[57] CLAIM

The ornamental design for non-invasive blood sensing device, as shown and described.

DESCRIPTION

FIG. 1 is a perspective view of the non-invasive blood sensing device according to the new design for receiving a patient's right arm with the video screen in the raised position, the arm support members in the extended position, and the ram in the retracted position;

FIG. 2 is a front elevation view of the device shown in FIG. 1;

FIG. 3 is a rear elevation view of the device shown in FIG. 1;

FIG. 4 is a top plan view of the device shown in FIG. 1;

FIG. 5 is a bottom plan view of the device shown in FIG. 1;

FIG. 6 is a left side elevation view of the device shown in FIG. 1;

FIG. 7 is a right side elevation view of the device shown in FIG. 1;

FIG. 8 is a perspective view of the non-invasive blood sensing device according to the new design for receiving a patient's right arm with the video screen in the lowered position, the arm support members in the retracted position, and the ram in the retracted position;

FIG. 9 is a front elevation view of the device shown in FIG. 8;

FIG. 10 is a rear elevation view of the device shown in FIG. 8;

FIG. 11 is a top plan view of the device shown in FIG. 8;

FIG. 12 is a bottom plan view of the device shown in FIG. 8;

FIG. 13 is a left side elevation view of the device shown in FIG. 8;

FIG. 14 is a right side elevation view of the device shown in FIG. 8;

FIG. 15 is a perspective view of the non-invasive blood sensing device according to the new design for receiving a patient's right arm with the video screen in the raised position, the arm support members in the retracted position, and the power pack detached from the measuring assembly;

FIG. 16 is a front elevation view of the device shown in FIG. 15;

FIG. 17 is a rear elevation view of the device shown in FIG. 15;

FIG. 18 is a top plan view of the device shown in FIG. 15;

FIG. 19 is a bottom plan view of the device shown in FIG. 15;

FIG. 20 is a left side elevation view of the device shown in FIG. 15 ;

FIG. 21 is a right side elevation view of the device shown in FIG. 15;

