## [57] CLAIM

The ornamental design for a satellite telephone, as shown and described.

## DESCRIPTION

FIG. 1 is a front, left side, and bottom perspective view of the satellite telephone showing our new design with the flipper in an open, forward projecting position;

FIG. 2 is a left side, front perspective view thereof with the flipper in an open position projecting to the right side;

FIG. 3 is a back, right side, and top perspective view thereof with the flipper rotated 180° and in an open, rearward projecting position;

FIG. 4 is a front and top perspective view thereof with the flipper rotated 180° and in an open, upward projecting position;

FIG. 5 is a back, right side, and top perspective view thereof with the flipper in a closed position;

FIG. 6 is a front, left side and bottom perspective view thereof with the flipper in a closed position;

FIG. 7 is a top plan view thereof with the flipper in a closed position and slightly askew;

FIG. 8 is a bottom plan view thereof with the flipper in a closed position and slightly askew;

FIG. 9 is a top plan view thereof with the flipper in an open position;

FIG. 10 is a back plan view thereof with the flipper in an open position and rotated 180°;

FIG. 11 is a right side elevational view thereof with the flipper in a closed position;

FIG. 12 is a left side elevational view thereof with the flipper in a closed position;

FIG. 13 is a left side perspective view thereof with the flipper in an open position and rotated 180°;

FIG. 14 is a right side perspective view thereof with the flipper in an open position and rotated 180°;

