[57] **CLAIM**

The ornamental design for a device for determining direction and measuring distance, as shown.

DESCRIPTION

FIG. 1 is a perspective view of a device for determining

direction and measuring distance in accordance with a first embodiment of my new design;

FIG. 2 is a top plan view thereof;

FIG. 3 is a front elevational view thereof;

FIG. 4 is a rear elevational view thereof;

FIG. 5 is a left side elevational view thereof, the right side elevational view being a mirror image of the left view shown;

FIG. 6 is a perspective view of a device for determining direction and measuring distance in accordance with a second embodiment of my new design;

FIG. 7 is a top plan view thereof;

FIG. 8 is a front elevational view thereof;

FIG. 9 is a rear elevational view thereof;

FIG. 10 is a left side elevational view thereof, the right side elevational view being a mirror image of the left view shown;

FIG. 11 is a perspective view of a device for determining direction and measuring distance in accordance with a third embodiment of my new design;

FIG. 12 is a front elevational view thereof;

FIG. 13 is a rear elevational view thereof; and,

FIG. 14 is a left side elevational view thereof, the right side elevational view being a mirror image of the left view shown.

The broken lines showing further details of the device are for illustrative purposes only and form no part of the claimed design.
