[57] **CLAIM**

The ornamental design for a screwdriver handle, as shown and described.

DESCRIPTION

FIG. **1** is an elevational view of a screwdriver handle showing my new design with a screwdriver blade being shown in broken line, and in which the stippling represents a portion of a color or tone different from that of the unstippled portion; the same view is presented if the screwdriver handle is rotated about its longitudinal axis through 120° and through 240°;

FIG. **2** is an elevational view of the screwdriver handle rotated 180° about its longitudinal axis from the position of FIG. **1**; the same view is presented if the screwdriver handle is further rotated about its longitudinal axis theough 120° and through 240°;

FIG. **3** is an elevational view of the screwdriver rotated 90° about its longitudinal axis from the position of FIG. **2**; the same view is presented if the handle is further rotated about its longitudinal axis through 120° and through 240°;

FIG. **4** is a top view of the upper end of the screwdriver handle as seen in FIGS. **1** and **2**;

FIG. **5** is a cross sectional view along the line **5—5** of FIG. **1**;

FIG. **6** is a cross sectional view along the line **6—6** of FIG. **1**;

FIG. **7** is a cross sectional view along the line **7—7** of FIG. **1**;

FIG. **8** is a view similar to FIG. **2** of another embodiment of the screwdriver handle having the same shape as the preceding Figures, but having top and bottom portions which are transparent; and

FIG. **9** is a cross sectional view along the line **9—9** of FIG. **4**; and,

FIG. **10** is a bottom plan view of the handle of FIG. **1**.

The broken line showing of the screwdriver blade is for illustrative purposes only and forms no part of the claimed design.
