[57] **CLAIM**

The ornamental design for a pulling tool, as shown and described.

DESCRIPTION

FIG. 1 is a bottom left perspective view of a pulling tool, showing a first embodiment of my new design;

FIG. 2 is a side elevational view thereof, the opposite side elevational view being a mirror image;

FIG. 3 is a top plan view thereof;

FIG. 4 is a bottom plan view thereof;

FIG. 5 is an enlarged left end elevational view thereof;

FIG. 6 is an enlarged right end elevational view thereof;

FIG. 7 is a side elevational view thereof, with the handle rotated one-quarter turn, the opposite side elevational view with the handle rotated one-quarter turn being a mirror image;

FIG. 8 is a top view thereof, with the handle rotated one-quarter turn;

FIG. 9 is a bottom plan thereof, with the handle rotated one-quarter turn;

FIG. 10 is an enlarged left end elevational view thereof, with the handle rotated one-quarter turn;

FIG. 11 is an enlarged right end elevational view thereof, with the handle rotated one-quarter turn;

FIG. 12 is an enlarged partial perspective view thereof, showing the handle end;

FIG. 13 is a side elevational view thereof, with the handle repositioned to the left, the opposite side elevational view with the handle repositioned to the left being a mirror image;

FIG. 14 is a top plan view thereof, with the handle repositioned to the left;

FIG. 15 is a bottom plan view thereof, with the handle repositioned to the left;

The enlarged left end elevational view thereof, with the handle repositioned to the left, and the enlarged right end elevational view thereof, with the handle repositioned to the left, are identical to FIGS. 5 and 6, respectively;

FIG. 16 is a side elevational view thereof, with the handle both rotated one-quarter turn and repositioned to the left, the opposite side elevational view with the handle both rotated one-quarter turn and repositioned to the left being a mirror image;

FIG. 17 is a top plan view thereof, with the handle both rotated one-quarter turn and repositioned to the left;

FIG. 18 is a bottom plan view thereof, with the handle both rotated one-quarter turn and repositioned to the left;

The enlarged left end elevational view thereof, with the handle both rotated one-quarter turn and repositioned to the left, and the enlarged right end elevational view thereof, with the handle both rotated one-quarter turn and repositioned to the left, are identical to FIGS. 10 and 11, respectively;

FIG. 19 is a side elevational view of a second embodiment of my new design, the opposite side elevational view being a mirror image;

FIG. 20 is a top plan view thereof;

FIG. 21 is a bottom plan view thereof;

FIG. 22 is an enlarged left end elevational view thereof;

FIG. 23 is an enlarged right end elevational view thereof; and,

FIG. 24 is a side elevational view of a third embodiment of my new design.

The handle of the second and third embodiments may be rotated, repositioned, and both rotated and repositioned as shown in FIGS. 7–11 and 13–18 of the first embodiment.
