[57] **CLAIM**

The ornamental design for a shoulder ring for push button dispensers, as shown and described.

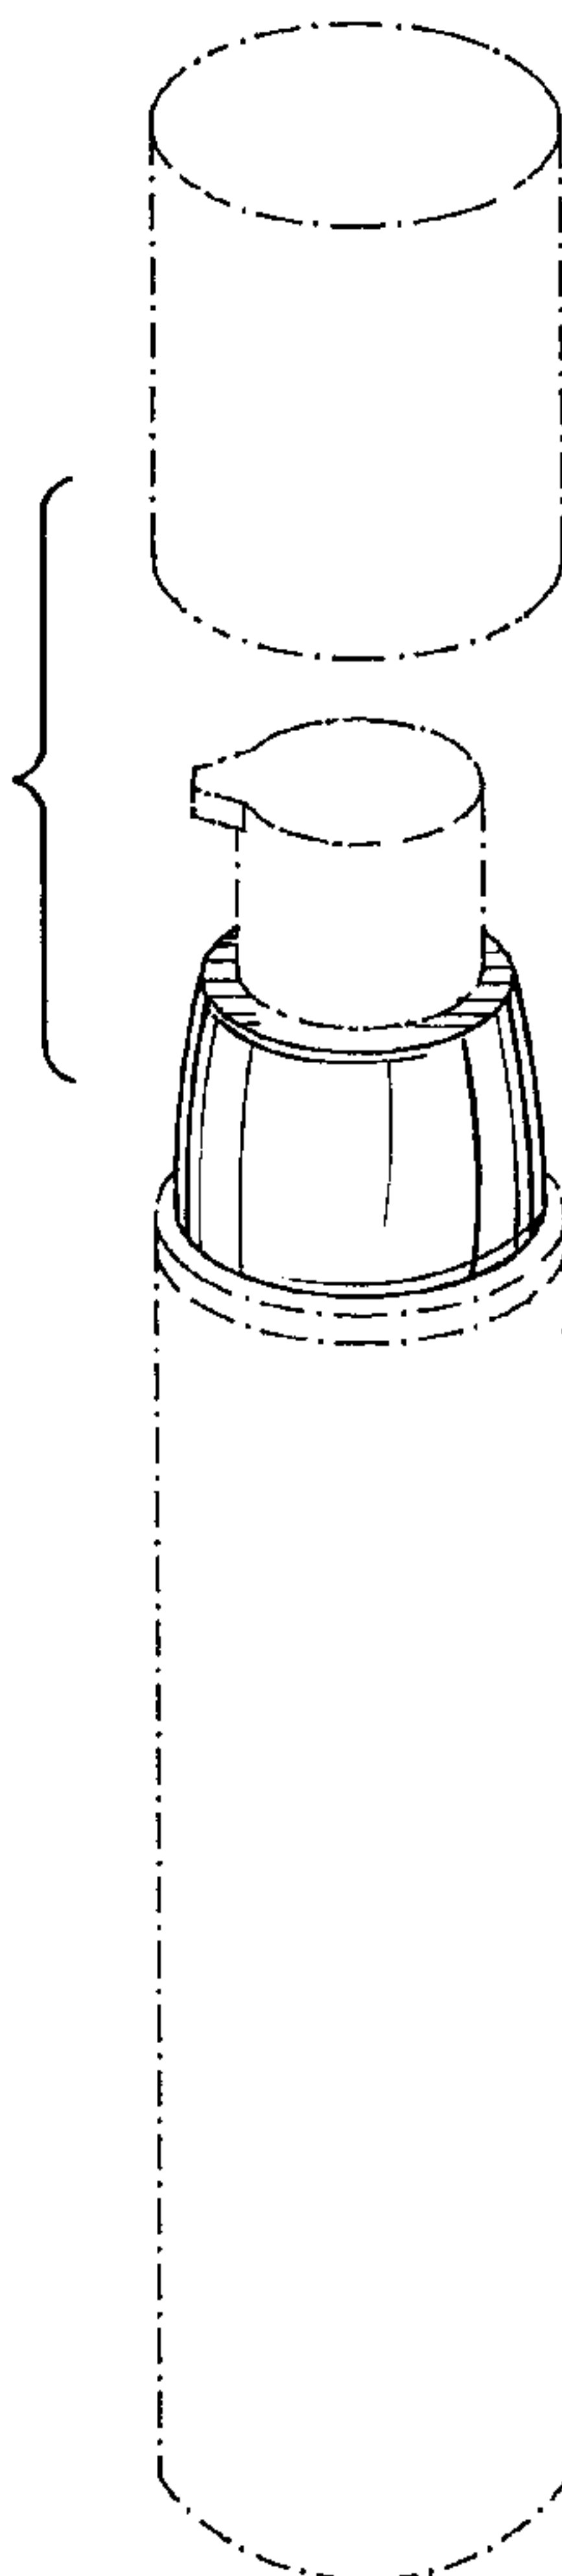

DESCRIPTION

FIG. 1 is a perspective view of a shoulder ring for push button dispensers, showing my new design; and, FIG. 2 is a perspective view of a shoulder ring for push button dispensers, showing a second embodiment of my new design.

The shoulder ring of the present invention is a figure of revolution and so all sides thereof have the same appearance. The bottom of the shoulder ring is not seen in use but is secured to a subjacent container and so its appearance is neither disclosed nor claimed.

The broken line showing of a container is for illustrative purposes only and forms no part of the claimed design.
