[57] **CLAIM**

The ornamental design for a fryer, as shown and described.

DESCRIPTION

FIG. 1 is a front elevational view of a fryer according to my new design;
FIG. 2 is a rear elevational view thereof;
FIG. 3 is a right side elevational view thereof;
FIG. 4 is a top plan view thereof;
FIG. 5 is a bottom plan view thereof; and,
FIG. 6 is a perspective view thereof, seen from above and from the right and the front.

The drawings do not show a left side elevational view. Such a view would be essentially a mirror image of FIG. 3. The top, or lid, of the fryer is provided with a series of parallel curved apertures and a small window of approximately semicircular shape for permitting viewing of the interior of the fryer.
