[57] **CLAIM**

The ornamental design for a video teleconferencing device with full screen display, as shown and described.

DESCRIPTION

FIG. 1 is a perspective front, top and side view of the first embodiment of the new video teleconferencing device with full screen display.

FIG. 2 is a front view of a first embodiment of the new video teleconferencing device with full screen display.

FIG. 3 is a rear view of a first embodiment of the new video teleconferencing device with full screen display.

FIG. 4 is a left side view of a first embodiment of the new video teleconferencing device with full screen display.

FIG. 5 is a right side view of a first embodiment of the new video teleconferencing device with full screen display.

FIG. 6 is a top view of a first embodiment of the new video teleconferencing device with full screen display.

FIG. 7 is a bottom view of a first embodiment of the new video teleconferencing device with full screen display.

FIG. 8 is a front view of an alternative second embodiment of the new video teleconferencing device with full screen display.

FIG. 9 is a perspective front, top and side view of a third embodiment of the new video teleconferencing device with full screen display; and,

FIG. 10 is a perspective front, top and side view of a fourth embodiment of the new video teleconferencing device with full screen display.

The second, third, and forth embodiments have the same appearance from the various sides as the first embodiment except for the color indicated in the second embodiment and the arrangement of the two components shown in the third and forth embodiments.

The broken lines in FIGS. 1-10 are for illustrative purposes only, for the purpose of showing a video teleconferencing screen display environment and form no part of the claimed design.
