[57] **CLAIM**

The ornamental design for an optical component packaging, as shown and described.

**DESCRIPTION**

FIG. 1 is a perspective view of the optical component packaging according to the present invention with the optical component packaging being shown in an open position with an optical component located in one-half thereof;

FIG. 2 is a top plan view of the optical component packaging of FIG. 1 with the optical component packaging being shown in the open position;

FIG. 3 is a left side view of the optical component packaging of FIG. 1;

FIG. 4 is a right side view of the optical component packaging of FIG. 1;

FIG. 5 is a front elevational view of the optical component packaging of FIG. 1;

FIG. 6 is a rear plan view of the optical component packaging of FIG. 1;

FIG. 7 is a top plan view of a second embodiment of the present invention of the optical component packaging with the optical component packaging being shown in an open position; and,

FIG. 8 is a side elevational view of the optical component packaging of FIG. 7 being shown in a closed position.

All other views are similar to as disclosed in FIGS. 3-6.
