[57] **CLAIM**

The ornamental design for a cutter for use with a guiding template, as shown and described.

DESCRIPTION

FIG. 1 is a perspective view of a first embodiment of the cutter for use with a guiding template of the present invention;

FIG. 2 is a right side elevational view thereof wherein the left side elevational view is a mirror image thereof;

FIG. 3 is a front side elevational view thereof wherein the rear side elevational view is a mirror image thereof;

FIG. 4 is a top plan view thereof;

FIG. 5 is a bottom plan view thereof;

FIG. 6 is a bottom plan view of the first embodiment with a bottom portion thereof relocated in an alternative position wherein the bottom portion is rotated 180° relative to a top cover portion thereof;

FIG. 7 is a right side elevational view of FIG. 6;

FIG. 8 is a left side elevational view of FIG. 6;

FIG. 9 is a front side elevational view of FIG. 6, wherein the rear side elevational view is a mirror image thereof;

FIG. 10 is a perspective view of a second embodiment of the cutter for use with a guiding template of the present invention;

FIG. 11 is a right side elevational view of FIG. 10 wherein the left side elevational view is a mirror image thereof;

FIG. 12 is a front side elevational view of FIG. 10 wherein the rear side elevational view is a mirror image thereof;

FIG. 13 is a top plan view of FIG. 10;

FIG. 14 is a bottom plan view of FIG. 10;

