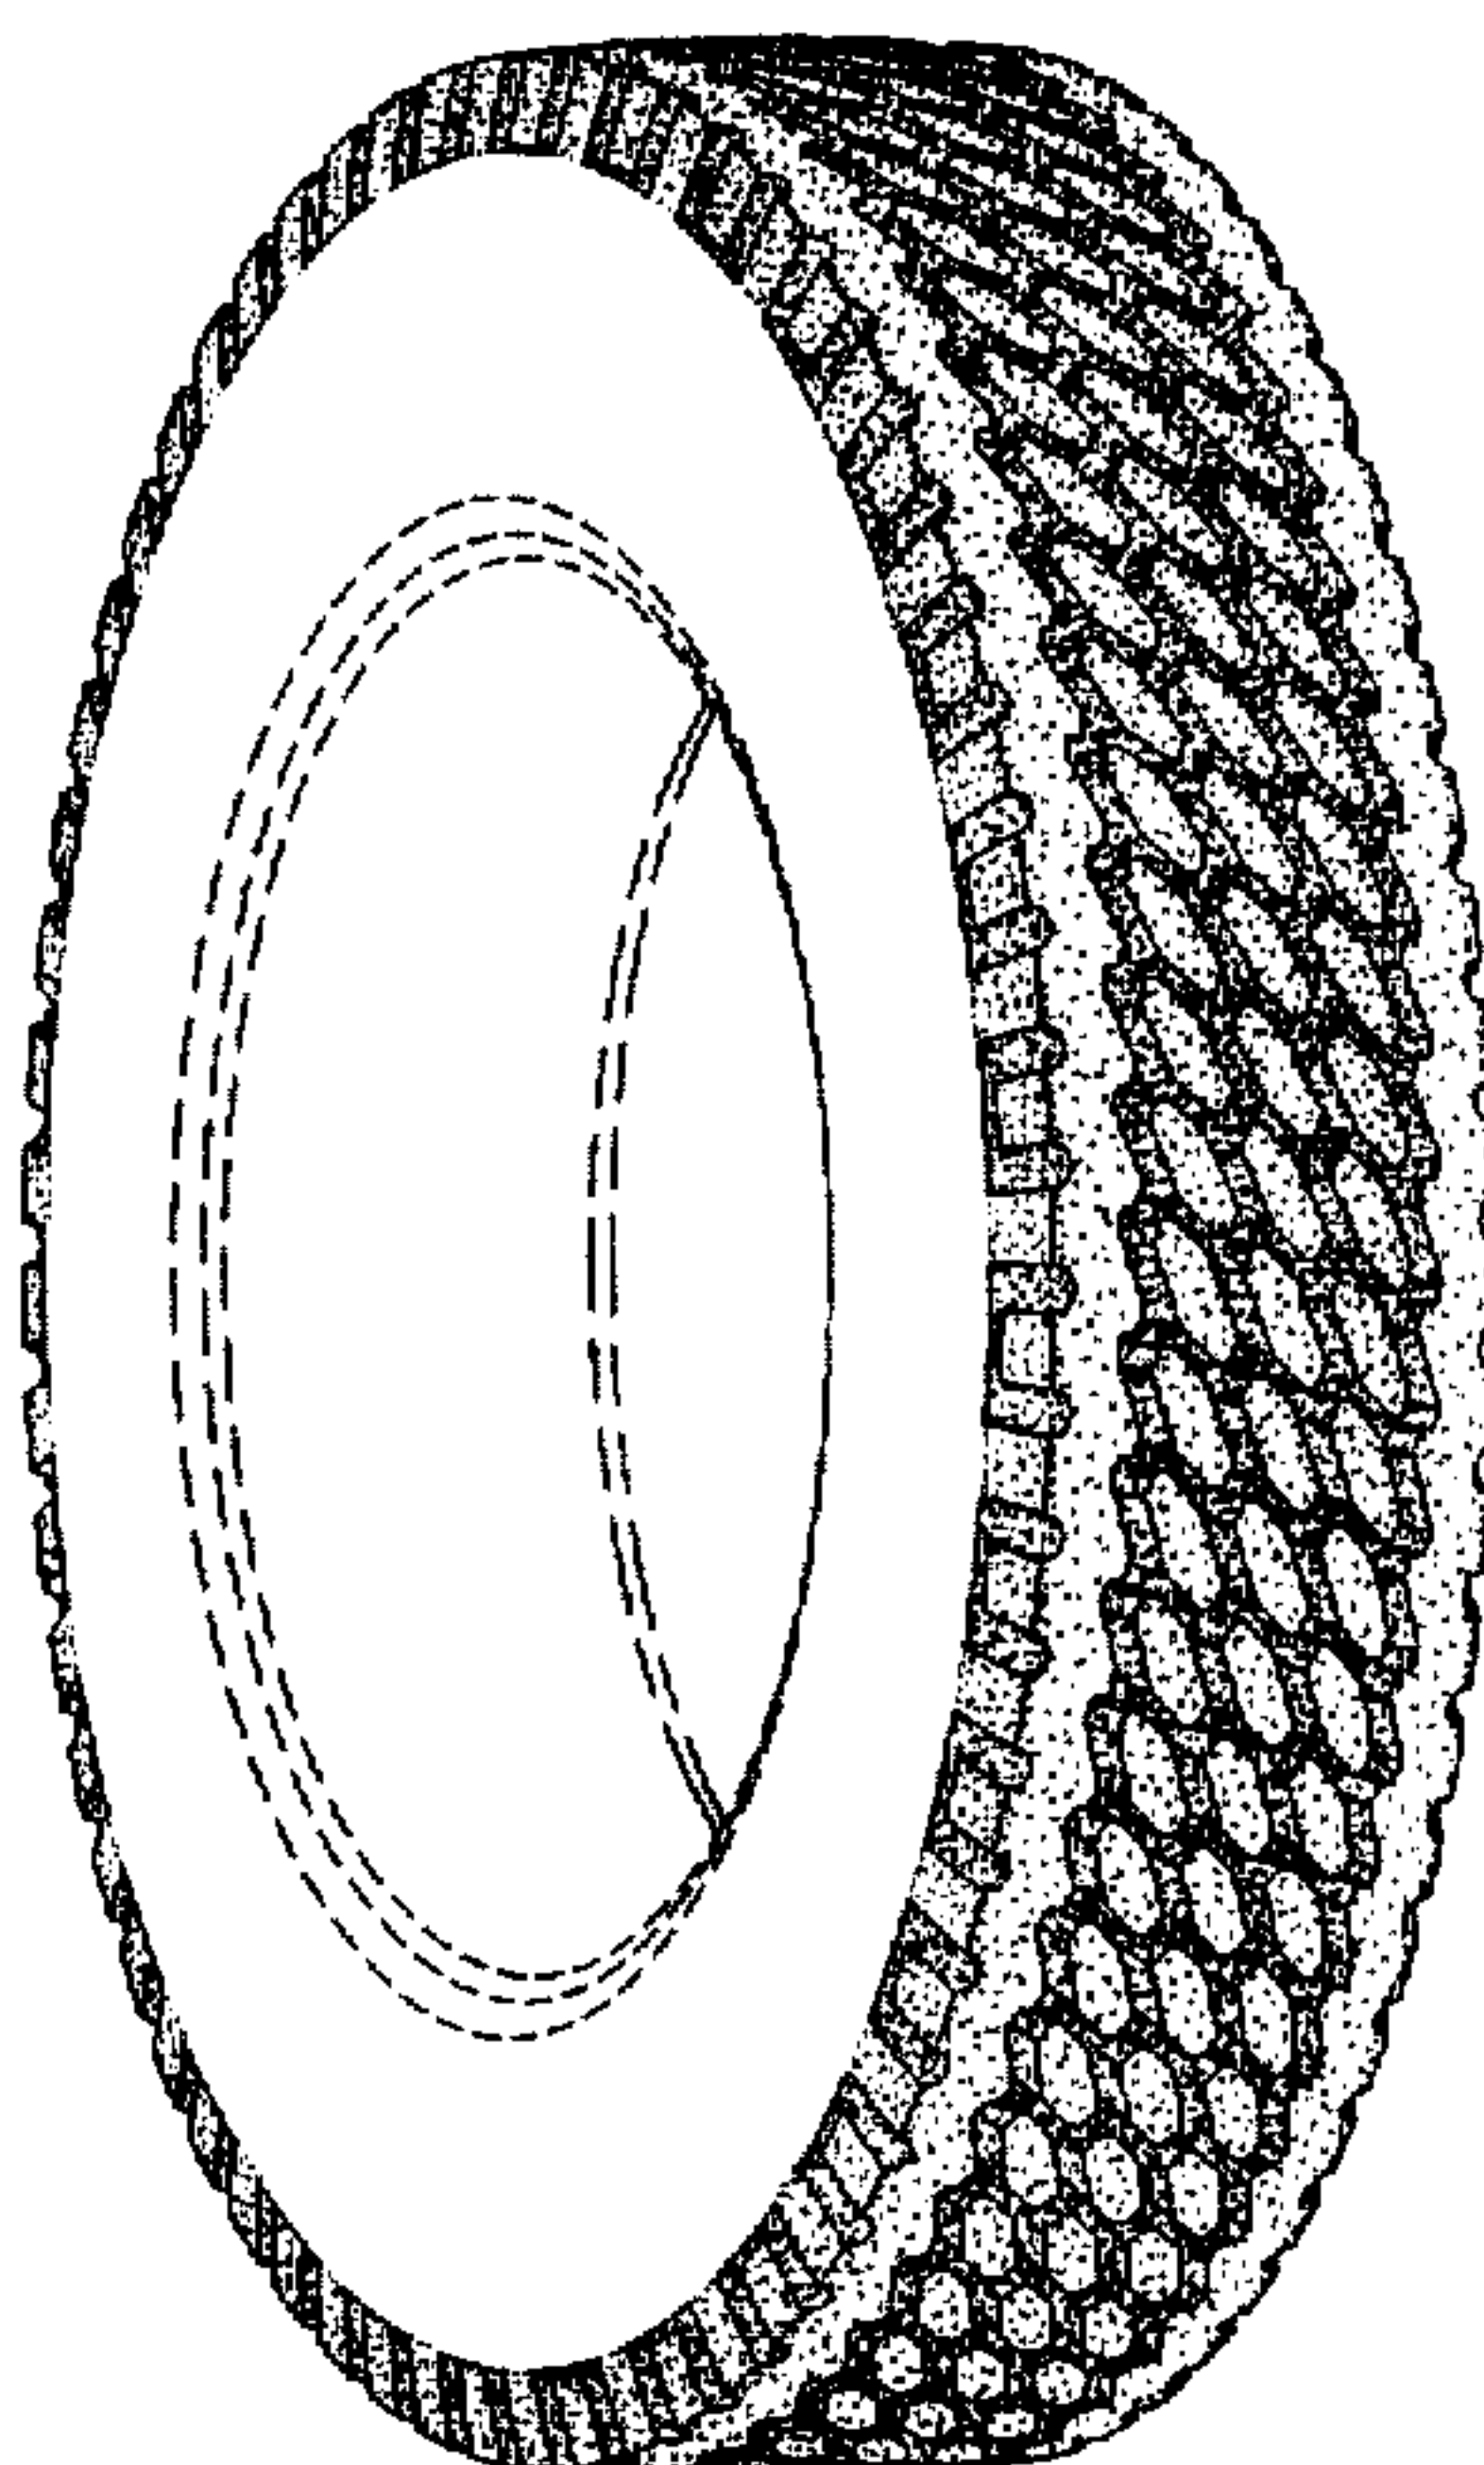

DESCRIPTION

FIG. 1 is a perspective view of a tire tread showing our new
design, it being understood that a tread pattern is repeated
uniformly throughout the outer circumference and shoulder
of a tire tread, the opposite side being the same as that
illustrated; and,

FIG. 2 is a enlarged fragmentary front elevation view of the
tread pattern of FIG. 1 showing our new design for the tire
tread.

The broken line showing of a tire inner bead and sidewall is
for illustrative purposes only and forms no part of the
claimed design.
