[57] **CLAIM**

The ornamental design for a fabric, as shown and described.

DESCRIPTION

The sole FIGURE shows a top plan view of a fabric, showing my new design, it being understood that the fabric extends indeterminately in length and width beyond the irregular boundaries of the FIGURE.

The broken lines within the FIGURE define one repeat unit of the claimed design, which repeats uniformly over the entire surface of the fabric. The broken lines form no part of the claimed design.
