[57] **CLAIM**

The ornamental design for an aerosol dispenser cap, as shown and described.

DESCRIPTION

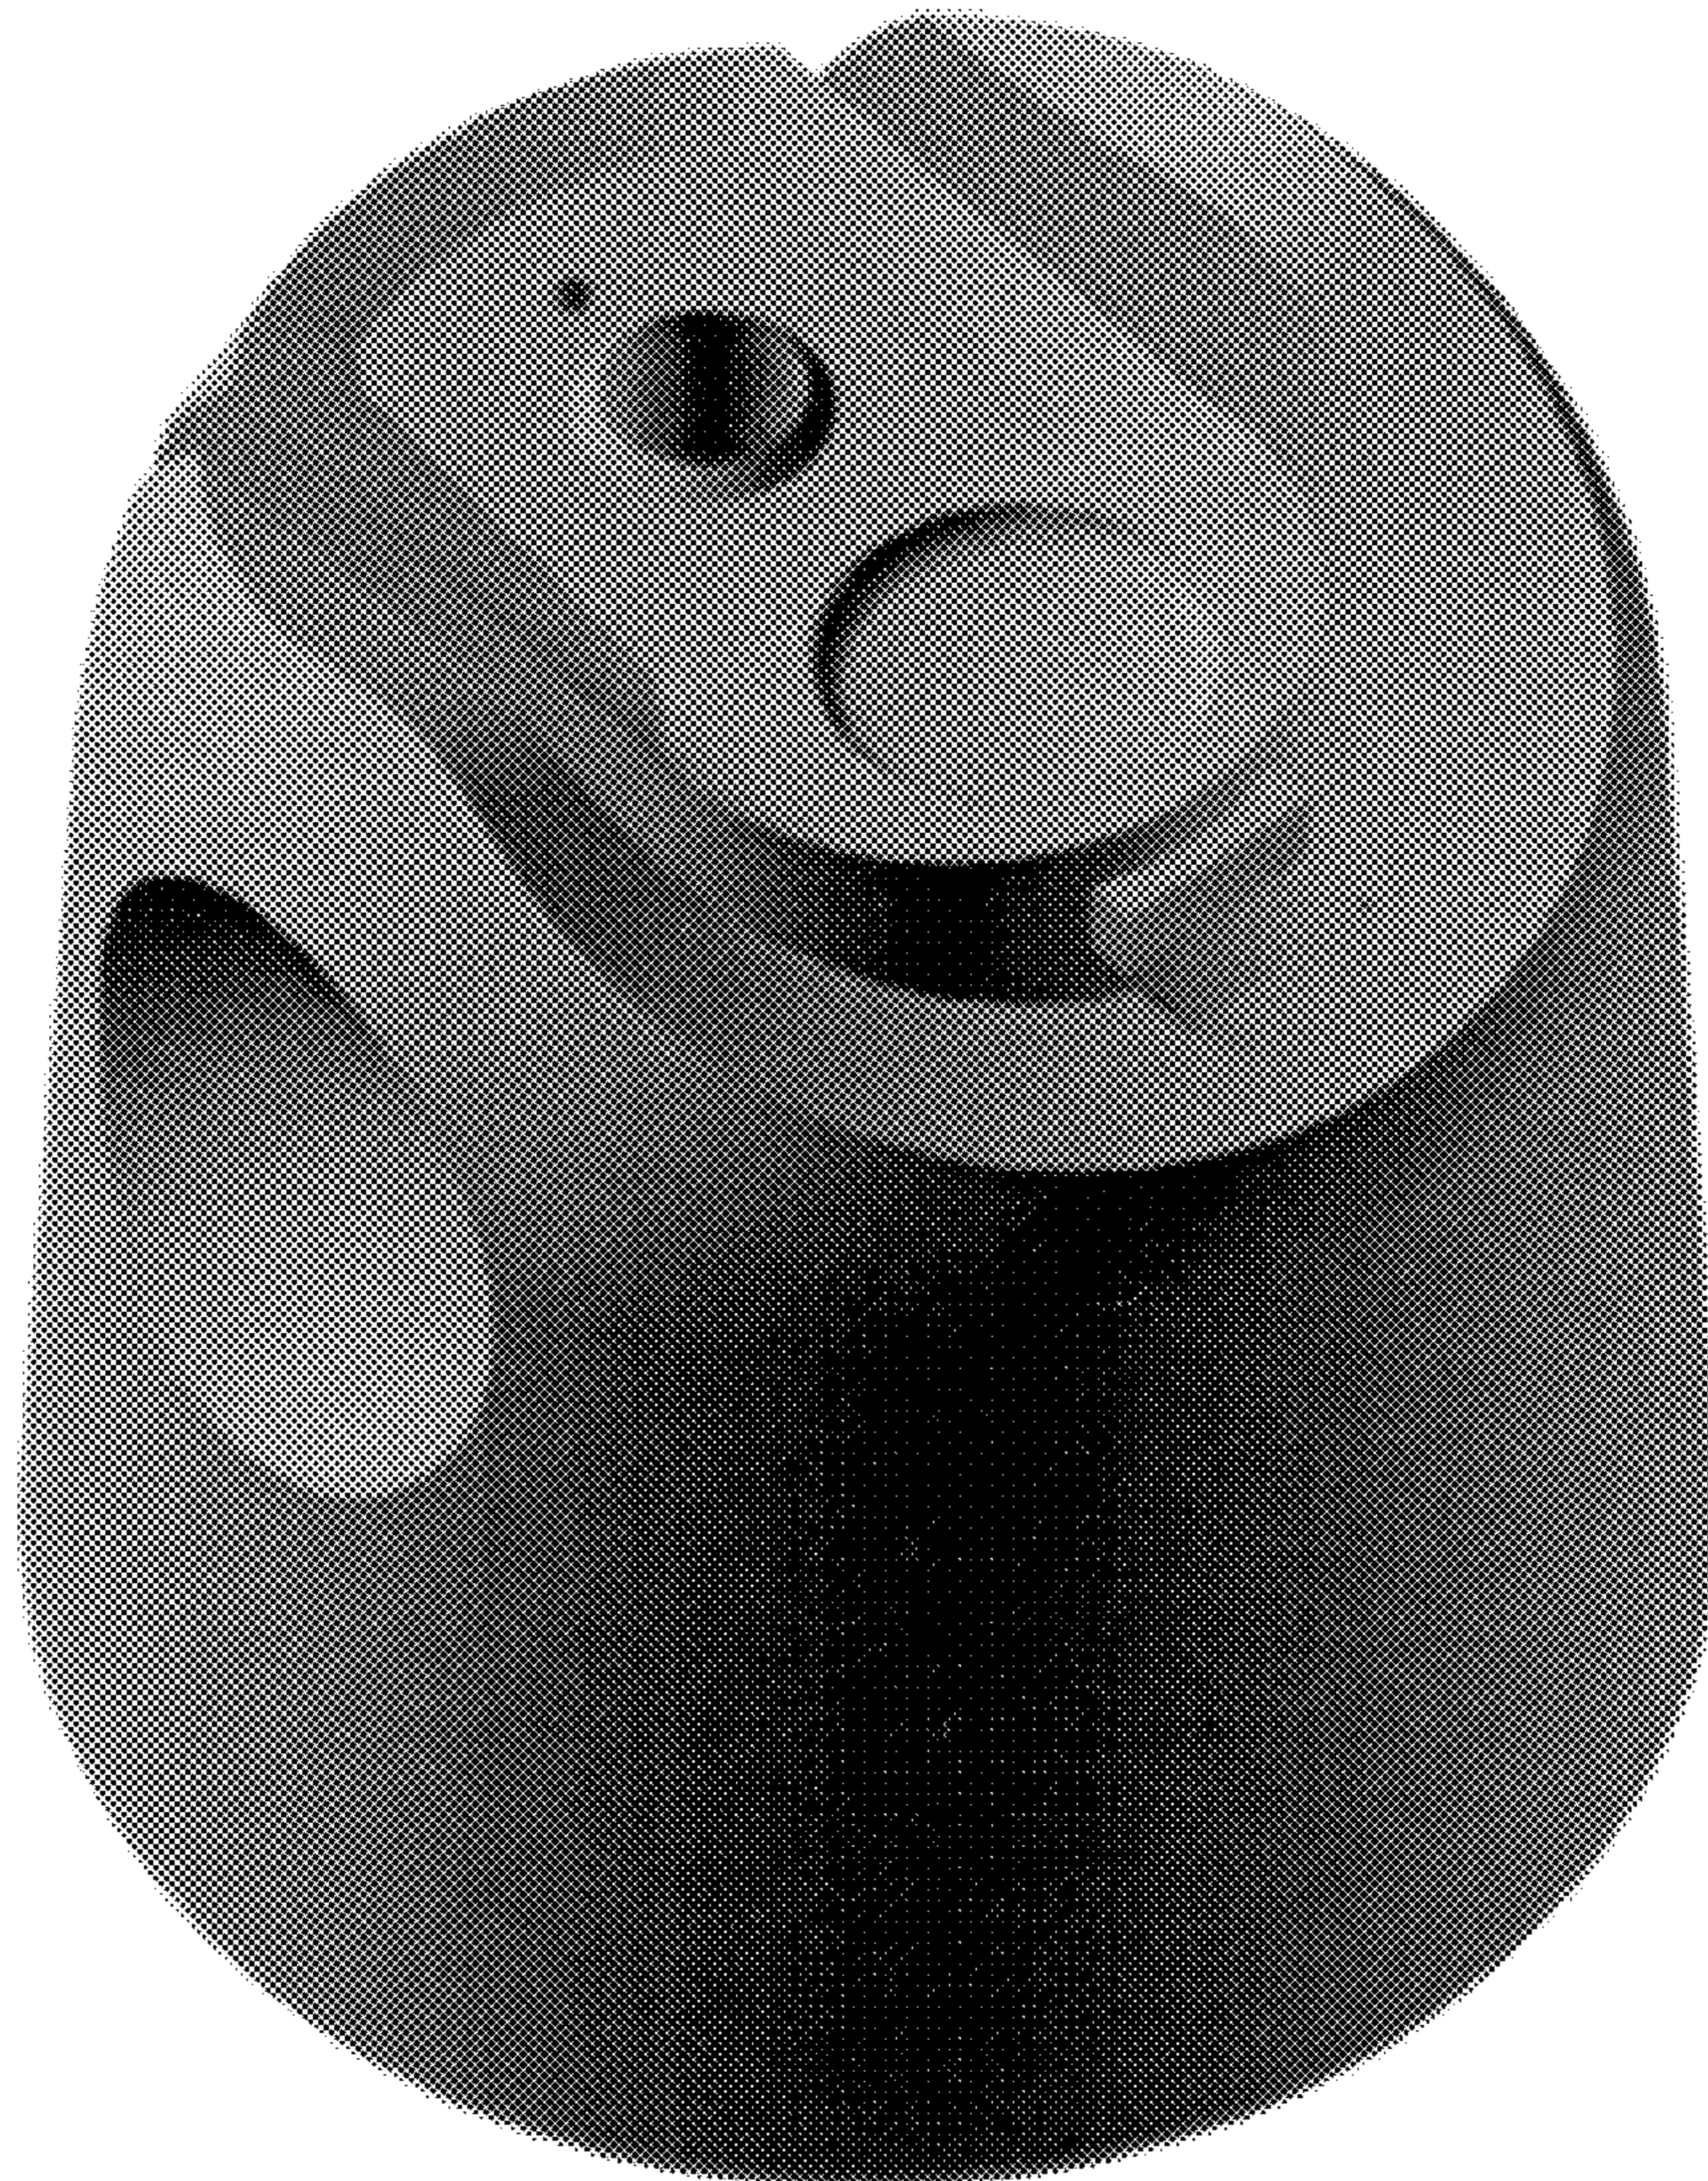

FIG. 1 is a top and rear perspective view of the aerosol dispenser cap.

FIG. 2 is a top and front perspective view of the aerosol dispenser cap.

The opposite side of the cap not shown is a mirror image of that shown.

The bottom of the cap forms no part of the claimed design. In use, the aerosol dispenser cap is removably attached to the top of an aerosol dispenser, e.g., an aerosol can, above the nozzle, i.e., it may be removed from the dispenser without resulting in the release of the dispenser's contents.
