The ornamental design for a wire bending device for a shear device, as shown and described.

DESCRIPTION

FIG. 1 is a perspective view of a wire bending device showing my new design, the handles and the jaws depicted by means of broken lines being for illustrative purposes only and forming no part of the claimed design;

FIG. 2 is a front elevational view thereof, the opposite end being identical in appearance, the handles and the jaws depicted by means of broken lines being for illustrative purposes only and forming no part of the claimed design;

FIG. 3 is a top plan view thereof, the handles and the jaws depicted by means of broken lines being for illustrative purposes only and forming no part of the claimed design;

FIG. 4 is a bottom plan view thereof, the handles and the jaws depicted by means of broken lines being for illustrative purposes only and forming no part of the claimed design;

FIG. 5 is a left side elevational view thereof; and,

FIG. 6 is a right side elevational view thereof.
