[57] **CLAIM**

The ornamental design for a phytoculture micro flow work station, as shown and described.

**DESCRIPTION**

FIG. 1 is a top, left side and front perspective view of a

phytoculture micro flow work station showing my new design with the work platform in an open in-use position and both glass shields in a deployed in-use position;

FIG. 2 is a top, left side and front perspective view thereof with the work platform in a closed position;

FIG. 3 is a top, right side and rear perspective view thereof;

FIG. 4 is a top, left side and front perspective view thereof with both glass shields in a stowed position and the work platform in the open in-use position;

FIG. 5 is a front elevation view thereof with the work platform in the closed position;

FIG. 6 is a plan view thereof with the work platform in the closed position;

FIG. 7 is a bottom view thereof with the work platform in the closed position;

FIG. 8 is a rear elevation view thereof;

FIG. 9 is a right side elevation view thereof with the work platform in the closed position, the left side elevation view being a mirror image;

FIG. 10 is a left side elevation view thereof with the work platform in the open in-use position and the glass shields in the deployed in-use position, the right side elevation view with the work platform and the glass shields in the in-use positions being a mirror image;

FIG. 11 is a front elevation view thereof with the work platform in the open in-use position;

FIG. 12 is a plan view thereof with the work platform and the glass shields in the in-use positions.

The broken-line disclosure of an electrical cord in the views of FIGS. 1 and 3-12 is for illustrative purposes only and forms no part of the claimed design.
