### [57] CLAIM

The ornamental design for a "bezel", as shown and described.

### DESCRIPTION

FIG. 1 is a perspective view of a bezel according to the principles of the present invention;

FIG. 2 is a front elevational view thereof;

FIG. 3 is a top plan view thereof, it being understood that the bottom plan view is a mirror image;

FIG. 4 is a right end elevational view thereof, it being understood that the left end elevational view is a mirror image;

FIG. 5 is a section view taken along line 5—5 in FIG. 2;

FIG. 6 is a section view taken along line 6—6 in FIG. 2;

FIG. 7 is a perspective view of a second embodiment of the design of FIG. 1, the only difference being the increase in size and appearance of the sides; and,

FIG. 8 is a perspective view of a third embodiment of the design of FIG. 1, the only difference being the increase in size and the appearance of the sides.

The rear of the bezel forms no part of the claimed design.
