[57] CLAIM

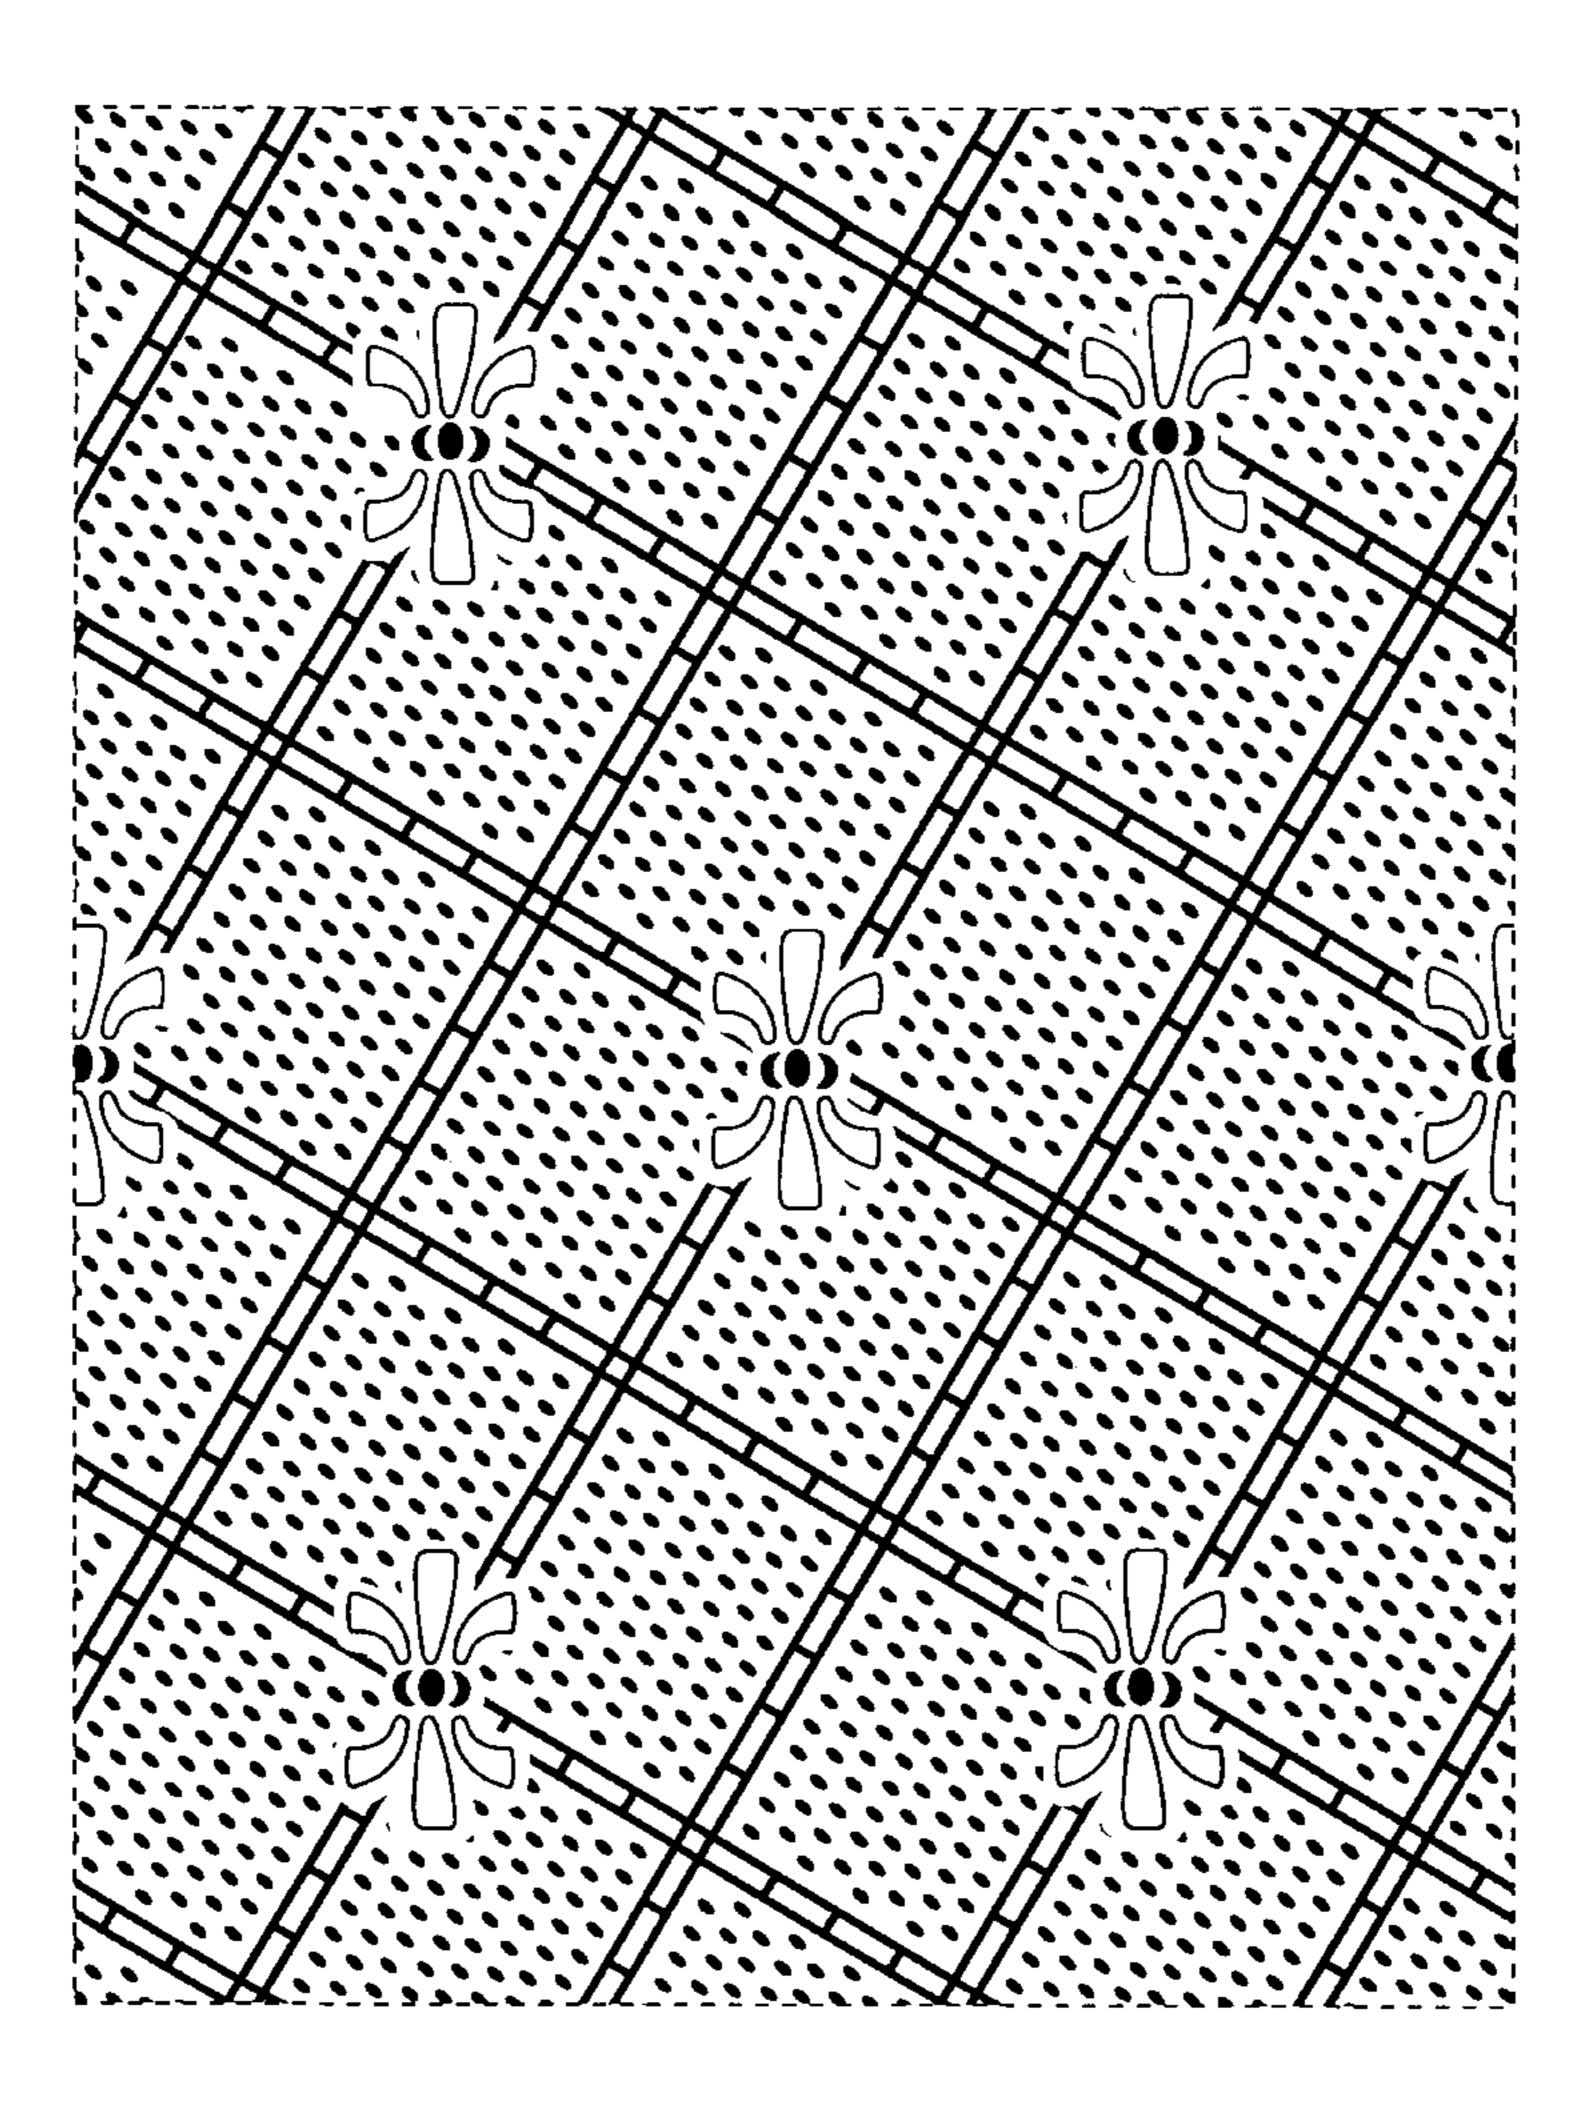

We claim the ornamental design for a repeating pattern for an embossed paper product, as shown and described.

DESCRIPTION

FIG. 1 is a top plan view of a repeating pattern for an embossed paper product showing our new design; and, FIG. 2 is a top plan view of a single repetitive unit of the design of FIG. 1.

The pattern of the claimed design may be applied to either a single or multi-ply paper product. Preferably, the pattern of the claimed design is applied to a paper napkin product. The broken line boundaries depict the embossed paper product to which the pattern is applied, as well as represent the boundaries of the claimed design. The claimed design repeats uniformly throughout the length and width of the paper product, which is understood to extend indeterminately in one or more directions. The broken lines form no part of the claimed design.
