[57] **CLAIM**

The ornamental design for a desktop computer workstation, as shown and described.

DESCRIPTION

FIG. **1** is a front and left perspective view of a computer workstation in accordance with a preferred embodiment of the present invention, shown in an operational condition with a monitor screen open and input devices in extended positions;

FIG. **2** is a front elevational view of the computer workstation of FIG. **1**, shown in a closed condition, with the monitor screen closed and the input devices berthed;

FIG. **3** is a front elevational view of the computer workstation of FIG. **1**, with the input devices in extended positions;

FIG. **4** is a front elevational view of the computer workstation of FIG. **1**;

FIG. **5** is a left side elevational view of the computer workstation of FIG. **1** in the closed condition, the right side elevational view being a mirror image thereof;

FIG. **6** is a left side elevational view of the computer workstation of FIG. **1**, with the monitor screen in an open and intermediate position, the right side elevational view being a mirror image thereof;

FIG. **7** is a left side elevational view of the computer workstation of FIG. **1**, with the monitor screen in an open and rearward position, the right side elevational view being a mirror image thereof;

FIG. **8** is a top plan view of the computer workstation of FIG. **1** in the closed condition;

FIG. **9** is a top plan view of the computer workstation of FIG. **1**, with the monitor in the open and rearward position;

FIG. **10** is a bottom plan view of the computer workstation of FIG. **1**;

FIG. **11** is a rear elevational view of the computer workstation of FIG. **1** in the closed condition; and,

FIG. **12** is a rear elevational view of the computer workstation of FIG. **1** in the operational condition.
