[57] CLAIM

The ornamental design for an agent icon for a display screen of a programmed computer system, as shown and described.

DESCRIPTION

FIG. 1 is a perspective view of a first embodiment of an agent icon for a display screen of a programmed computer system showing our new design, the vertical lining on the oval nose portion being understood to represent the color red, and the horizontal lining on the tool box portion being understood to represent the color blue; FIG. 2 is a front elevation view thereof; and, FIG. 3 is a front elevation view of a second embodiment thereof, the difference residing in the lack of color resulting from the display of the icon on a black and white screen display.
