described.

DESCRIPTION

FIG. 1 is a top front perspective view of a paper product,
showing our new ornamental design.

FIG. 2 is a top plan view of the paper product shown in FIG.

shown in FIGS. 1 and 2, the opposite (rear) elevational view
being a mirror image thereof.

FIG. 4 is a side elevational view of a paper product shown
in FIGS. 1, 2 and 3, the opposite side elevational view being
a mirror image thereof; and,

FIG. 5 is a top plan view of the paper product, showing
another embodiment of our new ornamental design, the
opposite (bottom) side view being a mirror image thereof, all
other views thereof being substantially similar to those
shown in and described in FIGS. 1, 3, and 4.

The dashed lines showing a roll are for illustrative purposes
only and form no part of the claimed design. It is to be
understood that the design pattern shown in FIGS. 1–4
continues throughout a length and a width of the paper
product, including a portion of the product comprising the
roll shown in dashed lines. The paper product is shown
broken away to indicate that the paper product, including the
portion comprising the roll, has indeterminate width. The
broken lines are for illustrative purposes only and form no
part of the claimed design.
