[57] **CLAIM**

The ornamental design for toe board, as shown and described.

**DESCRIPTION**

FIG. 1 shows a perspective view of a toe board device according to the principles of the present invention;

FIG. 2 shows a left end view thereof, a right end view not being shown as it is a mirror image of the left end view; FIG. 3 shows a right side elevational view thereof; a left side elevational view not being shown as it is a mirror image of the right side elevational view; FIG. 4 shows a top plan view thereof; FIG. 5 shows a bottom plan view thereof; FIG. 6 shows a perspective view of an outer member for the toe board shown in FIG. 1; FIG. 7 shows a left end view, a right end view not being shown as it is a mirror image of the left end view; FIG. 8 shows a left side elevational view thereof; a right side elevational view not being shown as it is a mirror image of the left side elevational view; FIG. 9 shows a top plan view thereof; FIG. 10 shows a bottom plan view thereof; FIG. 11 shows a perspective view of an inner member for the toe board shown in FIG. 1; FIG. 12 shows a left end elevational view thereof; a right end elevational view not being shown as it is a mirror image of the left end elevational view; FIG. 13 shows a left side elevational view, a right side elevational view not being shown as it is a mirror image of the left side elevational view; FIG. 14 shows a top plan view thereof; FIG. 15 shows a bottom plan view thereof; and, FIG. 16 shows an enlarged fragmentary view of the grooves shown in FIG. 2.

The views of the claimed design in FIGS. 3 through 5 of the drawing have been fragmentarily shown for ease of illustration.
