The ornamental design for a combined portable stand and holders for cigars and cigarettes, as shown and described.

DESCRIPTION

FIG. 1 is a perspective view of a combined portable stand and holders for cigars and cigarettes, showing my new design;

FIG. 2 is a perspective view thereof similar to FIG. 1 but with the dual holders in unfolded and fully extended position;

FIG. 3 is a top plan view thereof with the holders in folded position;

FIG. 4 is a bottom plan view thereof with the holders in folded position;

FIG. 5 is a top plan view thereof with the holders in unfolded and fully extended position;

FIG. 6 is a bottom plan view thereof with the holders in unfolded and fully extended position;

FIG. 7 is a front elevational view of the upper portion thereof to an enlarged scale and with the holders in unfolded and fully extended position, the lower portion thereof being broken away to reduce the extent of the figure and being illustrated in FIG. 13, the rear elevational view being a mirror image;

FIG. 8 is a front elevational view of the upper portion thereof to an enlarged scale and with the holders in folded position, the lower portion of the figure being broken away to reduce the extent of the figure and being illustrated in FIG. 11, the rear elevational view being a mirror image;

FIG. 9 is an elevational view of one side of the upper portion thereof to an enlarged scale and with the holders in folded position, the lower portion of the figure being broken away to reduce the extent of the figure and being illustrated in FIG. 12, the undisclosed side being a mirror image;

FIG. 10 is a side elevational view thereof, comparable to FIG. 9 but with the holders in unfolded and fully extended position, the lower portion being illustrated in FIG. 14 and the undisclosed side being a mirror image;

FIG. 11 is a front elevation of the lower portion broken away from the upper portion shown in FIG. 8;

FIG. 12 is a side elevation of the lower portion broken away from the upper portion shown in FIG. 9;

FIG. 13 is a front elevation of the lower portion broken away from the upper portion shown in FIG. 7; and,

FIG. 14 is a side elevation of the lower portion broken away from the upper portion shown in FIG. 10.
