The ornamental design for paper product, as shown and
described.

DESCRIPTION

FIG. 1 is a top front perspective view of a paper product,
showing our new ornamental design.

FIG. 2 is a top plan view of the paper product shown in FIG.
1, the opposite (bottom) side view being a mirror image
thereof.

FIG. 3 is a frontal elevational view of the paper product
shown in FIGS. 1 and 2, the opposite (rear) elevational view
being a mirror image thereof; and,

FIG. 4 is a side elevational view of the paper product shown
in FIGS. 1, 2 and 3, the opposite side elevational view being
a mirror image thereof.

It is to be understood that the design pattern shown in FIGS.
1-4 continues uniformly throughout the length and width of
the paper product. The paper product is shown broken away
to indicate that the paper product, including the portion
comprising the roll, has indeterminate width. The broken