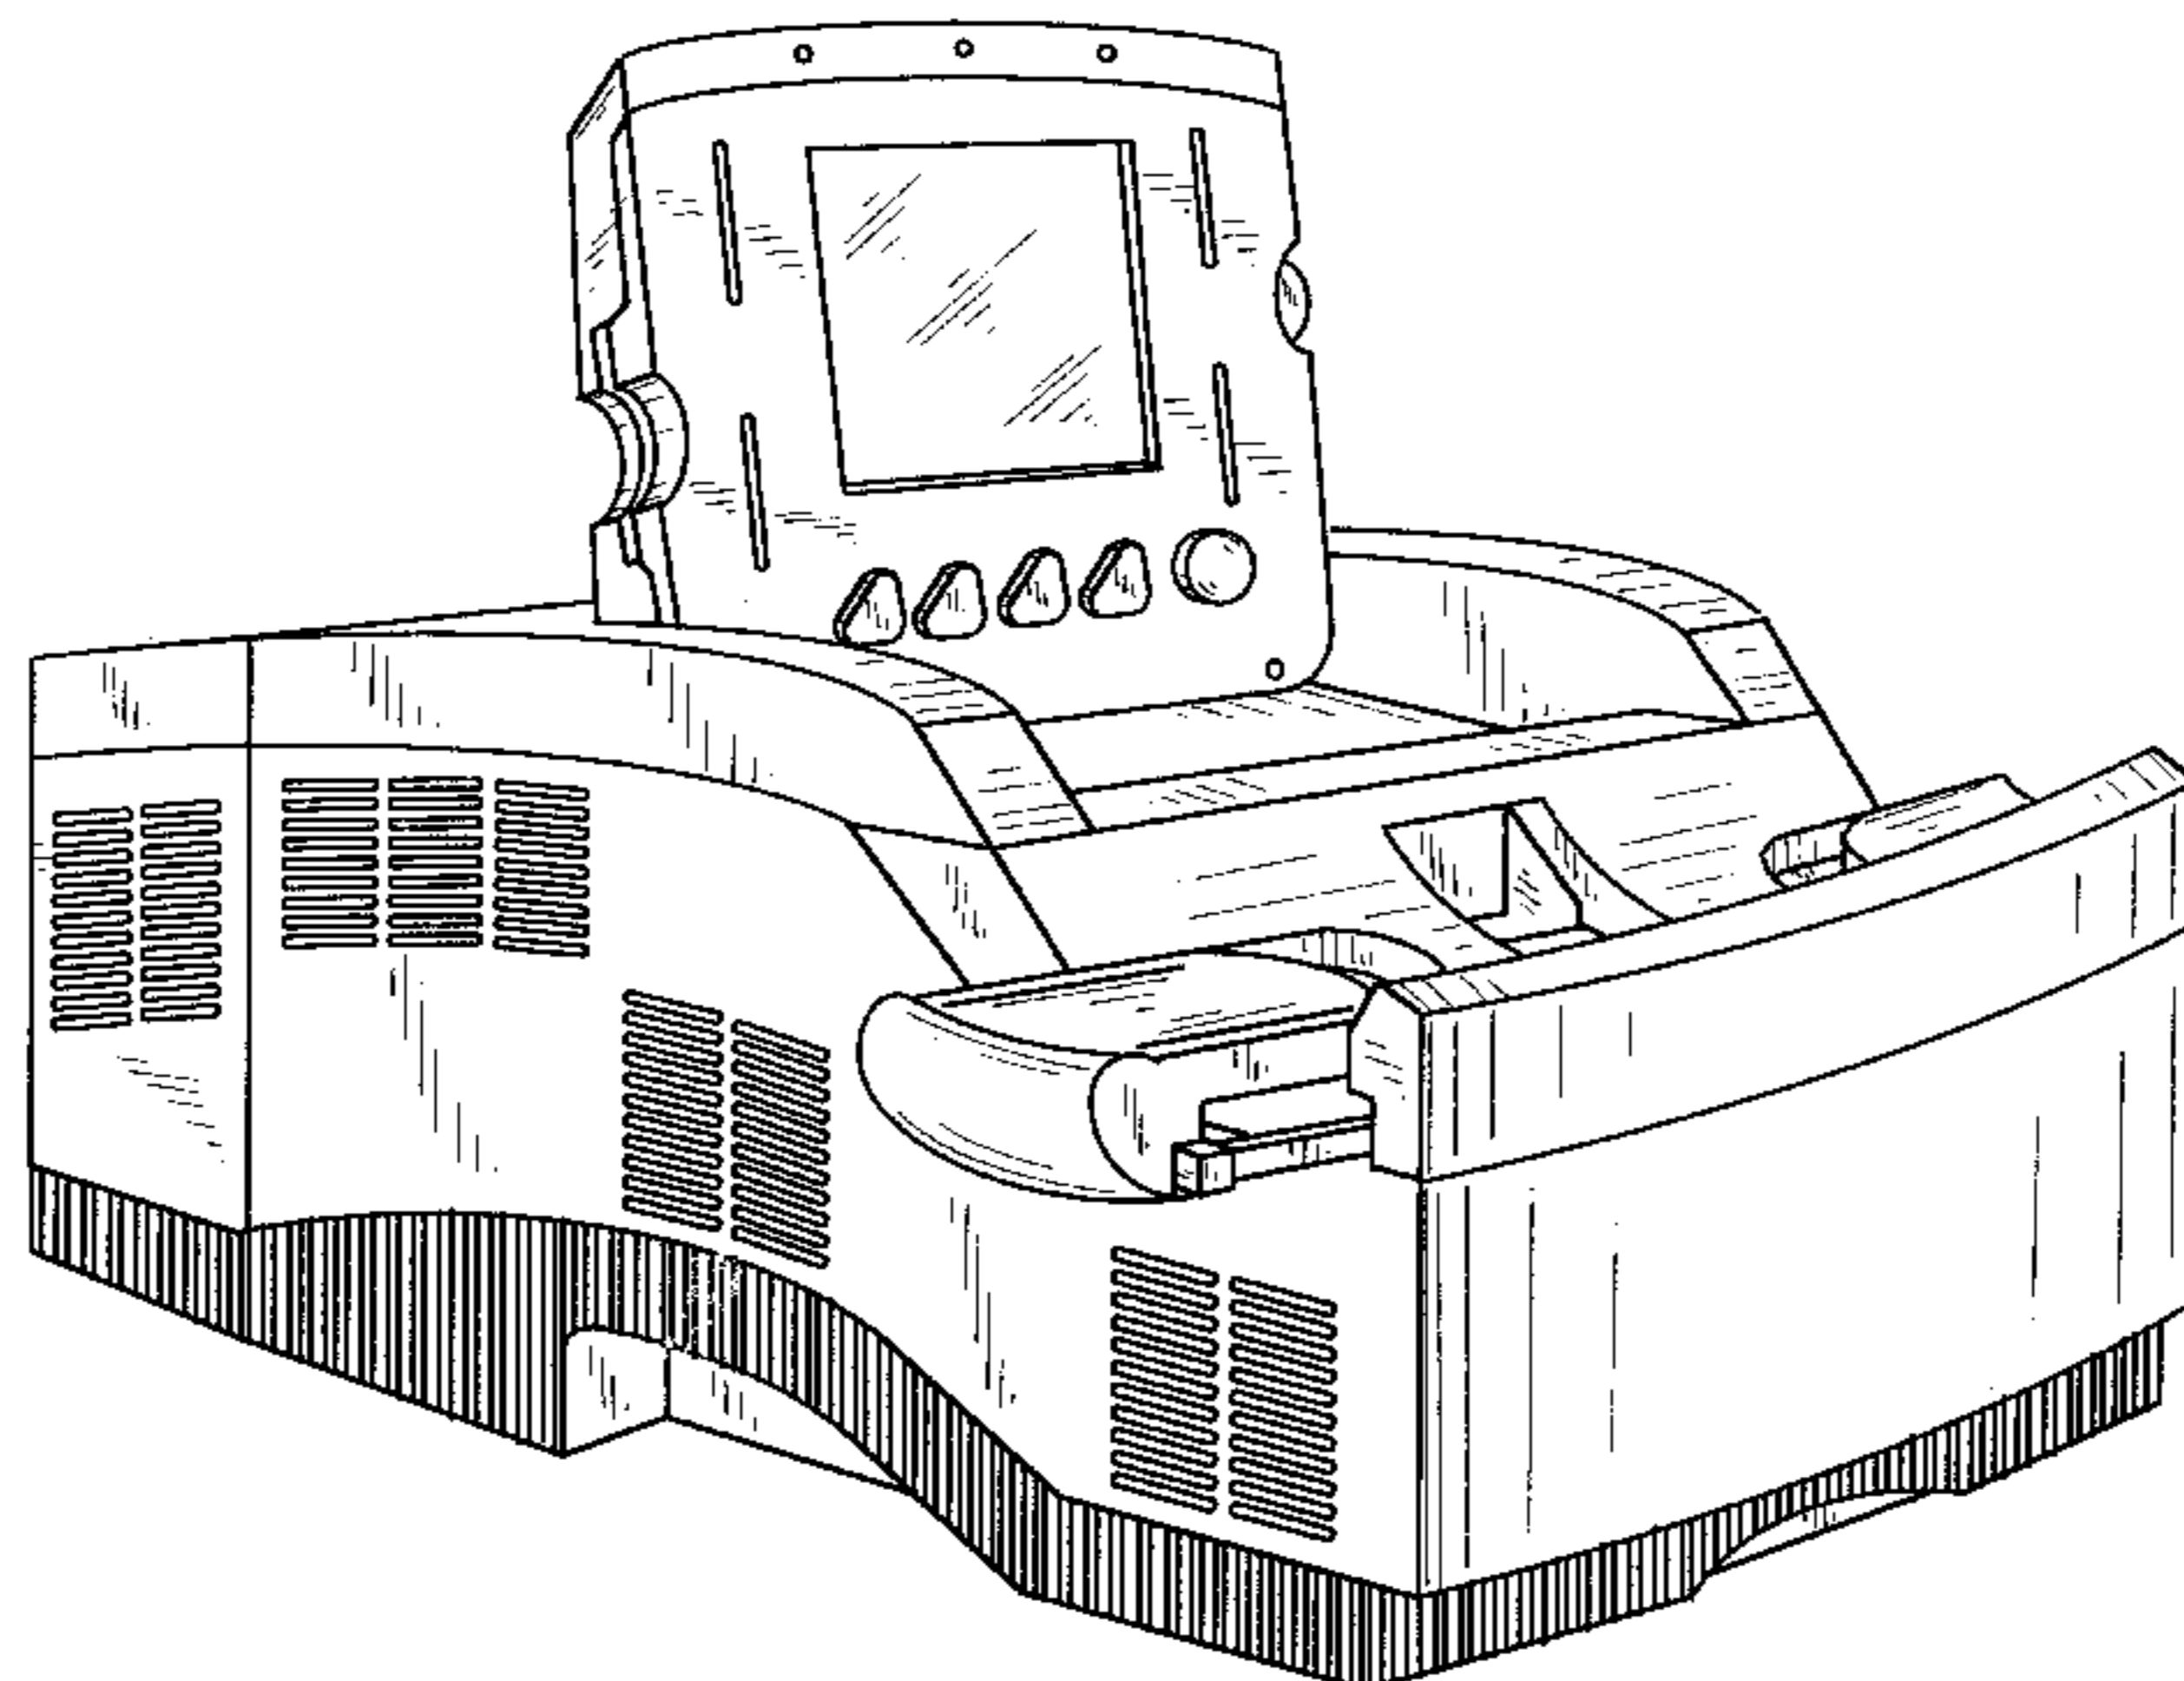

FIG. 22 is a front elevation view of the non-invasive blood sensing device according to the new design for receiving a patient's left arm with the video screen in the raised position, the arm support members in the extended position, and the ram in the retracted position;

FIG. 23 is a rear elevation view of the device shown in FIG. 22;

FIG. 24 is a top plan view of the device shown in FIG. 22; FIG. 25 is a bottom plan view of the device shown in FIG. 22; and;

FIG. 26 is a top plan view of the device shown in FIG. 1 with the ram in the extended position.
