[57] **CLAIM**
The ornamental design for an enclosure for a computer, as shown and described.

DESCRIPTION

FIG. 1 is a top, front, right side isometric view of an

enclosure for a computer showing our new design with a screen panel thereof in a closed position;
FIG. 2 is a top, front, right side isometric view thereof wherein the screen panel is in an angled position;
FIG. 3 is a top plan view thereof wherein the screen panel is in the closed position;
FIG. 4 is a front elevational view thereof wherein the screen panel is in the closed position;
FIG. 5 is a front elevational view thereof wherein the screen panel is in the angled position;
FIG. 6 is a right side elevational view thereof wherein the screen panel is in the closed position;
FIG. 7 is a right side elevational view thereof wherein the screen panel is in the angled position;
FIG. 8 is a left side elevational view thereof wherein the screen panel is in the closed position;
FIG. 9 is a left side elevational view thereof wherein the screen panel is in the angled position; and,
FIG. 10 is a rear elevational view thereof wherein the screen panel is in the closed position.
The bottom of the enclosure for a computer is unornamented. The rear of the screen panel and the surface under the screen panel are flat and unornamented. A touch-pen for interfacing with the touch-sensitive display screen is shown in broken lines for illustrative purposes only and forms no part of the claimed design.
