[57] CLAIM

I claim the ornamental design for a belt buckle, as shown and described.

FIG. 1 is a front perspective view of the belt buckle of the invention connected to a belt;

FIG. 2 is side elevational view of the belt buckle of the invention;

FIG. 3 is a top plan view of a first component of the belt buckle of the invention;

FIG. 4 is a top plan view of a second component of the belt buckle of the invention;

FIG. 5 is a top plan view of the first component of the belt buckle of the invention connected to a first end portion of the belt, and of the second component of the belt buckle of the invention connected to a second end portion of the belt, both components being shown in a first position relative to each other;

FIG. 6 is a top plan view of the first component of the belt buckle of the invention connected to the first end portion of the belt, and of the second component of the belt buckle of the invention connected to the second end portion of the belt, both components being shown in a second position relative to each other; and,

FIG. 7 is a top plan view of the first component of the belt buckle of the invention connected to the first end portion of the belt, and of the second component of the belt buckle of the invention connected to the second end portion of the belt, both components being shown in a third position relative to each other.

The broken lines showing of the belt and the two adjustable buckles is for illustrative purposes only and forms no part of the claimed design.
