[57] **CLAIM**

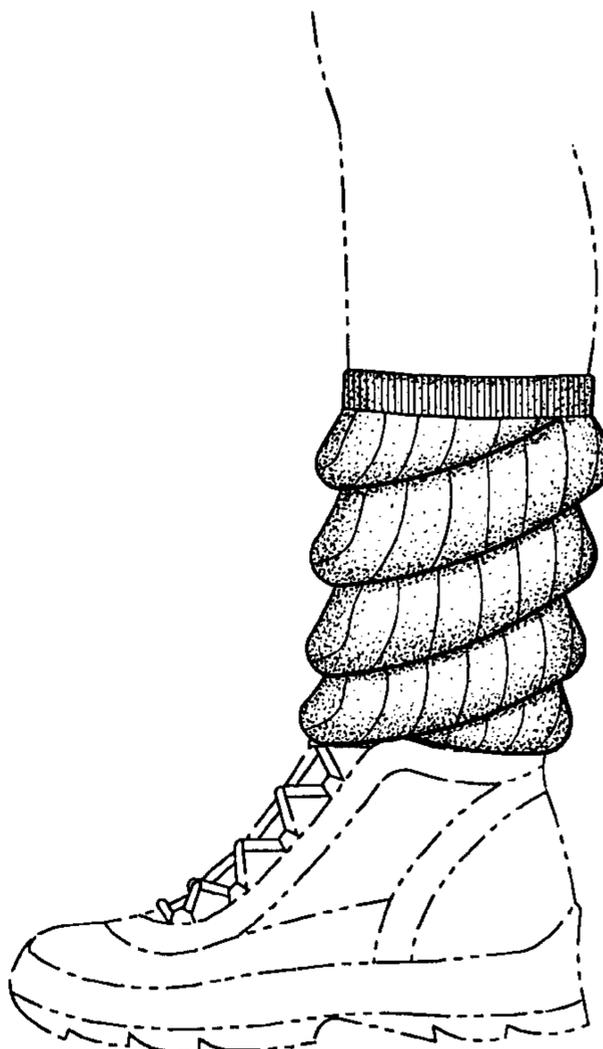

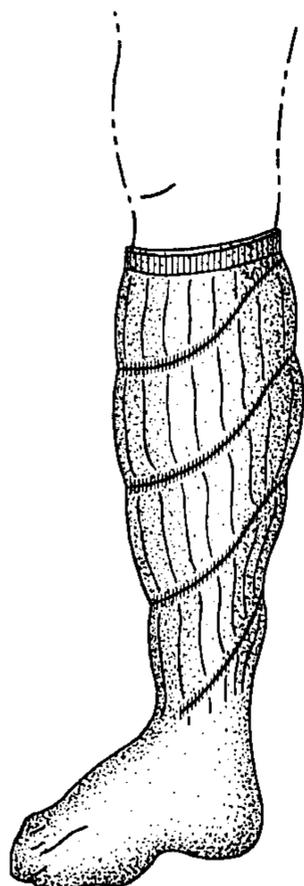

The ornamental design for a moisture absorbent sock, as shown and described.

FIG. 1 is a perspective view of the moisture absorbent sock of the present invention shown with the sock pulled up a leg; FIG. 2 is a right side elevational view of the moisture absorbent sock of the present invention shown with the sock pulled up a leg; FIG. 3 is a front elevational view of the moisture absorbent sock of the present invention shown with the sock pulled up a leg; FIG. 4 is a top plan view of the moisture absorbent sock of the present invention shown with the sock draping down a leg; FIG. 5 is a rear elevational view of the moisture absorbent sock of the present invention shown with the sock pulled up a leg; FIG. 6 is a left side elevational view of the moisture absorbent sock of the present invention shown with the sock pulled up a leg; FIG. 7 is a bottom view of the moisture absorbent sock of the present invention shown with the sock draping down a leg; and, FIG. 8 is a right side elevational view of the moisture absorbent sock of the present invention shown with the sock draping down a leg and a shoe covering the foot portion of the sock.

The moisture absorbent sock depicted in the present application intersperses wicking regions among fabric folds to increase the effective surface area of the leg portion of the sock.

The broken line showing of the human form in FIGS. 1,2,3,5,6 and 8 and the boot in FIG. 8 is for illustrative purposes only and forms no part of the claimed design.