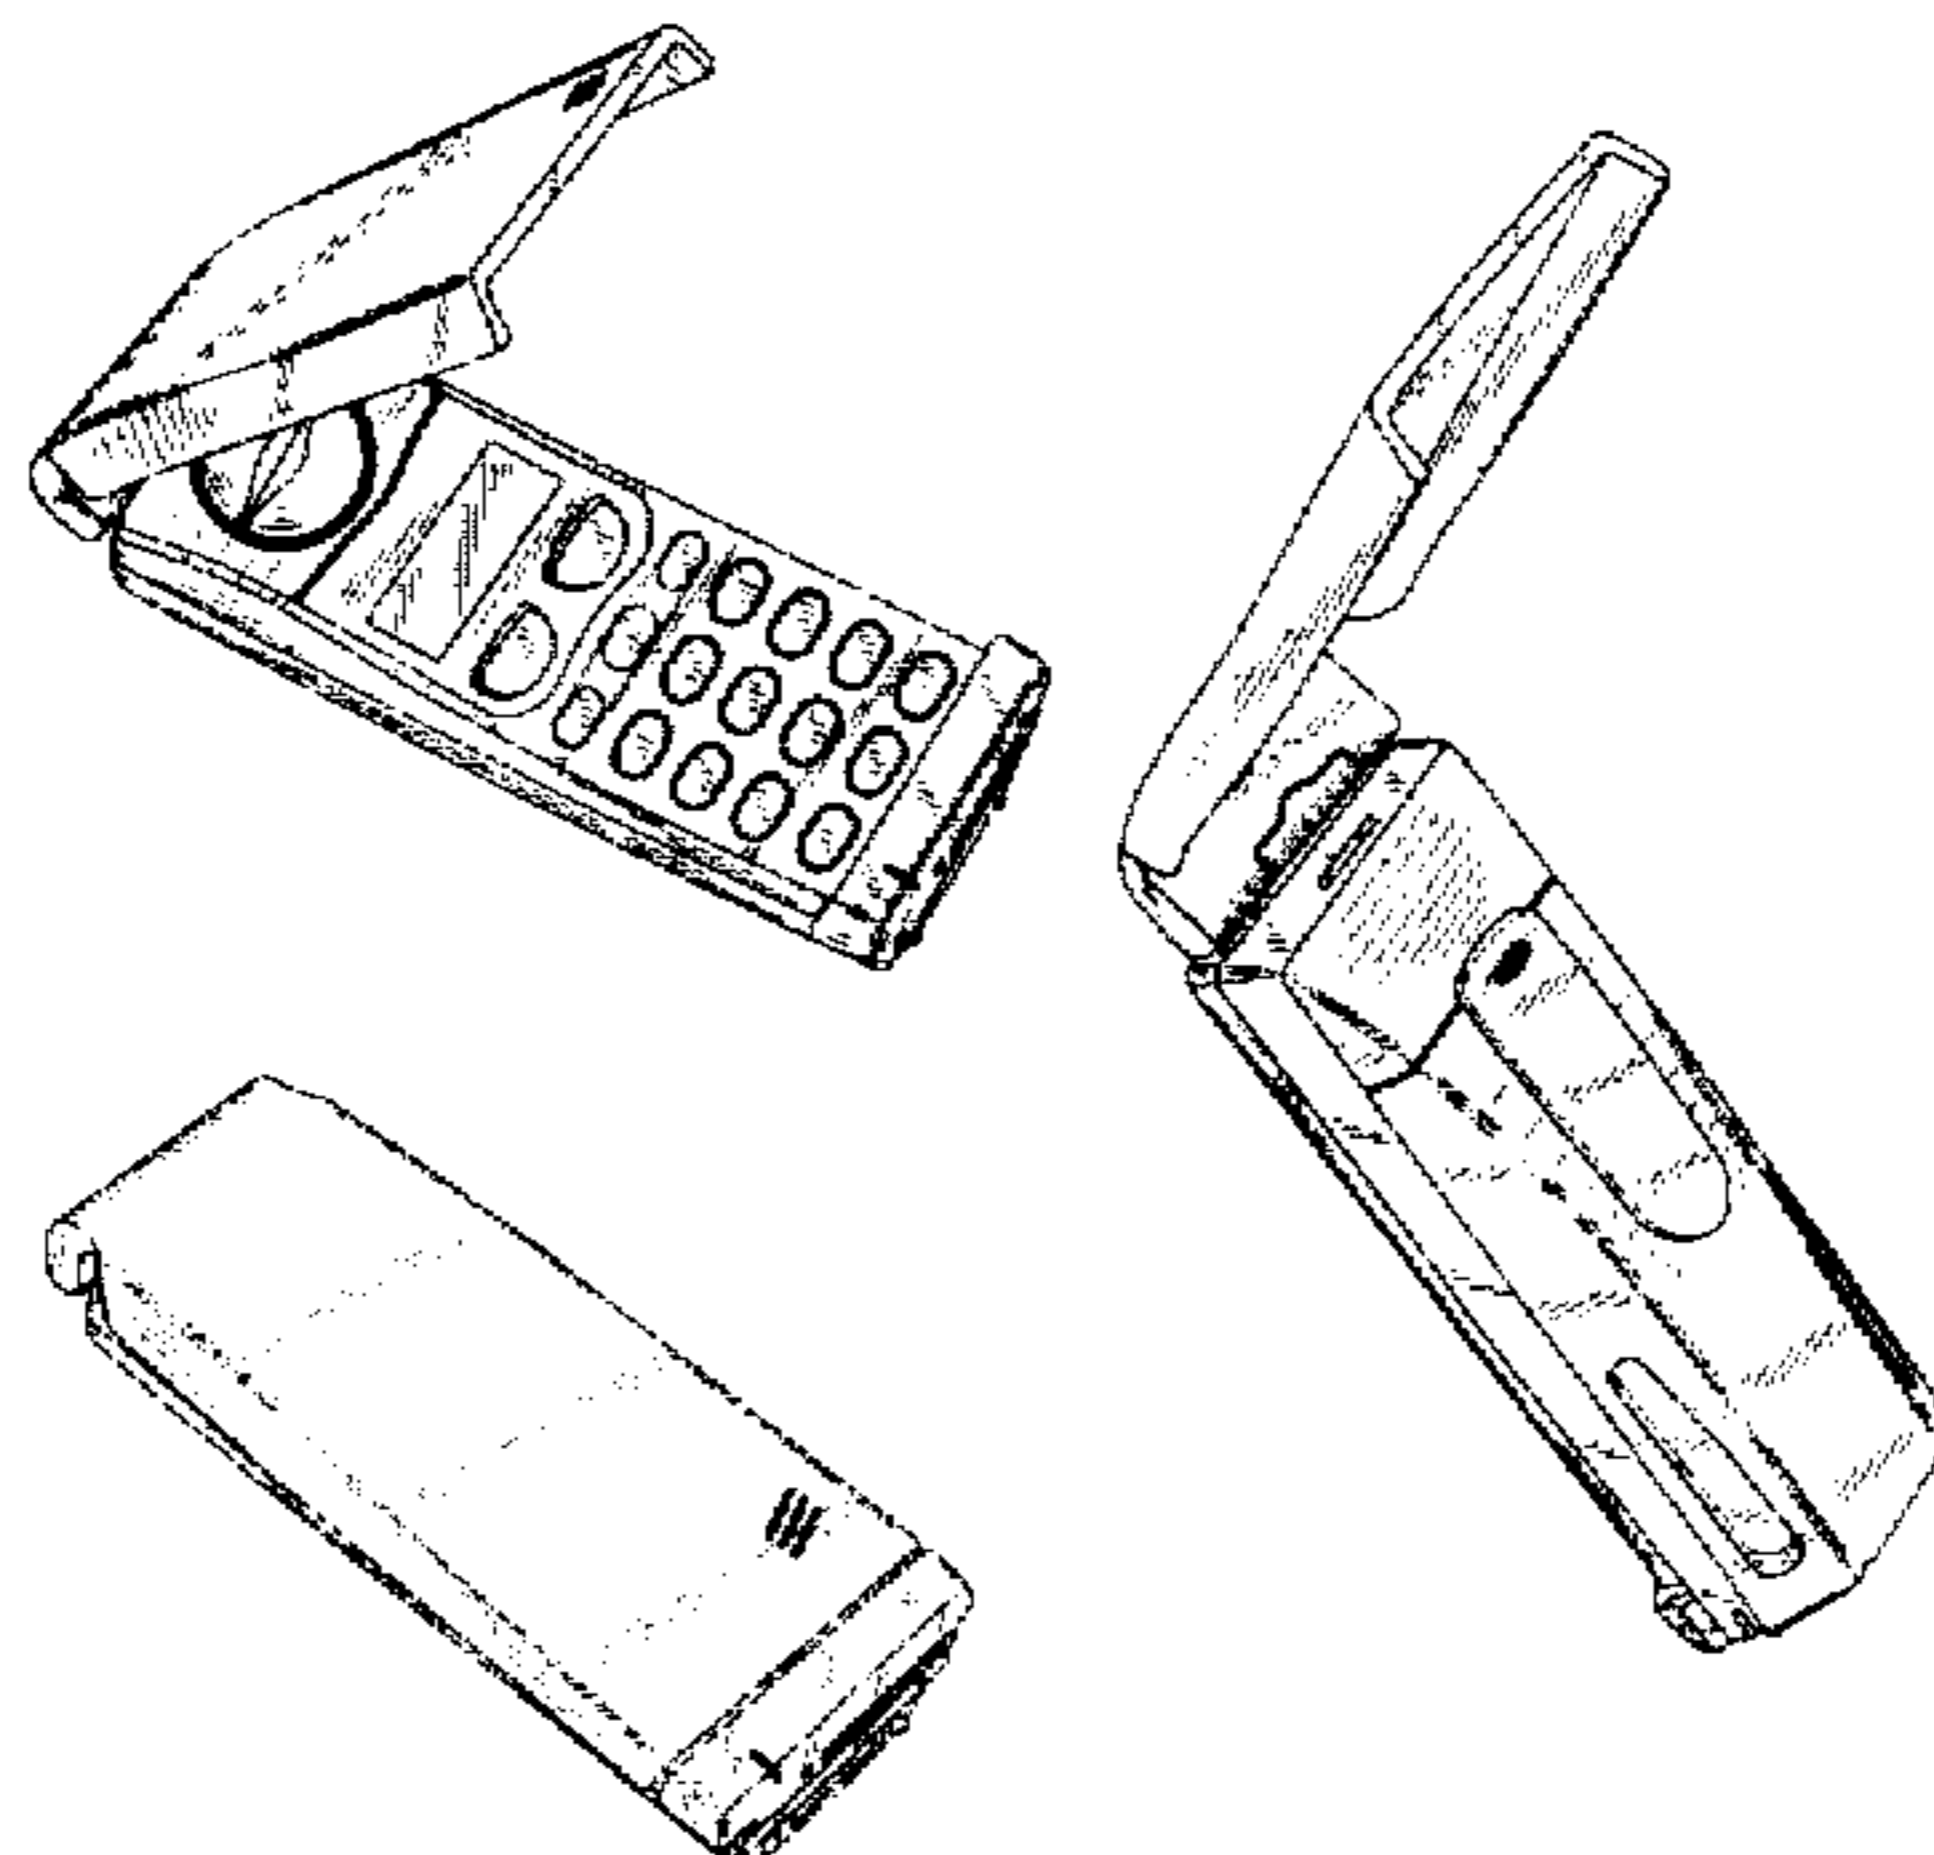

FIG. 15 is a front and bottom perspective view thereof with the flipper in an open position and rotated 180°;

FIG. 16 is a front, left side, and bottom perspective view thereof with the flipper in an open position and rotated 180°;

FIG. 17 is a front elevational view thereof with the flipper in a closed position; and,

FIG. 18 is a back elevational view thereof with the flipper in a closed position.
