[57] **CLAIM**

The ornamental design for a repeating surface pattern for packaging, as shown and described.

DESCRIPTION

The sole FIGURE is a fragmentary plan view of a repeating surface pattern for packaging showing my new design. The broken lines in the drawing depict the boundaries of the repeating surface pattern for packaging as well as the packaging to which the pattern is applied. The broken lines further indicate that the pattern repeats indeterminately in one or more directions. The broken lines form no part of the claimed design.
