[57] **CLAIM**

The ornamental design for a signal connector, as shown and described.

DESCRIPTION

FIG. 1 is a rear and upper left perspective view of a signal connector showing a first embodiment of our new design; FIG. 2 is a top plan view thereof; FIG. 3 is a bottom plan view thereof; FIG. 4 is an elevational view of the left side of the connector illustrated in FIG. 1; FIG. 5 is an elevational view of the right side of the connector illustrated in FIG. 1; FIG. 6 is a rear elevational view thereof; FIG. 7 is a front elevational view thereof; FIG. 8 is a rear and upper left perspective view of a signal connector showing a second embodiment of our new design; FIG. 9 is a top plan view thereof; FIG. 10 is a bottom plan view thereof; FIG. 11 is an elevational view of the left side of the connector illustrated in FIG. 8; FIG. 12 is an elevational view of the right side of the connector illustrated in FIG. 8; FIG. 13 is a rear elevational view thereof; and, FIG. 14 is a front elevational view thereof.

The broken lines in FIGS. 1–7 show features of the connector which form no part of the design of the first embodiment. The broken lines in FIGS. 8–14 show features of the connector which form no part of the design of the second embodiment.
