[57] CLAIM

The ornamental design for a tie-down bracket, as shown and described.

#### **DESCRIPTION**

FIG. 1 is an exploded view of the tie-down bracket of the instant invention which is provided to illustrate the several

components of the assembly in order to enhance the description of the other Figures.

FIG. 2 is an oblique view of the tie-down bracket of the instant invention with the tie-down ring in the raised position.

FIG. 3 is an oblique view of the tie-down bracket of the instant invention with the tie-down ring in the lowered position.

FIG. 4 is a top plan view of the tie-down bracket of the instant invention

FIG. 5 is a bottom plan view of the tie-down bracket of the instant invention

FIG. 6 is a side elevation view of the tie-down bracket of the instant invention with the tie-down ring in the raised position as shown in FIG. 2. The opposite side elevation view is the mirror image.

FIG. 7 is a side elevation view of the tie-down bracket of the instant invention with the tie-down ring in the lowered position as shown in FIG. 3. The opposite side elevation view is the mirror image.

FIG. 8 is an end elevation view of the tie-down bracket of the instant invention with the tie-down ring in the raised position as shown in FIG. 2. The opposite end elevation view is the mirror image; and,

FIG. 9 is an end elevation view of the tie-down bracket of the instant invention with the tie-down ring in the lowered position as shown in FIG. 3. The opposite end elevation view is the mirror image.