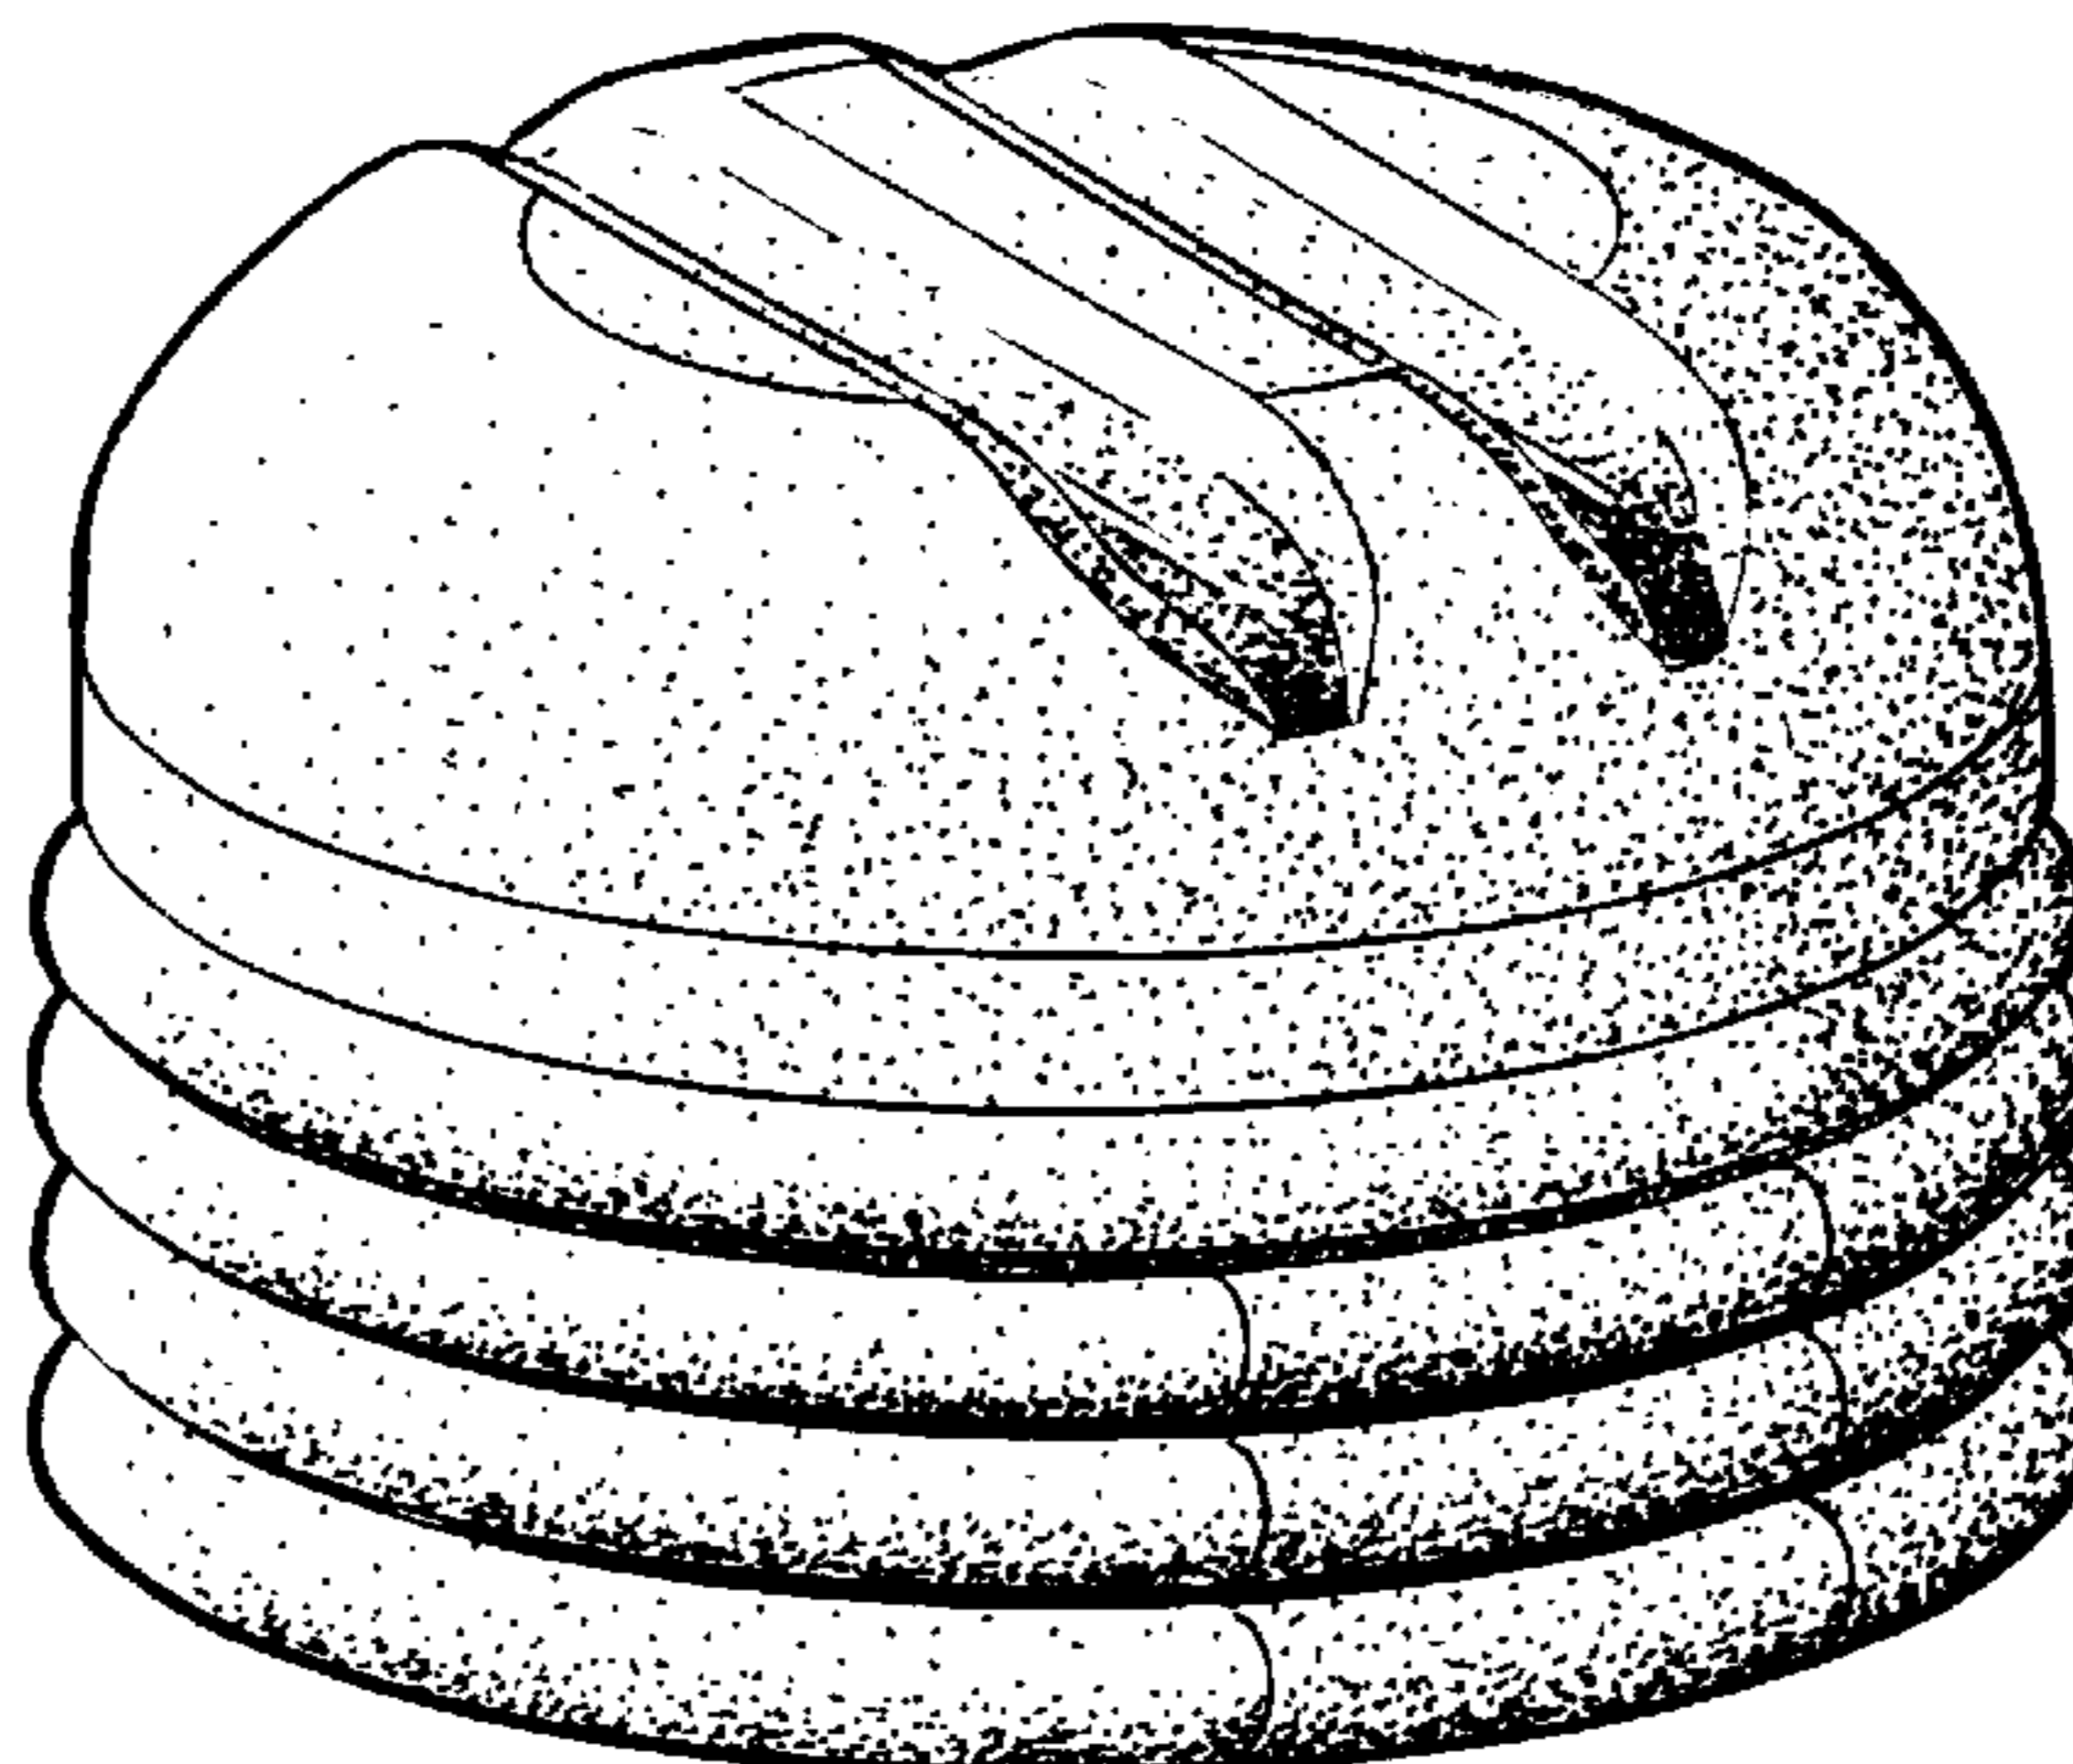

FIG. 15 is a bottom plan view of the second embodiment with a bottom portion thereof relocated in an alternative position wherein the bottom portion is rotated 180° relative to a top cover portion thereof;

FIG. 16 is a right side elevational view of FIG. 15;

FIG. 17 is a left side elevational view of FIG. 15; and,

FIG. 18 is a front side elevational view of FIG. 15, wherein the rear side elevational view is a mirror image thereof.
