[57] **CLAIM**

The ornamental design for a container, as shown and described.

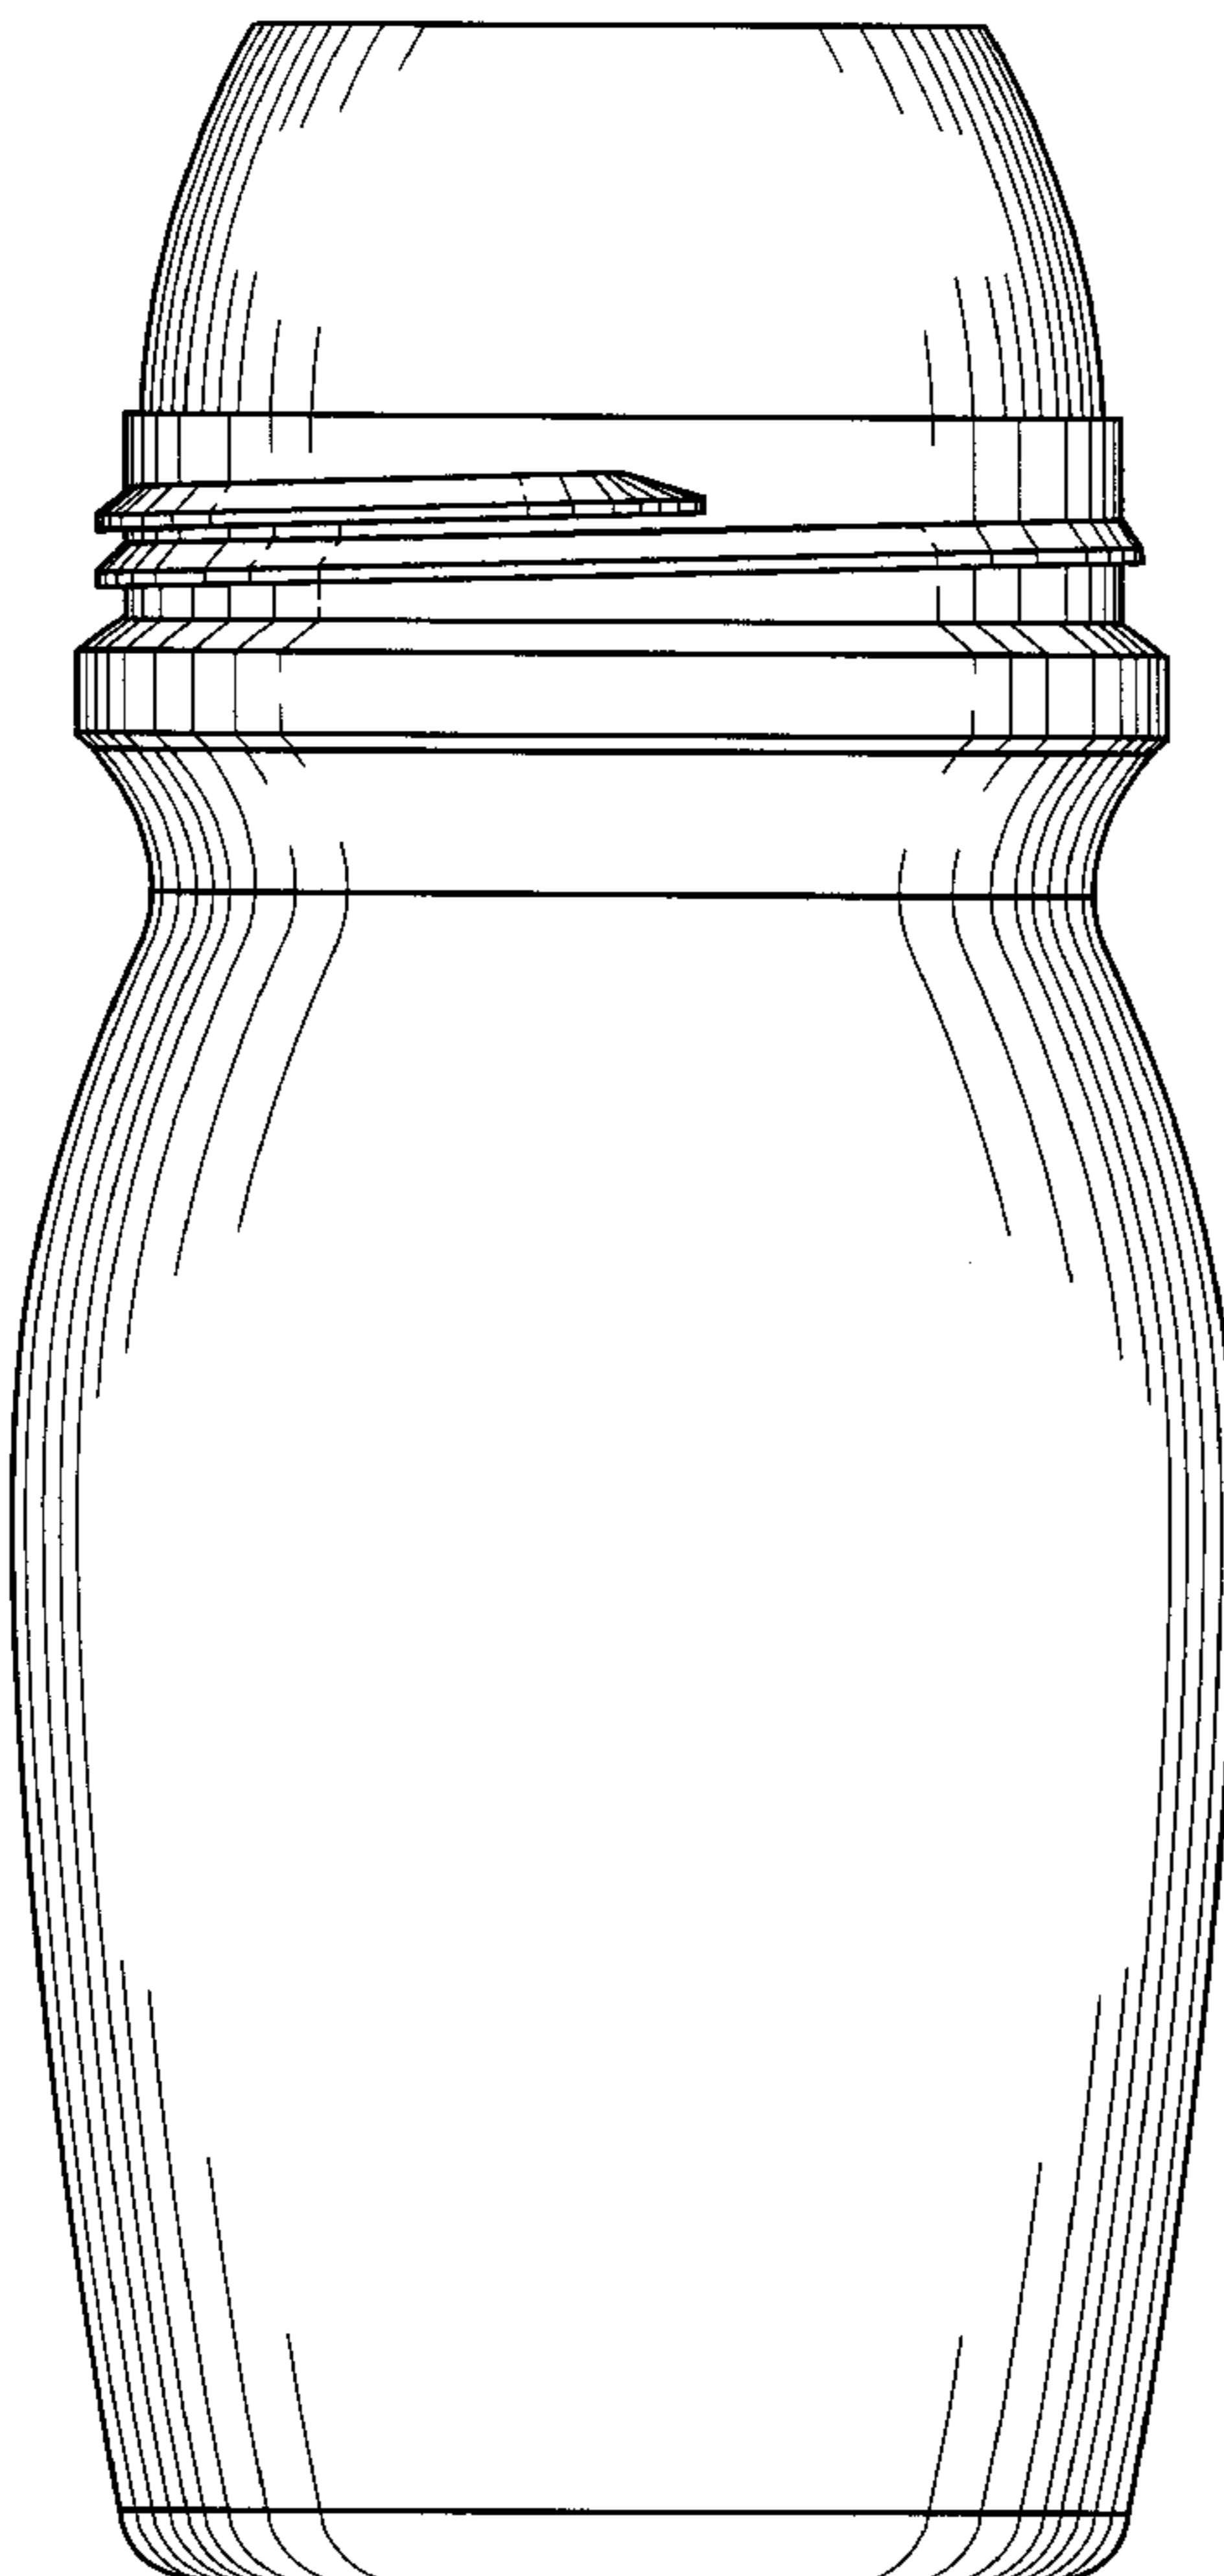

DESCRIPTION

FIG. 1 is a front elevation of a container showing my new design;
FIG. 2 is a top plan view of the container depicted in FIG. 1; and,
FIG. 3 is a bottom plan view of the container depicted in FIG. 1.

The container is symmetrical about a central vertical axis with the obvious exception of the continuous screw thread located adjacent the dome top so that the other elevation views are identical to the elevation view depicted in FIG. 1 except for the screw thread.

The portions of the neck finish that are not shown in the drawings do not form part of the claimed design.
